"Why don't you get spareribs? You and Daddy don't like them, so you wouldn't have to buy so much!"

Large Manhunt Concluded When Kidnaper Surrenders

PADUCAH, Ky. (AP) — The grim four-day manhunt for kidnaper Carl E. Burton ended last night. He ran into police headquarters and surrendered because "the pressure was too much."

Two policemen chased him as he ran, hit him in the air and a fully loaded revolver sticking in his hand.

It was a dramatic climax to one of this area's most intensive searches which began when Burton and Harold Davis, 33, kidnaped Missouri State Trooper William Little at Van Buren, Mo., Saturday night.

Burton said at the police station: "I'm glad it's over. The pressure was getting too much. I knew I couldn't get away. I had to quit running."

Police from four states converged on this western Kentucky area when the pair, holding Little hostage, smashed through roadblocks in Little's police cruiser.

Burton and Davis, both of Redwood, Calif., fled to a remote section of McCracken County late Saturday night, holed up at a farm home and held Little and Mrs. Calvin Shelton hostage for 24 hours.

Davis cracked under the pressure and shot and wounded himself. Burton fled to the river bottomlands Sunday, leaving Little and the Sheltons unharmed.

Police set up massive roadblocks within a 50-mile radius. A misunderstanding caused the death of a young woman at one roadblock when her car drove through.

Patrolmen Marion Shelbourne and James Arts recognized Burton walking down a street here last night. They turned a spotlight on him, ordered him to halt and started after him.

Burton, only a few doors from the police station, kept going. He ran into the station and was immediately disarmed. The pistol belonged to Little.

Burton was ordered held under \$30,000 bond on a federal kidnaping charge and \$5,000 bond on charges of interstate transportation of a stolen car. He waived preliminary hearing before U.S. Commissioner Herbert Melton Jr. and was ordered held to the April 21 federal grand jury.

Burton said "I was trying to make up my mind" while walking through downtown streets. "I finally did and came down here. I couldn't stand it any more."

Burton gave this explanation of how he evaded some 150 officers after fleeing from the Shelton farm:

He walked some 25 miles across snow-covered fields to Paducah, taking a round-about route.

Late Sunday night, he went to the home of an aunt and uncle, identified as Mr. and Mrs. H. T. Cavitt Jr., and spent the night.

The next day, after learning Davis had shot himself, he walked to a little-used railroad roundhouse, slipped in and hid behind a boiler.

He slept there Monday afternoon and night, and although several people came in, he said, they didn't see him.

He left the roundhouse last night and began walking.

Asked how he felt about all this, Burton said: "Well, two people got killed. That's enough."

He referred to the shooting of Jewell English, 24, Paducah, at a roadblock early Monday.

The FBI explained later the other person "killed" was a California police officer who the FBI said Burton admitted shooting.

San Francisco officer Robert Crimelle was wounded trying to stop a liquor store holdup last month. He is recovering.

Davis is scheduled for a preliminary hearing at his hospital room today. He is under the same charges and bond as Burton.

An autopsy into the death of Miss English revealed she was shot by a high-powered weapon. A civilian at the roadblock, Forrest McAllister, 26, Fulton, Ky., admitted he shot a carbine at the English car.

No charges have been placed in the shooting. An inquest is scheduled for Friday.

DUNNIGAN, Calif. (AP) — California's second interstate bus accident in two days injured seven persons Tuesday, one of them seriously.

The highway patrol said a Continental Trailways bus pulled out to pass a lumber truck, then spotted an oncoming car and elected to crash into the rear of the truck rather than collide head-on with the car.

The bus was traveling from Seattle to Los Angeles when the accident occurred in the rain on U.S. 99W near this Sacramento valley town 20 miles north of Woodland.

Listed as seriously hurt was Dickie Jean Murphy, 19, Seattle. Neither the bus driver, Mancel C. Smith of Sacramento, nor the truck driver, John A. Jackson, were injured.

The truck was not damaged and no citation was issued.

