Deadline Reminder Given Wool Growers In Basin

March 31 is the final date that marketings of wool and lambs will qualify for payments under the current wool incentive program year, William Burnett, chairman of the County Agricultural Stabilization and Conservation Committee said today.

Applications for payment must be postmarked before May 1, he said. Those who still have 1955 clip wool to sell and those who shear early this spring and sell their clip on or before March 31 will qualify for the wool incentive payment for the current year. Payments on such sales will be made this summer or early fall. There is no need for hasty or premature marketing this spring because wool and lambs sold after March 31 will qualify for payments under the 1956 program year which begins this April 1. Payments based on sales made after March 31 will not be made until mid-summer of 1957.

Burnett also points out that the March 31 date applies to those who sell lambs. They too will qualify for the current year's payment if March 31 and if the lambs are not sheared when sold. Chairman Burnett emphasizes, however, that feeders who purchased lambs prior to March 31 need not market prematurely to get the full payment under the program. Payments to producers and others under the coming 1956 program will be for the full amount on lambs provided they purchased the lambs prior to March 31.

Those who produce or feed lambs also should have in mind that the coming year's program will be somewhat different from the one now in effect. After March 31 the payment for wool on lambs will be divided among all owners of the lambs before slaughter, the payments based on the period of ownership of each. For the current year the payment goes to the last owner before slaughter. The change for the coming year also means that payments will be made to owners who sell lambs regardless of the purpose of the sale—for slaughter, for feeding, or for flock replacement.
