

HALLOWEEN WITH A HEART. A new twist to the traditional "Trick or Treat" campaign on Halloween has been introduced by the United Nations International Children's Fund. With their arm bands and milk cartons the children of the United States will appeal for pennies, nickels and dimes on Halloween and the money collected will be devoted toward aiding the less fortunate children of the world. Last year more than a million youngsters in 6,000 communities made a gift to "all the world's children" of over half a million dollars. Shown above are Bud Mortensen and Rama LaGrande.

Ike Says Bomb Test Cease Fire Is 'Disadvantage'

WASHINGTON — President Eisenhower said last night the United States could "suffer a serious military disadvantage" if it stopped its tests of nuclear weapons and then found that Russia was continuing hers.

Without naming his Democratic opponent Adlai E. Stevenson, Eisenhower said that one of Stevenson's contentions in the campaign debate over continued bomb testing "is based upon apparent unawareness of the facts."

Eisenhower issued his second formal reply to Stevenson's repeated calls for this nation to take the lead in working toward an end to hydrogen bomb testing.

While rejecting Stevenson's arguments, the President said he

remains "profoundly hopeful" that a properly safeguarded system of world disarmament will come to pass. But until that comes, he declared:

"We must continue . . . to develop our strength in the most advanced weapons — for the sake of our own national safety, for the sake of all free nations, for the sake of peace itself . . .

"There is nothing in postwar history to justify the belief that we should — or even that we could dare — accept anything less than sound safeguards and controls for any disarmament arrangements."

On another point raised by Democratic campaigners, Eisenhower said big business has lost, rather than gained, under his administration.

In a speech last night at the 75th anniversary banquet of the carpenters union, Eisenhower said if his administration were guilty of favoring big business, as charged, "I am sure big business would assert we have failed dismally."

"I give you two interesting facts," he said. "During the years 1946 to 1952, inclusive, corporate profits — after taxes — averaged 7.7 per cent of the national income. During the period since 1953 when this administration entered office, corporate profits — after taxes — have averaged 4.8 per cent of the national income."

"While this has been going on,

labor's share of the national income has risen progressively. It is now 70 per cent, the highest in the last 20 years."
