

TIDE WASHING CLINIC suggests decorating an Easter window to welcome the Easter bunny and gives directions for doing it. You'll need plastic starch, detergent, some straw raffia, a few odd buttons and a thimble and some empty egg shells. Easter egg dyes or vegetable coloring will tint the shells.

EASTER BUNNY WINDOW

Here's a recipe, concocted by Tide Washing Clinic, for decorating your Easter windows to welcome the Easter bunny.

Cut designs out of cardboard. The backs of writing tablets are perfect for this or use top and bottom of old suit boxes.

Gather together your props. You need empty egg shells to fill the Easter basket shown in the center top pane in the photograph, heads for the bunnies (top left and right panes), and for the tulips growing in the lower right pane. Straw raffia makes the tree trunk sprouting in the lower left pane. A thimble serves as a pert nose for the bunny in the lower center pane. Buttons do nicely as eyes.

Color your egg shells to suit your own taste.

Now mix a tablespoon of plastic starch with one cup of Tide. Whip until you have consistency of cake frosting (about 2 minutes). Coat cut-outs with the goo-mixture—both sides so that window looks good from inside or out! Mount cut-outs in place and hold in position for a moment until they "set."

Stick props in place and hold these in position for a few seconds also. In a few hours goo hardens to "concrete." Paint over it with water colors.

Easter over? Then add water

and that hard plaster turns into frothy suds. Rinse off and your windows are sparkling clean for Spring!

BOUDOIR

One of the most convenient fixtures for the family bedroom is the vanity or countertop lavatory which permits dressing and grooming while the bathroom is occupied, says the Plumbing Fixture Manufacturers Association. Dressing table lavatories come in colors and white and provide cabinet space for make-up and cosmetics.

BAKING TIP

No need to grease pan for most of the cakes you make with cake flour. Instead, line the bottoms with plain or waxed paper. Some mixes have liners in the package or you can cut out a dozen at a time when paper and scissors are handy and keep them in a drawer for use when needed.

NEW FABRIC

For its new Jockey shorts, Cooper's Incorporated has come up with a new material called "Mer-cellin," which is a high quality fabric, a blend of imported Irish linen and mercerized, extra-long staple Egyptian cotton. Mer-cellin is highly absorbent, durable, flexible, light weight and cool for warm weather, yet comfortable in cooler temperatures.

SPRING FANCY

Spring Fancy is Prince Matchabelli's brand new perfume, billed simply as an added attraction and available only this Spring in the Perfume Preview package.

The packaging carries out the theatrical motif suggested by the name. A pair of tickets, opera glasses, white gloves and flowers, all in color on the cover suggest the gala stage setting inside the box in which the newest member of the royal family of perfumes is given the front-and-center stage position.

Spring Fancy Cologne has partners in Spring Fancy Dusting Powder and Spring Fancy Perfume Creme Sachet. You can be literally fragrant from head to toe with this delightful scent.

The Perfume Preview allows you to have a whole collection of perfumes at hand from which to select just the right one to peak your Spring mood. Inside the package are four different and varied perfume scents in miniature crowns. Three of them are Prince Matchabelli's most popular and well known—Wind Song, Stradivari and Beloved. The fourth is the lovely Spring Fancy.

TEACH BABY

Baby can learn to feed himself if you give him a spoon and let him dig into a dish of vanilla pudding. If most of it flies onto the floor, another bowl can quickly and inexpensively be prepared from a package of Jell-O Pudding and Pie filling mix and milk.
