

Columbia River Basin Report Issued By Corps Of Engineers For Study

PORTLAND (AP) — The Corps of Engineers issued a preliminary report Tuesday on how best to develop resources of the Columbia River Basin, and foresaw the great rivers unable to keep pace with swiftly growing needs for power.

"A fairly full use" of economically feasible developments can take care of expected electric power requirements for less than 20 years, says the report prepared under the director of Brig. Gen. L. H. Foote, North Pacific division engineer.

And then the Pacific Northwest will need to lean more and more on "thermal generation," the designation for steam power, which now encompasses heat from atomic reactors.

But to get full use of the region's rivers—not only for power but for flood control, irrigation and navigation—a score of dams will need to be built at a cost of more than two billion dollars.

In a 60-page report, the engineers outlined the results of studies into what feasible dams would bring maximum river development. It takes note of the Northwest's dependence on Canadian waters, as well as of rivers flowing wholly in this country.

The report is a preliminary revision of the comprehensive development plan adopted in 1948, known as the 300 report.

At a series of four hearings the plans will be discussed. A number of dams listed are controversial and sharp exceptions to some of the engineers' findings are expected.

FTC Approves Trade Stamps

WASHINGTON (AP) — Trading stamp plans are a perfectly legitimate trade practice so long as they are properly handled, the Federal Trade Commission has decided.

The five commissioners of the FTC, after nearly 18 months of study, came up with that unanimous opinion yesterday. But they said the commission will crack down on any stamp plan found to be deceiving the public or used in any way as an unfair method of competition.

There are now 300 kinds of trading stamps distributed by about 200,000 retailers. They are turned in for premiums with a retail value estimated at 600 million dollars a year.

The FTC turned its investigative eye on the plans last year after complaints by both businessmen and customers that the plans were deceptive trade practices or unfair methods of competition.

The commissioners in their opinion didn't specify which particular plans they had been investigating, but one FTC source indicated they included "most of the big ones."

The FTC said there really was not any question as to whether the trading stamp plans were in themselves illegal, according to federal law. The U.S. Supreme Court ruled as long ago as 1916 that any prohibition of the plans would have to be done by the various states.

Nor did the FTC commissioners specify what, if any, particular evils they had been looking for in the past year and a half.

But FTC sources said last spring the commission could and would step in if any plan was found to be misleading the public about the premiums offered; using unfair methods of competition, such as giving one store in an area exclusive rights to the plan; or discriminating by selling the same stamps to different stores at different prices.

The report calls attention to omission of some multiple purpose dams which had been proposed in earlier studies. Among these is the Snake Range project on the north fork of the Flathead River, partly in Glacier National Park, which was dropped at the request of the secretary of the interior.

Others dropped include Swan Lake and Marsing, abandoned after a July, 1956, hearing; a plan for pumping water in high flow periods from the Columbia River into Omak Lake, found not economically feasible; and the Chiwawa Project on the Wenatchee River, not economically feasible.

These storage projects the engineers find feasible in seeking maximum development of the Columbia Basin's resources:

Kootenai River Basin—Libby Dam, 5,010,000 acre-feet storage, 516,000 kilowatts initial power, \$285,000,000 cost; Long Meadows, 400,000 acre-feet storage, 16,700 kilowatts, \$24,700,000.

Clark Fork-Pend Oreille Basin—Paradise, 4,080,000 acre-feet storage, 432,000 kilowatts initial power, \$450,000,000 cost; Flathead Lake Channel, 500,000 acre-feet storage, no power, \$6,900,000 cost; Spruce Park, 400,000 acre-feet, 78,000 kilowatts, \$78,000,000; Buffalo Rapids, 670,000 acre-feet, 200,000 kilowatts, \$50,200,000; Ninemile Prairie, 805,000 acre-feet, 60,000 kilowatts, \$53,100,000.

Spokane River Basin—Enaville, 700,000 acre-feet storage, 50,000 kilowatts initial power, \$69,300,000 cost.

Snake River Basin—Garden Valley, 1,940,000 acre-feet storage, 129,000 kilowatts initial power with re-regulating facility, \$93,000,000 cost for both main and re-regulating works; Wenaha, 900,000 acre-feet, 200,000 kilowatts, \$78,000,000; Pleasant Valley, 500,000 acre-feet, 720,000 kilowatts, \$94,000,000; Clearwater River Basin—Bruce Eddy, 1,433,000 acre-feet storage, 240,000 kilowatts initial power, \$131,000,000 cost; Penny Cliffs, 2,300,000 acre-feet, 292,000 kilowatts, \$210,000,000.

