Take it from me girls... stay Smart and Healthy

By Bessy, the Basin Bossy
They are calling golds the "hot" things on the fashion market these days.
And I don't mean just golds in colors, either. Real, glittering yellow gold of the kind you'll find in "them thar hills".
A recent issue of one of the country's fine newspaper magazine sections (This Week) tells about the "nuggets" in fashions. Gold in everything from shoes to bathing suits.
The prices aren't above what would be expected, though the bathing suit shown runs \$100, and is 24 carat. But... gold is gold.
The oil fields have their black gold, the forest lands their green gold. But you have your own, special "white gold"—it's worth that much to your well being.
Milk is indeed white gold. It is nature's most perfect food. And it can add trimmings (or take them off, if need be) when properly used. It can, like gold earrings, ornaments and clothes, enhance your natural appearance.
The difference is, it does it from within. It makes that old saying "beauty is only skin deep" ring untrue.
So take it from Bessy, the Basin Bossy, the gold in your life may be long in coming, but the white gold—fresh, Grade "A" milk—is one of the finest bargains you'll find anywhere on earth.
And it can be only as far away as your door step... or your favorite grocery store.