High School Building Plan Related By Superintendent

The probability that the south wing auditorium at KUHHS cannot be completed with the amount remaining in the serial levy funds, coupled with the fact that the high school district may not be able to legally call for a bond issue at this time, were brought to the attention of the school and budget board Tuesday evening by Arnold Gralapp, superintendent of city schools.

Gralapp explained the items at the beginning of the budget hearings so that members of the budget board could have the school's financial picture and eventual status in mind when considering all budget proposals.

He pointed out that the \$120,000 annual serial levy, passed four years ago has four years remaining, and that from that source \$480,000 would be available for adding the auditorium to the newly completed south wing at the high school. Although the architect's estimates of the auditorium cost, Gralapp said it is his assumption that the cost will be appreciably in excess of the \$480,000 which will be raised between this year and the final levy in 1961-62.

He said that if the cost is in excess of the available funds, the school board might ask authority for a bond issue for the construction, with the issue to be retired by serial levy funds received in the future.

However, he pointed out that the school reorganization law passed at the 1957 session of the State Legislature might constitute a technicality in the path of bond issue passage. In face of the law, there is a possibility that the three school districts within Klamath County may face some measure of consolidation or reorganization.

If such were the case, Gralapp said, a bond issue for any school district within the county may not be possible until the reorganization measure has been completed in 1962.

In event it is impossible to continue with the auditorium construction in the immediate future, Gralapp presented this alternate for the board's consideration.

In addition to the \$480,000 which will be raised via serial levies during the next four years, there is currently \$25,000 remaining from the 1957-58 serial levy, \$10,000 which was budgeted for improvements at the auditorium, and a similar \$10,000 which is anticipated to be set aside during the 1958-59 fiscal year.

Of that total amount, the plan would call for setting aside \$300,000 to be used for constructing the auditorium when additional funds are available. In addition, \$25,000 would be used during the forthcoming fiscal year for transforming the present high school cafeteria into classrooms, girls' physical education quarters, and health instruction rooms. Additional cafeteria space will be afforded early this spring when the new south wing is opened.

Another \$120,000 would be used during the upcoming fiscal year for the addition of dressing rooms, shower rooms, and athletic department facilities to the existing auditorium. The new structure would replace the existing field house.

Another \$20,000 would be set aside for the payment of architect fees, some of which are outstanding and some of which will develop with projects in the immediate future.

No action was taken on the proposals Tuesday evening.

In other business during the meeting, the budget board studied the proposed budgets of the various school departments in the fields of instructional supplies, maintenance and replacement, and capital outlay. All categories were tentatively approved with exception of the music department entries. The board chose to have music Director Andrew Loney Jr. appear and discuss the budgetary needs prior to acting on the department requests.

In The Day's News

(Continued from Page One)

deal with principles that are new in the world. They are filled with fabulously intricate and complicated machinery. If ANY component fails to do its assigned job, the whole thing flops.

The Russians had the good sense to keep their mouths shut until they had licked their preliminary problems.

We of the press (newspapers, magazines, radio, TV) need to do a little serious thinking on our own account.

We must NEVER, of course, permit government to tell us we CAN'T print the news. But we owe it to our country to use discretion and good judgment in our handling of news dealing with developments so delicate and potentially explosive that MISHANDLING of them can endanger our country's position in the world.

Dental Health

(This is the fourth in a series of articles published in cooperation with the Klamath Dental Society in observance of National Children's Dental Health Week, February 2-8. Some of the questions most frequently asked of dentists are answered.)

Doctor, is drinking fluoridated water really necessary for my youngster's teeth? Why can't I see to it that he gets the same effect with pills or with milk?

The case for water fluoridation as a protection against dental decay rests.

Dental and medical scientists are agreed that probably no health measure of recent history has undergone the searching analysis of water fluoridation. There were decades of research before the procedure was tried out. Then there were 10-year tests in several cities.

No such record exists for any other method of fluoridation. There are those who advocate putting fluorides in milk or other foods or administering fluorides in pill form. Dental scientists point out, however, that fluoridation of water is the only method that has been subjected to adequate tests.