Salmon River Basin—Lower Canyon, 2,300,000 acre-feet, 800,000 kilowatts initial power, \$210,000,000 cost; Crevice, 1,700,000 acre-feet, 45,000 kilowatts, \$140,000,000.

Potential run-of-river power projects are not included with detailed studies but the report says it is expected that the majority will be found economically feasible. The principal ones, with initial power capacity in kilowatts:

Kootenai River Basin—Mile 204.9 power 73,000; Kootenai Falls 240,000; Katka, 150,000.

Clark Fork-Pend Oreille Basin—McMama, 22,000; Plateau, 20,000; Quartz Creek, 80,000; Superior, 16,000; Quinn Springs, 48,000; Eddy, 90,000.

Snake River Basin—Mountain Sheep, 282,000; China Gardens, 240,000, or alternate, 126,000; Asotin, 288,000; Freedom, 270,000; Clearwater River series of dams, 540,000.

Columbia River—Ben Franklin, 468,000.

The first hearing will be Oct. 21 at Missoula, Mont., where the projected Paradise Dam—a 450 million dollar flood control and power plant—is expected to be hotly argued.

The second hearing will be Oct. 23 at Wenatchee, Wash., the third Nov. 13 at Lewiston, Idaho, and the fourth Nov. 15 at Portland.

Gen. Foote pointed out in releasing the results of the study that although many changes have taken place in the Northwest's economy since 1948, the basic requirements for flood control are unchanged from those in the 300 report.

The essential is to control a flood of the magnitude of that which ravaged the region in 1894. To do that, he said, calls for strengthening and extending existing levee systems; and developing upstream storage to the point where the Columbia River's flow would be held to 800,000 cubic feet per second at The Dalles.

An even greater storage would be desirable, he said, and added that this appears obtainable from needed hydroelectric power dams. The report suggests it will be feasible to extend navigation on the Columbia to the foot of Rock Island Dam, near Wenatchee, and to extend slack water navigation on the Snake River to Lime Point, in Idaho.

But a study of a proposed new wide lock at Bonneville Dam shows that foreseeable river traffic would not justify the cost, the report says.

Whether a 40-foot channel from Portland-Vancouver to the mouth of the Columbia is justified will be determined in a separate study.

The report calls attention to omission of some multiple purpose dams which had been proposed in earlier studies. Among these is the Snake Range project on the north fork of the Flathead River, partly in Glacier National Park, which was dropped at the request of the secretary of the interior.

Others dropped include Swan Lake and Marsing, abandoned after a July, 1956, hearing; a plan for pumping water in high flow periods from the Columbia River into Omak Lake, found not economically feasible; and the Chiwawa Project on the Wenatchee River, not economically feasible.

These storage projects the engineers find feasible in seeking maximum development of the Columbia Basin's resources:

Kootenai River Basin—Libby Dam, 5,010,000 acre-feet storage, 516,000 kilowatts initial power, \$285,000,000 cost; Long Meadows, 400,000 acre-feet storage, 16,700 kilowatts, \$24,700,000.

Clark Fork-Pend Oreille Basin—Paradise, 4,080,000 acre-feet storage, 432,000 kilowatts initial power, \$450,000,000 cost; Flathead Lake Channel, 500,000 acre-feet storage, no power, \$6,900,000 cost; Spruce Park, 400,000 acre-feet, 78,000 kilowatts, \$78,000,000; Buffalo Rapids, 670,000 acre-feet, 200,000 kilowatts, \$50,200,000; Ninemile Prairie, 805,000 acre-feet, 60,000 kilowatts, \$53,100,000.

Spokane River Basin—Enaville, 700,000 acre-feet storage, 50,000 kilowatts initial power, \$69,300,000 cost.

Snake River Basin—Garden Valley, 1,940,000 acre-feet storage, 129,000 kilowatts initial power with re-regulating facility, \$93,000,000 cost for both main and re-regulating works; Wenaha, 900,000 acre-feet, 200,000 kilowatts, \$78,000,000; Pleasant Valley, 500,000 acre-feet, 720,000 kilowatts, \$94,000,000; Clearwater River Basin—Bruce Eddy, 1,433,000 acre-feet storage, 240,000 kilowatts initial power, \$131,000,000 cost; Penny Cliffs, 2,300,000 acre-feet, 292,000 kilowatts, \$210,000,000.

