Tables With Eastern Accents

BY RUTH W. LEE, HOME-FURNISHINGS CONSULTANT

Beautifully designed Japanese stoneware brings a special charm to every table, whether the occasion is an informal luncheon (above) or a buffet-style dinner (above right).

WITH THEIR delicate and ageless charm, things Oriental are winning more and more acceptance in Western settings. First came Eastern screens, wallpapers, and fabrics. Now entering the picture is Japanese stoneware, beautifully designed with classic motifs. These are dishes that really wear well—not only in terms of service but also in the esthetic sense. And since they're ovenproof, you can use them for cooking as well as for serving. The simplicity of the pattern lends itself with equal grace to formal and informal meals, and all the while contributes a delightful Oriental atmosphere.

now—a great new kind of relief to help

BREAK THE COUGH-COLD CYCLE!

Unlike syrups that merely "coat" the throat, new CEES quickly releases potent medication right into your blood stream, rushes relief to nose, throat and chest—where the cough-cold cycle begins.

1. IN THE NOSE

CEES, with GW-3, helps reduce allergic congestion with its resulting postnasal drip which causes coughs and spreads bacteria.

2. IN THE THROAT

CEES not only soothes irritated membranes . . . it also relaxes nerves and muscles that cause cough spasms.

3. IN THE CHEST

CEES helps clear congested bronchial passages, where viruses and bacteria can breed and be spread by coughing.

New CEES* has a delicious fruit flavor children love!
