

NEW OFFICERS of the Sojourners Club were installed by Mrs. James Thornton following a 1 o'clock dessert at the Willard Hotel on December 14. Tables were centered with gay Christmas decorations and tapers. A group of students from the seventh and eighth grades of Fremont Junior High School presented a number of choral numbers under the direction of Ruth Lobaugh, music supervisor in the city elementary schools. (l to r) are Mrs. E. O. Jackson, secretary; Mrs. Frederick Martin, president; Mrs. Sam L. Jones, chairman for the day; Mrs. G. A. Nichol, vice president and Mrs. Chet Stinson, treasurer.

BOB RIGGS of the Oregon Water Corporation checks the flow of highly chlorinated water into a newly constructed water main to supply the new Klamath Falls Air Force Base. The chlorine gas contained in the cylinder at the right is injected into water which flows through the new main. As there is far more chlorine in this water than in normal drinking water, the pipe will be sterilized. Following sterilization, plain water is sent through the pipe to rinse out the surplus chlorine. Riggs and his apparatus were located on Washburn Way just south of the Tower Theater Thursday afternoon.

Character Actors Die In Hollywood

HOLLYWOOD (AP) — Dorothy Bernard, 61, and Paul Harvey, 71, two of the theater's best known character actors, died Thursday of heart attacks.

Miss Bernard, currently appearing as "Margaret" and cook-

housekeeper in the television series "Life with Father," was stricken in her home.

Harvey, a native of Sandwich, Ill., came to Santa Ana, Calif., with his parents as a child and also attended grammar and high schools in Visalia, Calif.

He appeared in such Broadway hits as "Dinner at Eight" and "The Trial of Mary Dugan."

He leaves the widow, Ottye, a half-sister, Mrs. Ionella Southstone, McKenzie Bridge, Ore., and a half-brother, Hubert Robbins, Eugene, Ore.

Tulelake Farmers Conduct Drainage Problem Meeting

TULELAKE — A meeting was held in the March Theater in Tulelake on Tuesday, December 13, for the purpose of discussing the drainage and soil salt accumulation problem of the Tulelake government lease lands. This meeting was called by Roy Edwards, Tulelake farm adviser, Dr. James Luthin of the Irrigation Department, and Ken Baggett, farm adviser of the University of California, Davis.

Dr. Luthin, working cooperatively with the U.S. Bureau of Reclamation and the Agriculture Extension Service, is making a study of the drainage and salt accumulation in the soil of the Frog Pond, League of Nations, and Southwest Sump. Luthin reported to the large group of farmers present that the salt accumulations in certain areas of these lands has reached severe proportions during the growing season. This is due to the rise of water from the water table by capillary action.

Ten water stage recorders were installed in the lease lands to give a continuous record of the water table situation. An additional 30 water table observation wells were read once a week to give a rather complete picture of this situation. Soil samples were collected three times during 1955 growing season to check salt accumulations. These samples were analyzed in the laboratories of the University of California at Davis.

The analysis shows that the accumulation of salt in the soil surface layers is definitely becoming a problem on lease lands. In several locations the salts are sufficiently concentrated to cause reduced crop yields or even crop failure.

On the basis of the samples collected from the 40 sampling spots it is not possible to make specific comments about any particular lease. Salt accumulations may vary from place to place in any one field, but the problem is becoming increasingly severe.

Both Luthin and Baggett pointed out that if the drainage situation is not corrected soon, the salt will accumulate to a point where nothing will grow on the land. They urged that if proper drainage could be provided these salts could be leached from the soils out through the drains. Both men mentioned that adequate subsurface drainage is the first step in the solution of the problem. The present ditches are not deep enough to provide this drainage. Ditches should be deepened, kept free from obstruction, and the water level be kept down.

Dr. Luthin mentioned that since the soil of the area is quite permeable, it should be relatively easy to remove all of the salt with one or two leachings after sufficient drainage was provided. Luthin's

studies show that area close to deep drains are free from salt. The University of California plans to continue the studies of this problem in 1956 in cooperation with the Bureau of Reclamation and the Agricultural Extension Service.

Farm Federation Favors Supports

CHICAGO (AP) — The American Farm Bureau Federation is on record in favor of flexible government price supports and a proposal for a soil bank.

The action was taken at the group's final session of its annual convention Thursday.

The soil bank recommendation is designed to cut present surpluses and avert future surpluses by converting a percentage of crop land to grasses and legumes.

In other business of the meeting, delegates reelected Charles B. Shuman of Sullivan, Ill., president.

The federation is the nation's biggest farm organization. It says it represents 1,600,000 farm families.

ATTENTION HOME CRAFTSMEN!

HOWIE DUZZIT
Says--

It's a pleasant surprise for every "Do-It-Yourself" fan of our store.

Yes, it's a brand new useful guide of tips and ideas for handymen (and women, too) all combined in a useful, attractive calendar you can hang up in your home for quick and accurate reference.

We invite you to come in and get your "How To Do It" calendar at our store now. It's free!

The loveliest gift under the Christmas tree... foamy lingerie, laced with a lavish hand and molded to figure-flattering perfection.

Tailored Nylon

Knee Deep In
Angel Lace

... A slip so undeniably lovely you'll want it to accompany everything you own—and it will. Eyelet embroidery edged with lace forms bodice, eyelet embroidery bordered by rows of shirring creates deep flounce.

32 to 40
White **8.95**

GOWN

Only lace achieves that look of real luxury. Only here does it receive such regal treatment... On floating puffs of chiffon and smooth, flowing tulle... as deep ruffles and slender insertion.

8.95

PETTICOAT

The slim, slim PETTICOAT is lavish with daisy embroidery. Side slit hemline is edged with lace and bows. Perfect under slim skirts. Sizes 24 to 30

7.95

PANTIE

Matching PANTIE has embroidered daisy insertion. Just right for the new clothes you'll be wearing. Sizes 4-5-6-7.

2.95

"SHOP THE STORE YOU ENJOY"

The Town Shop

• 500 MAIN • FREE PARKING IN REAR

SLIP

Such an exquisite embroidered flounce you'll HOPE it shows just a little bit—and it will! Matching embroidery and lace on sheer bodice furthers the fairy tale beauty of this nylon slip. White, sizes 32 to 38.

8.95 to 14.95

The SLIP follows the new high rounded bosom. It's proportioned to fit your height and hips too. Accented with pleated ruffle and daisy insertion. Sizes 32 to 40.

Take it from me girls... stay **Smart and Healthy**

By Bessy, the Basin Bossy

In this column, since we talk about what's being worn and how to "stay smart and healthy," we probably should list the fashions to be worn by 1955's well dressed Santa Claus.

But Santa's attire, a fashion which has hardly changed in all my memories, is pretty well set for the season.

One of Christmas's sweetest traditions is the jolly old gent who symbolizes giving. And one of the age-old tricks the youngsters have learned in an attempt to "polite" a little more into the Christmas sock is the glass of warm milk left by the fireside for Santa. But rather a trick, it's usually a gesture of genuine love from the young ones—providing for a friend they have never really seen something which they feel is the best. If you are playing Santa Claus yourself, better take them up on such an offering. It's worth its weight in gold to your health, and to your well-being.

And if you're smart, too, you'll make that the start of a milk habit, if you've not already got one. The experts recommend growups, too, should be drinking milk—three glasses of milk every day.

Among the spectators at the nation's ball games, we note, browns were the most predominant colors.

Take note at basketball games this season and see if reds don't brighten up a dreary winter-make their usual strong showing time scene.

And take it from me, drink three glasses of milk every day, and every dreary scene will take on new color and brightness.

Bessy.