Salmon River Basin—Lower Canyon, 2,300,000 acre-feet, 800,000 kilowatts initial power, \$210,000,000 cost; Crevice, 1,700,000 acre-feet, 45,000 kilowatts, \$140,000,000.

Potential run-of-river power projects are not included with detailed studies but the report says it is expected that the majority will be found economically feasible. The principal ones, with initial power capacity in kilowatts:

Kootenai River Basin—Mile 204.9 power 73,000; Kootenai Falls 240,000; Katka, 150,000.

Clark Fork-Pend Oreille Basin—McMama, 22,000; Plateau, 20,000; Quartz Creek, 80,000; Superior, 16,000; Quinn Springs, 48,000; Eddy, 90,000.

Snake River Basin—Mountain Sheep, 282,000; China Gardens, 240,000, or alternate, 126,000; Asotin, 288,000; Freedom, 270,000; Clearwater River series of dams, 540,000.

Columbia River—Ben Franklin, 468,000.

The preliminary report says that a minimum development of the basin to achieve the essential flood control level of 800,000 cubic feet per second flow at The Dalles can be had with storage of 19,280,000 acre feet, which would produce three million kilowatts and cost 900 million dollars.

Maximum development can reduce the flow at The Dalles to 500,000 cubic feet per second, step up flood control storage to 39,500,000 acre-feet, produce six and a half million kilowatts and cost \$1,800,000,000, exclusive of Canadian projects.

It lists the Canadian projects in the maximum program as Mica Creek and Arrow Lakes, with combined storage of 12,100,000 acre-feet.

The first hearing will be Oct. 21 at Missoula, Mont., where the projected Paradise Dam—a 450 million dollar flood control and power plant—is expected to be hotly argued.

The second hearing will be Oct. 23 at Wenatchee, Wash., the third Nov. 13 at Lewiston, Idaho, and the fourth Nov. 15 at Portland.

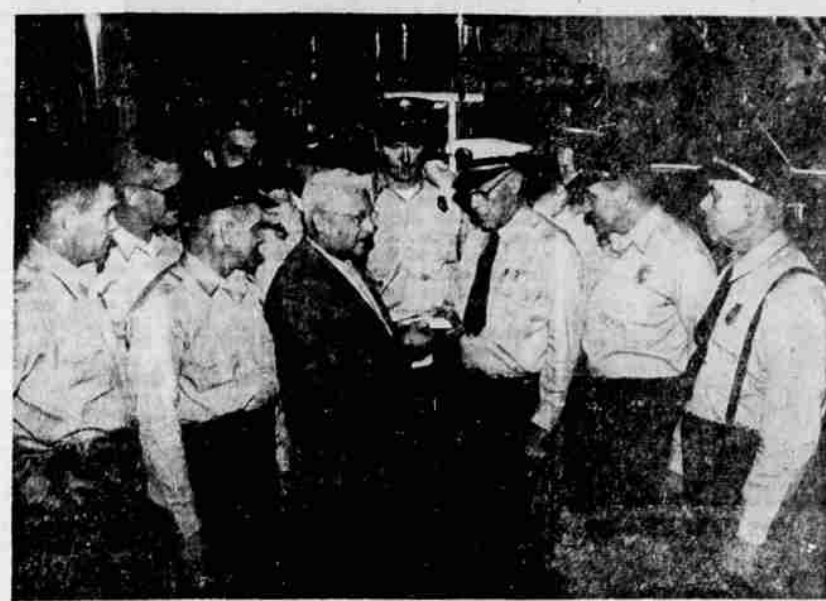

Gen. Foote pointed out in releasing the results of the study that although many changes have taken place in the Northwest's economy since 1948, the basic requirements for flood control are unchanged from those in the 300 report.

The essential is to control a flood of the magnitude of that which ravaged the region in 1894. To do that, he said, calls for strengthening and extending existing levee systems; and developing upstream storage to the point where the Columbia River's flow would be held to 800,000 cubic feet per second at The Dalles.

An even greater storage would be desirable, he said, and added that this appears obtainable from needed hydroelectric power dams. The report suggests it will be feasible to extend navigation on the Columbia to the foot of Rock Island Dam, near Wenatchee, and to extend slack water navigation on the Snake River to Lime Point, in Idaho.

But a study of a proposed new wide lock at Bonneville Dam shows that foreseeable river traffic would not justify the cost, the report says.

Whether a 40-foot channel from Portland-Vancouver to the mouth of the Columbia is justified will be determined in a separate study.

