Wheat Plan Deadline Set

Friday, October 5, is the last day for Klamath County wheat farmers to sign up for participation in the winter wheat acreage reserve part of the Soil Bank program. Spring wheat growers may also sign agreements at this time. The acreage reserve program is for those farms with 1957 wheat allotments. Under this program, farmers may earn soil bank payments by reducing their wheat acreage below their allotment. The land designated as acreage reserve must be retired from production for the entire year.

The payment is based on the normal yield per acre of the designated acreage multiplied by the acreage reserve unit price for wheat which is \$1.15 per bushel in Klamath County.

Klamath County has been allocated \$36,137 for the winter wheat program, and will receive an additional allocation for the spring wheat program. Spring wheat growers may either sign agreements now or next year sometime prior to planting.

Additional information may be obtained at the Klamath County ASC office which is located in the Tower Theater Building.
