Good News For Septic Tank Owners Septic tanks are lifesavers for those who live away from city sewer systems. But septic tanks can, and do, stop-up and overflow! First, because the tank is not cleaned at proper intervals; secondly, toilet tissue that does not readily disintegrate may clog the drains and force them to back up! This may be avoided by using MD Toilet Tissue—because MD is scientifically processed to absorb water quickly. Drains don't clog or back up so readily! Good practice: Consult your County Health Department, your plumber, or a septic tank service company, for advice on cleaning your tank. Use MD Toilet Tissue!