RECEIVING FIRST AID CARDS from State Industrial Accident Commission for completion of a six week course are the members of the city fire department. Here Murray Newton of the commission presents a card to Chief Roy Rowe. Other members of the department looking on are, back row, Ken Free, with hands akimbo, Millard Shreeve, Richard Suber, Harry Ernst, Jim Brown, and Jack Cully. Front row, left to right, are Harold Uglum, Newton, Chief Rowe, Gino Gheller and John Mitchell. The chief said the men are dressed in their new house uniforms. Classes for the course were three hours each.

Flu Epidemic Shows Decline

Although the flu epidemic at Merrill High School appears to be on the decline, the number of absences late this week remained sufficiently high to force cancellation of the scheduled Merrill-Talent football game. Earlier in the week more than a third of the school enrollment was absent because of the flu.

Carroll Howe, county superintendent of schools, adds that the severity of the flu epidemic at Henry High School seems to be tapering off. At the end of the week there were as many as 140 absences from the total 368 enrollment.

Late last week there were 105 absent from the 422 enrollment at Altamont Junior High. The number declined steadily this week and at this point there are only about 60 absences.

Also heavily hit during the current week was the Fairhaven School. As late as Thursday there were as many as 80 students missing from the 362 enrollment.

Howe adds that the enrollment is now almost back to normal at the Bonanza schools, one of the first locations to be hit by the flu epidemic. Also on the mend is the enrollment at Hly School, heavily hit by flu absences two weeks ago.

Clark Fork-Pend Oreille Basin—Paradise, 4,080,000 acre-feet storage, 432,000 kilowatts initial power, \$450,000,000 cost; Flathead Lake Channel, 500,000 acre-feet storage, no power, \$6,900,000 cost; Spruce Park, 400,000 acre-feet, 78,000 kilowatts, \$78,000,000; Buffalo Rapids, 670,000 acre-feet, 200,000 kilowatts, \$50,200,000; Ninemile Prairie, 805,000 acre-feet, 60,000 kilowatts, \$53,100,000.

Spokane River Basin—Enaville, 700,000 acre-feet storage, 50,000 kilowatts initial power, \$69,300,000 cost.

Snake River Basin—Garden Valley, 1,940,000 acre-feet storage, 129,000 kilowatts initial power with re-regulating facility, \$93,000,000 cost for both main and re-regulating works; Wenaha, 900,000 acre-feet, 200,000 kilowatts, \$78,000,000; Pleasant Valley, 500,000 acre-feet, 720,000 kilowatts, \$94,000,000; Clearwater River Basin—Bruce Eddy, 1,433,000 acre-feet storage, 240,000 kilowatts initial power, \$131,000,000 cost; Penny Cliffs, 2,300,000 acre-feet, 292,000 kilowatts, \$210,000,000.

Salmon River Basin—Lower Canyon, 2,300,000 acre-feet, 800,000 kilowatts initial power, \$210,000,000 cost; Crevice, 1,700,000 acre-feet, 45,000 kilowatts, \$140,000,000.

Potential run-of-river power projects are not included with detailed studies but the report says it is expected that the majority will be found economically feasible. The principal ones, with initial power capacity in kilowatts:

Kootenai River Basin—Mile 204.9 power 73,000; Kootenai Falls 240,000; Katka, 150,000.

Clark Fork-Pend Oreille Basin—McMama, 22,000; Plateau, 20,000; Quartz Creek, 80,000; Superior, 16,000; Quinn Springs, 48,000; Eddy, 90,000.

Snake River Basin—Mountain Sheep, 282,000; China Gardens, 240,000, or alternate, 126,000; Asotin, 288,000; Freedom, 270,000; Clearwater River series of dams, 540,000.

Columbia River—Ben Franklin, 468,000.

The preliminary report says that a minimum development of the basin to achieve the essential flood control level of 800,000 cubic feet per second flow at The Dalles can be had with storage of 19,280,000 acre feet, which would produce three million kilowatts and cost 900 million dollars.

Maximum development can reduce the flow at The Dalles to 500,000 cubic feet per second, step up flood control storage to 39,500,000 acre-feet, produce six and a half million kilowatts and cost \$1,800,000,000, exclusive of Canadian projects.

It lists the Canadian projects in the maximum program as Mica Creek and Arrow Lakes, with combined storage of 12,100,000 acre-feet.

The first hearing will be Oct. 21 at Missoula, Mont., where the projected Paradise Dam—a 450 million dollar flood control and power plant—is expected to be hotly argued.

