**Why H. B. Dexter Likes Competition**

Like almost every business, "Dex" has competitors . . . other petroleum distributors who also work hard to win steady customers. Probably no one knows this better than he does. That's why he works constantly to improve his service. That's competition.

And, even though methods may differ, the entire petroleum industry believes in competition, too. For competition inspires research and experiment; the results are new processes, new and improved products, a better way of life.

This is the essence of our democratic system and our economic vitality as a nation. It's also one of the reasons you can enjoy efficient dealer service and the most advanced petroleum products at the lowest prices in the world.

Many of you may know H. B. Dexter. He's worked here in Klamath Falls for 7 years supplying Mobil products to independant Mobile dealers in your community.

On the occasion of Oil Progress Week, we join in honoring the Mobil distributors and dealers . . . and their competitors . . . for the fine job they do serving you . . . serving a nation on wheels.
