Teachers Feted With Reception

DUNSMUIR—Mr. and Mrs. David Leighton, band and chorus teachers for the Dunsmuir Elementary School were honored at a reception at the school auditorium on Thursday evening.

The affair followed the meeting of the Cshyoneers, a parent-student group for the promotion of musical training. Cookies and coffee were served.

At the meeting, Mrs. Mildred Lockhart, chairman, presided. Plans for a variety show in November featuring both student and adult talent were discussed and the group decided to sponsor a fruit cake sale again this fall. It was announced that only \$250 remained due on the \$2,500 grand piano purchased last year by the Canyoners. It is expected that proceeds from the variety show will retire this obligation.

Church Group Bills Speaker

Jack Pierce, Ford Foundation anthropologist, will again be guest speaker at the Klamath County Unitarian Fellowship meeting this Wednesday at 7:30 p.m.

Pierce, who is studying the Klamath Indians, spoke two weeks ago on "Anthropology Looks at Religion" at a meeting attended by members and guests who represented five different religious groups in Klamath Falls.

According to Ben Kerns, fellowship president, Pierce's talk and the discussion period which followed were so well received that the anthropologist was invited back for a second time.

The meeting, open to all who are interested, will be at the regular meeting place, the Klamath Art Center, formerly the Mountain View housing project recreation building.

How telephone men fight metal-eating winds. Tony Gurnari and Vic Sculatti (left and right above) are part of a telephone metal-testing team. They're prying open what we call a terminal box. It's like the one to which telephone wires from your house are connected. But this one is frozen shut by a hungry metal-eater called corrosion. Corrosion can be caused by salt-laden wind, fog or ocean spray. It can rust, pit or crack tough metals. So we test to find metals that are economical to use yet resist corrosion. Telephone men also study other destroyers like wood rot, insects and even gnawing animals. By controlling such destroyers, we save thousands of dollars worth of equipment each year.

At the test site, Tony and Vic are at work learning new facts about corrosion by exposing metals to ocean winds and other elements. Their tests are part of our effort to lengthen the life of every kind of equipment serving your phone. At the same time these tests help us keep your service dependable. Working together to serve you better.... The men and women of Pacific Telephone in Klamath Falls Your business office: 900 Main St., TU 2-3401
