

Home Extension

By Mina Hoff

"Dry Cleaning At Home," was demonstrated by Hope Holbrook, home extension agent to members of the Klamath Falls Unit on October 19 at the home of Mrs. Ethel Alloway, 634 North Eleventh Street.

Miss Holbrook also showed samples of aprons, stuffed toys, Christmas stockings and other items that will make interesting Christmas gifts.

Mrs. Hal Ogle gave an interesting report on the Associated Country Women of the World. Several of the members signed up for foreign pen pals.

Mrs. Glenn Hewitt, vice chairman presided in the absence of Mrs. J. P. Elmore and asked for silverware coupons to be turned in for Azalea House.

Sixteen members answered roll call. Two new members were welcome.

The next meeting will be at the YMCA, 16 a.m. November 16. The subject of the project will be "Making Cakes More Attractive." Mrs. W. Ludwig and Mrs. Austin will be leaders.

FAIRHAVEN

By Mrs. Oral Heavilin

Mrs. Richard Jameson and Mrs. Oral Heavilin demonstrated kinds of food suitable for drop-in guests or after-the-game snacks at a meeting of the Fairhaven Home Extension Unit at Joan's Kitchen on October 19. Subject of the demonstration was "Food For Entertaining."

Mrs. M. Martin passed bulletins to members to be used for scolding on accident hazards around the house and on farms.

Mrs. Martin called the meeting to order following a potluck luncheon.

Mrs. Jack Brandon, acting secretary-treasurer, reported on the Fairhaven 4-H Club achievement award night on October 12 during the Parents and Patrons meeting.

Mrs. Lee Holliday announced a good attendance at the annual community lounge meeting on September 30. Mrs. Brandon won the special prize for the day.

The next meeting will be held at Joan's Kitchen November 16 starting at 10:30 a.m. Hope Holbrook will demonstrate "Picture Framing."

Peace Church Plans Nursery

A parent cooperative nursery school for three and four year old children is to be started November 1 in the primary building of Peace Memorial Church. Classes will be held Tuesday, Wednesday and Thursday mornings of each week from 9 to 10:30 a.m.

Under the parent cooperative plan mothers assist the teaching staff during class hours. A monthly meeting of parents and staff members will be held to discuss problems of guidance.

This is the first attempt to establish such a school in Klamath Falls.

The daily program will include health checks, constructive play periods, music instruction and art. The program has been organized by Mrs. J. R. Casebeer, registered nurse, with experience in nursery schools at the University of Connecticut and the University of Pennsylvania; Mrs. D. L. Proett, instructor of nursery teachers, Laboratory Training School, Lewis and Clark College and Mrs. Glenn C. Miller, with a B.S. from Oregon State College in Child Development. Mrs. Miller has also had experience in Oakland California Child Care Centers.

Enrollment is on a monthly basis and may be started the first of any month. A parent-cooperative operates on a non-profit basis with a fee of \$10 a month per child or \$15 a month for two children from the same family.

Interested parents may contact Mrs. Proett at 6814 or Mrs. Miller at 5581.

Francis Regrets Missing 'E' In Name

TONKAWA, Okla. (AP) — For the fourth straight year "Miss" Francis Langdon of Tonkawa was among 400 women honored with invitations to the exclusive Matrix Table Dinner at Norman, Okla.

And for the fourth year the invitation was turned down. Langdon, publisher of the Tonkawa News, in voicing regret pointed out that he's a mister—and not qualified to attend the social function sponsored by a women's professional journalism fraternity.

ARC Estimates Flood Aid Cost

NEW YORK (AP)—The American Red Cross estimates that its total aid to victims of the August and October floods of the East Coast will exceed 15 million dollars after all payments are completed.

Ellsworth Bunker, national Red Cross president, said yesterday that families and small businesses affected by Hurricane Diane in August have received 13 million dollars in Red Cross grants.

The victims of the Oct. 15 flood, Bunker said, will require more than two million dollars in financial assistance.

In all he said, 14,500 families and small businesses in the six-state area hit by the two disasters required monetary grants.

