Ideas IN PAINT and WALLPAPER

THE COMPLEMENTARY BACKGROUND

One of the most important things to remember when planning your wall treatments is that the background of a room (and the walls are the most prominent background factor) must be decoratively appropriate to the furnishings that are to be used in the room. This applies to paint colors and wallpaper colors and patterns.

If your furniture style is formal, then the color scheme should suggest formality, while you would plan an entirely different color scheme for the quaint, homespun, informal styling of provincial-type furnishings. The accompanying sketch shows a Traditional 18th Century room with wall treatment and furnishings in complete accord with one another. Note that the scenic wallpaper mural on the mantel wall depicts a classic scene which is in keeping with the formal feeling of the room. Color scheme is composed of soft French blue and ivory.

In creating present day homes, color plays a more important role than ever before. We cordially invite you to come in and see our cavalcade of new paint colors—colors that will make you say and mean "There's a rainbow round my shoulder." Come in... anytime.
