1900 - TWO HANDS 1927 - ONE HAND TODAY - NO HANDS Ultra-convenient new telephone can be used without lifting receiver. There was a time, within the memory of many of us, when the upright telephone was the last word in convenience. But, often as not, two hands were needed to use it. Then the "French" or hand-type phone came along. And what a stir it caused. Compact, streamlined, and — imagine — one hand free while telephoning! But now telephone people have topped this with the remarkable Speakerphone, which leaves both hands free during a call. It has a "mike" and a loudspeaker, so that you never need lift the receiver. The Speakerphone is another big advance in telephone progress. It's one of many new things we're doing to make telephone service ever more useful to you. Pacific Telephone.

Volume-control telephones, spring cords, and illuminated dials are other things perfected in recent years to bring you greater telephone convenience. Putting public telephones where you're likely to need them is another way we're making it easier for you to keep in touch and get things done. Your telephone service grows constantly more efficient and useful as telephone people find new ways to make your telephone serve you better. The telephone people of Klamath Falls work to make your telephone a bigger value every day. Your business office: 120 N. 8th St., Tel. 2-3401
