

THESE CONTESTANTS are vying for a free trip to Hawaii by selling the most tickets to the Veteran's of Foreign Wars dance to be held Saturday, October 6 in the Klamath Falls Armory. The Starlighters Band will play for the dance from 9 p.m. to 1 a.m. Pictured here, left to right, are four waitresses in local cafes who were in the ticket selling contest, Agnes Dewey, Millie Harger, Gayla Bath and Lois Mynatt. Bill Nelson is chairman of the contest which is designed to raise funds for the welfare fund.

Navy Scientists Reveal Possible Rocket To Moon

By VERN HAUGLAND

WASHINGTON (AP)—Two Navy scientists said today it may become possible to send a rocket to the moon.

The rocket probably would deliver no more than a "four-pound payload" to the moon, said Kurt R. Stehling, chief of propulsion at the Naval Research Laboratory here, and Richard Foster, a member of the laboratory propulsion staff.

For that reason, they said, the initial payload might consist of nothing but a charge of metallic dust. They said that if it were fired at a new moon and if it landed on the darkened surface, the impact might be witnessed from the earth as a large bright flash.

Stehling and Foster expressed their views in an article prepared for a new magazine, Missiles and Rockets. The article is based on a paper scheduled to be read tomorrow at the International Astronautical Federation Congress in Rome.

They stressed that the opinions expressed were not to be construed as reflecting the views of the Navy Department.

Stehling and Foster said that "when carried aloft to 70,000 feet by a huge four-million-cubic-foot skyhook balloon, a solid-propellant step rocket will be capable of

bringing a four-pound payload to the moon."

They noted that small rockets frequently have been carried aloft and launched from balloons, but added that a lunar rocket might require a cluster of smaller balloons for greater stability. The Rocket would be launched straight up, through the balloon or balloons they said.

The Navy scientists proposed a three-stage rocket vehicle which they said should hurl the payload toward the moon. The distance between the moon and the earth varies from 221,463 to 252,710 miles as the moon moves around its orbit.

PTA Congress Arranges Leadership Workshops

The Oregon Congress of Parents and Teachers has arranged for a series of workshops in leadership training for PTA members, committee chairmen, and officers of locals and councils to be held throughout the state during September and October. The workshops will be under the direction of Mrs. Ellen Dell Bieler, Western Springs, Illinois, field worker for the National Congress of Parents and Teachers.

Mrs. Bieler will conduct the workshop in Klamath Falls, Friday, October 5, at the county library, from 1-4 p.m. This workshop will be for all members interested in PTAs. Mrs. Arthur Moore, president of Klamath County Council of PTA, is in charge of local arrangements.

As field worker for the National Congress of Parents and Teachers, Mrs. Bieler has traveled thousands of miles across the country and shared the plans and problems of many thousand PTA workers in state congresses, districts, councils and local units. Her interest in the PTA dates back to the days when her two daughters—now college graduates—were in elementary school. Both as parent and as teacher, Mrs. Bieler participated actively in the program of her parent-teacher association, as chairman of various committees and as a PTA president.

Always interested in human relations, Mrs. Bieler majored in psychology and philosophy at Teachers College, Columbia University, and received a masters

Outside her professional activities, Mrs. Bieler has always found time for her home town. In addition to her teaching experience, she has spent several summers at children's camps, in charge of health and hospital experience.

Rubber-covered telephone cord can really take it. The part of your telephone that gets the hardest wear is the cord. That's why telephone people now cover phone cords with synthetic rubber. This covering outlasts the cotton type by several years. Naturally, this helps keep telephones in good working order for even longer periods of time. It's another of the things that help us provide good, dependable service... service you can count on whenever you need it. The men and women of Pacific Telephone work to make your telephone more useful every day.

KIRKPATRICK'S Will Save HER Work With...
the NEW 1956 GENERAL ELECTRIC MOBILE MAID DISHWASHER
\$199⁹⁵
Even better than ever... the new 1956 General Electric Mobile Maid Dishwasher... that rolls easily on free-moving casters!

- no-pre-rinsing necessary
- holds complete service for 8
- rolls to and from table for loading
- snap-on water connection — no plumbing costs
- plugs into any standard wall electric outlet
- dishes come out sparkling clean and DRY
- counter-balanced top opening
