ACE T-V TIPS

- ★ A. Try to locate your set AWAY from heaters, radiators, hot-air vents, etc., to allow maximum COOL set ventilation. Overheating of TV circuits usually shortens their normal operating life.
- ★ B. If you have minor popping, buzzing and picture static, try reversing the TV set cord plug in your wall outlet. This small change may pleasantly surprise you.
- ★ C. If your picture tube is getting old and showing white horizontal (retrace) lines thru it, let us test it free of charge. We can correct it by one of these four methods, depending on conditions involved:

1. Picture Tube Rejuvenation
Free with service charge
2. Installing Picture Tube Booster
\$2.75 with service charge
3. Replacing Worn-Out Picture Tube
Regular list price of tube plus service charge
4. Correcting Circuit Casualty, Alignment of Antenna
Bench work usually required on set, fault in R.F., I.F., video detector, D.C. restorer or control circuits. Our experience and modern servicing techniques clear this fast!