Scientists Reveal Initial Step To Anti-Smog Solution

PHILADELPHIA (AP)—Scientists at Franklin Institute report today they have worked out the first step necessary to end air pollution and smog. They say it is now a question of time before the over-all problem is solved.

Their problem was to identify the elements found in the atmosphere as they are affected by sunlight.

4-H NEWS

FAIRVIEW

The regular meeting of the Fairview PTA was held Thursday, October 20 in the school auditorium. The program was opened with the flag salute led by Gary Karnes and Barbara Porges. The regular business meeting followed.

Mrs. Don Phelps, program chairman introduced Mrs. Edred Hansen, state vice president who spoke about the scholarship fund. Ellen Sullivan led the audience in a community sing.

Room count was won by Mr. Long's fourth grade. The special prize went to Mrs. Thomas Garland.

Refreshments were served in the school cafeteria by the seventh grade with Mrs. Vernon Karnes and Mrs. Jerald Nidever in charge.

LANGEL VALLEY CUT-UPS

The meeting was called to order by our leader, Mrs. Brett. Mary Mitchell led our pledges before we discussed the old business, which was the presentation of towels to the Bonanza Library. Officers were elected for this club year as follows:

President, Anita Vaden; vice president, Nora Spillane; secretary, Sherry Crawford; news reporter, Sydne Ketcham; social chairman, Janice Haseltine, Mary Mitchell and Eleanor Alberts; song leaders, Kathy and Robin Brett.

Our meetings will be held every first and third week of the month at the members homes. We decided on which divisions of clothing we were going to work in this year and filled out the register. Refreshments of cake and ice cream were served by Mary after the meeting was adjourned by the president.

They used a cylinder filled with elements of the atmosphere similar to those found in the polluted air which hovers over many cities.

Dr. Nicol H. Smith, director of the Franklin Institute laboratories, puts it this way:

"Our air has become a common sewer into which are dumped many products created by combustion such as exhaust fumes from cars or the burning of trash. Our problem was first to identify these elements as they are reacted upon by sunlight. The next step is to find which ones are harmful" and eventually remove them or control their source.

Up to now says William E. Scott, head of the section which is conducting the experiment, scientists have been unable to determine precisely what products are formed in the atmosphere under the influence of sunlight.

"We know, for example," he said, "that smog under certain atmospheric conditions, is formed when the sun is out and is dissipated when the sun goes down. It is the energy from the sun which can change man-made pollutants into other compounds which make them irritating to man."

"However, not all man-made

pollutants are necessarily harmful, when diffused in the atmosphere," he continued. "After identifying the products formed by sunlight in the proportion they are found in the atmosphere, scientists can then test them to see if they are harmful."

"But the first thing we had to do was to identify them."

This was done, Scott said, with the man-made sky chamber.

It consists of a stainless steel cylinder 18 inches in diameter and 10 feet long. First the scientists fill it with pure air. Then a chemical or pollutant is fed into the cylinder in concentrations approximating those found in the atmosphere. These concentrations are often very small.

Next an ultraviolet light, or sunlight, reacts on the mixture, changing it into different compounds, an identifier in the form of an infrared light is sent into the tube.

The infrared light bounces back and forth from one end of the cylinder to the other by means of a gold-plated set of mirrors. The

contents of the air in this sample sky can then be analyzed through an infra-red spectograph.

The experiment is being sponsored by the American Petroleum Institute.

Eventually the Franklin Institute scientists hope to take their sky

NOW AGAIN at MERIT'S
Famous
Ironrite Automatic Ironer
SPECIAL DEMONSTRATION
SATURDAY
Demonstrations —
10 to 12 A.M.
2 to 4 P.M.

Miss Judy Tyson, Ironrite's own factory certified demonstrator, will be at Merit's to demonstrate all the new features of the Ironrite automatic ironer, and to show you how to do things you never realized could be done with an ironer. Come in!

JUDY TYSON

Do Away With Hand Ironing
Saves 4 to 6 Hours Ironing Time Each Week

- Irons anything you can wash . . . beautifully
- Saves you over 50% of ironing time
- Lets you sit down and relax while you iron

Ironrite
AUTOMATIC IRONER

You Can Own An IRONRITE For as Little As \$2.00 A Week
