

Modoc Lumber...

KEEPS ABREAST OF THE TIMES!

Since this picture was taken in 1951, Modoc Lumber Co. plant has undergone many changes. Most notable by their absence in the above picture are the two big kilns which have been installed and several large dry storage sheds. The plant is located on the south end of Klamath Avenue, bordering Lake Ewauna.

A Complete Rejuvenating Job Within The Last Six Years!

To keep abreast of the times and to manufacture the high-quality lumber required by today's market, a lumber mill must operate with the latest, most efficient equipment possible. The officials of Modoc Lumber Co. realize this truth and within the last six years the plant has undergone a complete rejuvenation.

Two big dry Kilns have been erected, all old equip-

ment has been replaced with the most modern machinery possible, and operation methods has been streamlined.

Modoc Lumber Company is a permanent operation and will continue to grow with the Klamath Basin. Further equipment modernization is planned and the erection of a third kiln is projected.