The second hearing will be Oct. 23 at Wenatchee, Wash., the third Nov. 13 at Lewiston, Idaho, and the fourth Nov. 15 at Portland.

Gen. Foote pointed out in releasing the results of the study that although many changes have taken place in the Northwest's economy since 1948, the basic requirements for flood control are unchanged from those in the 300 report.

The essential is to control a flood of the magnitude of that which ravaged the region in 1894. To do that, he said, calls for strengthening and extending existing levee systems; and developing upstream storage to the point where the Columbia River's flow would be held to 800,000 cubic feet per second at The Dalles.

An even greater storage would be desirable, he said, and added that this appears obtainable from needed hydroelectric power dams. The report suggests it will be feasible to extend navigation on the Columbia to the foot of Rock Island Dam, near Wenatchee, and to extend slack water navigation on the Snake River to Lime Point, in Idaho.

But a study of a proposed new wide lock at Bonneville Dam shows that foreseeable river traffic would not justify the cost, the report says.

Whether a 40-foot channel from Portland-Vancouver to the mouth of the Columbia is justified will be determined in a separate study.

RECORDING STAR BILL HALEY and his Comets, one of the leading sellers of phonograph records in the country, will make an appearance October 8 at the armory. Haley, whose "Rock Around the Clock," "Don't Knock the Rock," "Razzy Dazzy" and "See You Later, Alligator," have racked up a total of 4 million sales, has toured the world with his rock and roll group. His controversial music is the rage of the younger element and Haley, a 27-year-old guitar player from Pennsylvania says, "All we do is play with plenty of rhythm and catchy tunes the fans can sing. We're happy if they're happy." The group will not appear on the Pacific Coast again this year.

"Of course you can have a date, Howard! But instead of going out somewhere, why don't we stay home and do my chemistry homework?"

NIXON VACATIONING
MIAMI (UP)—Vice President Richard M. Nixon was vacationing in seclusion today at an ocean-front hotel on Biscayne Key. A close friend said Nixon was "tired and just wants to take it easy." The vice president flew into Miami unannounced Wednesday night. He is expected to return to Washington Sunday night or Monday.

Weyerhaeuser

(Continued from Page One)

forest management, (2) a "boom or bust" cycle for the Basin area should be avoided, and (3) there are many small mills in the Basin entirely, or almost entirely, dependent upon timber from outside sources. The timber must be disposed of in a way that will preserve for these mills an opportunity to use it in the future.

Concluding its presentation, Weyerhaeuser said, "Finally, we recognize that the problem of over-riding importance is the assistance of the Indians in their transition to the status of full-fledged independent citizens. We believe that this committee deserves the highest commendation for the sincerity and industry with which it is meeting these problems."

This was the first concrete presentation the subcommittee has heard which suggested a course other than federal purchase, and clearly outlined some of the economic and financial factors which will have to be considered in any course of action.

Senator Neuberger was holding his third day of hearings on the problem, following two days of hearings in Klamath Falls, with a single day in Portland, during which time he formerly stated he hoped to hear from state officials as to the feasibility of purchase of the reservation by the state of Oregon.

Illness Takes KF Resident

Mrs. Eva Viola Jensen, 57, a native of Mississippi and a resident of this city, died here October 3, following a lengthy illness. She was a member of the Latter Day Saints Church.

Surviving are a son Bruce Bartz of Merrill; a daughter, Mrs. Lulu Engleke of Klamath Falls; four brothers, A. A. Morris of Toppish, Washington; H. H. Morris, Yakima, Washington; J. A. McDonald, Merrill; Fred F. McDonald, Malin; five sisters, Mrs. Lillian McBride, Ogden, Utah; Mrs. Elma Hendricks, Buxton, Idaho; Mrs. Caroline Thompson of Pacific Grove, California; Mrs. Winnie Robinson and Mrs. Verda Swetina, both of San Jose, California; also three grandchildren.

Funeral services will be held in the LDS Church, Saturday, October 5 at 11:30 a.m. Final rites and interment will be in Grants Pass, Oregon. O'Hair's Memorial Chapel is in charge of arrangements.

Siskiyou Jail Draws Praise

YREKA—A 60-year-old Oakland businessman, R. Isaacs, expressed warm appreciation for the hospitality of the Siskiyou County Jail facilities as he waited for his son-in-law, I. O. Ewe, also of Oakland, to return from hunting so they could go home.

Isaacs and Ewe were camped for five days at Parker's Camp at Willow Creek, near Yreka, on a deer hunting expedition. Early Thursday morning they became separated on the mountainside and about 1 p.m. Isaacs said he realized that, for the first time in 40 years of hunting, he didn't know the way back to camp. Through a rain storm and heavy fog which cut visibility to a couple of feet, he made his way down the rough terrain of the mountain until he reached a county road near the Silva ranch. Two hunters in a pickup truck came along and took him to the county jail business office where he arrived about 5 p.m., soaked to the skin and shivering from the cold.

Deputy Bill Haas gave him prison garb, the only dry clothing available, loaned him a razor for the first shave he had had in five days and provided "a mighty good meal," according to Isaacs.

In the meantime, Ewe discovered his father-in-law was missing and walked to a ranger station to report him lost. The rangers phoned the sheriff's office at Yreka and found Isaacs, cheerfully visiting with the night deputy and waiting for Ewe to show up.

IMPROVED DESIGN for easier handling of U.S. Savings Bonds is displayed above by H. N. Mangels, left, president of the San Francisco Federal Reserve Bank, and George W. Minnaugh, Oregon state director. They are admiring the "new look" in one of America's safest investments. Minnaugh was in San Francisco recently to discuss the new punch-card bond which is designed according to recommendations made after a national survey among Federal Reserve Banks and their issuing agents. The punch-card bond is shaped like a U.S. treasury check, keyed with little perforations, right in line with the modern trend. The new features will effect substantial savings through automatic processing.

Funerals MUCHA

Funeral services for James Mucha, 68, who died in this city will be held Saturday, October 5 at 10 a.m. at the graveside in Klamath Memorial Park. The Rev. Dale Hewitt officiating. O'Hair's Memorial Chapel is in charge of arrangements.

Theft Reported By Local Tavern

Nearly \$200 and several cases of beer and cigarettes were stolen sometime early Friday morning from Lloyd's Tavern at 222 East Main Street when access to the building was gained by cutting the protective heavy wire mesh away from one of the building windows.

Money containers were broken into in the interior of the building. The case is under investigation by city police.

Three Injured In Headon Crash

A spectacular head-on collision occurred at approximately 7:15 p.m. Thursday on the Old Fort Road when a car being operated by James Marvin Dale, 21, went out of control and struck a car driven by Ole N. Landy, 40. Both parties are from Oregon Technical Institute.

According to investigating Oregon State Police, Dale was driving down the hill from OTI when his car went out of control on a curve and skidded 250 feet before colliding with Landy's vehicle.

Dale was taken to the Klamath Valley Hospital by Peace Ambulance Service and is described as being in satisfactory condition. He is suffering from leg injuries. Landy's legs were injured and his daughter, Judith, age 7, received facial cuts.

No citations have been issued.

Woman Gets Term In Jail

DORRIS — Mrs. Edith Pauling Runion, 40, of Klamath Falls, elected Thursday afternoon to serve 58 days in the Siskiyou County Jail at Yreka in lieu of a \$200 fine imposed by Judge Les Chase.

Mrs. Runion was stopped by California Highway Patrol a half mile south of Madroon on Wednesday evening. She appeared before Judge Chase on Thursday and entered a plea of guilty to charges of driving while intoxicated and failure to have a driver's license. She was taken to Yreka Thursday evening by Constable Archie Brimmer and a matron from the Dorris Jail.

Nehru Arrives In Japan

TOKYO (AP) — Prime Minister Nehru of India arrived in Japan today for a 10-day visit of good will and sightseeing.

Nehru is repaying Prime Minister Nobusuke Kishi's recent visit to India. Kishi headed the Japanese delegation that met Nehru and his daughter, Mrs. Indira Gandhi at the airport.

The two leaders are expected to discuss Asian cooperation for economic development and their mutual demands for an end to nuclear weapons tests. But most of the time Nehru will be visiting Japan's leading scenic and historic spots.

DON'T show me bifocals

Examine me for Noles Blend-Vue Lenses!

Blend-Vue lenses are obtainable through Dr. Noles Optometrists at Columbian Optical Company. If you have dreaded getting new glasses because you knew your next pair would be bifocals, Dr. Noles can give you the appearance of youth and freedom from bifocal discomforts through this sensational lens, which eliminates the objectionable bifocal line and unpleasant eye-jump caused by old-fashioned bifocal lenses. The new Noles BLEND-VUE lens is not to be confused or compared with ordinary Continuous Vision Lenses, which we have dispensed for many years.