These scientists assert that the use of any other substance would require another 10 years or so of clinical testing. Additionally, they note that the amount of water consumed by an individual is more nearly constant than that of any food.

For the first time, dental science has at hand a large-scale weapon against what is probably mankind's most common disease. As the program continues to reach out into more and more communities, it means that a new generation of children will be growing up throughout the United States without the vast rate of dental defects that are the lot of their fathers and mothers.

These children will become adults with up to about 60 per cent less tooth decay than those who have grown up in fluoride-deficient areas.

Another technique has been worked out, not quite as effective as fluoridation, for rural areas where there is no common water supply. The technique is called "topical application of fluoride" and refers to the use of a fluoride solution on the surfaces of the teeth.

In making the application, the dentist or dental hygienist cleans the teeth, dries them thoroughly and then applies the solution, letting it dry on the teeth.

Dentists recommend that a series of applications be given to children at the ages of 3, 7, 10 and 13 years.

Research studies indicate that these treatments will reduce the rate of dental decay by an average of about 40 per cent.

Tomorrow: "Crooked Teeth."

Local Court Action Noted

A 19-year-old Klamath Falls youth was sentenced to five years probation Tuesday afternoon by Circuit Court Judge Charles Foster, sitting on the Klamath County bench.

The defendant, Charles O. Rasdal, was charged with burglary not in a dwelling in connection with numerous burglaries and acts of vandalism in the Merrill-Malin region during late 1957.

In other recent circuit court action, Klamath County Judge David R. Vandenberg set the following trial dates:

Peter Fielding, appealing a district court decision on charges of assault and battery, February 27; Lester Chasten, charged with statutory rape, February 24; Cecil Hendricks, charged with larceny by bailee, March 10; Cecil Hendricks, charged with drawing a check with insufficient funds, March 17.

The trial date for John Wilson, suspended city patrolman charged with assault with a dangerous weapon, has not been reset at this time. The jury trial began January 8 but was recessed in a mistrial the following day when Wilson's attorney died following a heart attack. Judge David R. Vandenberg granted the mistrial to permit Wilson to obtain another attorney and to give counsel time to study the case. Wilson recently retained Attorney Pete Driscoll to represent him.

RHEUMATISM — ARTHRITIS SUFFERERS OFFERED AMAZING RELIEF

A truly remarkable new medical discovery now offers wonderfully fast relief from nagging, crippling agony of Arthritis, Rheumatism, Neuritis and Neuralgia. Sensational Ar-Pan-Ex tablets work through your blood stream to bring blessed relief from gnawing, stabbing pains in joints, muscles and nerves. Why keep on suffering from wonderful Ar-Pan-Ex can make your life worth living again—bring back restful nights—active days. Most stubborn cases are helped by Ar-Pan-Ex.

Sewer Rental Rates Set By Sanitary District Heads

An ordinance establishing sewer rental rates and connection fees within the district was passed at a special meeting of the board of directors of the South Suburban Sanitary District Monday evening.

The ordinance provides for a minimum monthly rental fee of \$3.25 for individual dwelling units using 2,000 cubic feet of water or less per month. For business establishments or other customers whose monthly consumption of water is more than 2,000 cubic feet, a proportionately larger fee will be assessed, depending on the amount of water used.

In order to permit the customer to share in reduced costs to the district through lower interest charges, and also to allow the district to accumulate a small operating fund, a schedule of reduced connection fees has been established.

The connection fee after August 1, 1958, shall be \$90 for standard four-inch service. The fee is due and payable when connection is made, and the fee may be reduced by payment in advance as follows: \$70 if paid by April 1, 1958, or \$75 if paid between April 1, 1958 and June 1, 1958, or \$80 if paid between June 1, 1958 and August 1, 1958. No reduced advanced payments will be allowed after August 1, 1958.

Directors of the district announced that it is planned to start the first phases of construction in April of this year, and to have 50 per cent of the construction completed by the end of 1958. The remaining construction is scheduled for completion by June of 1959.

The temporary office of the district is located at 2900 South Sixth Street, and persons wishing to take advantage of the reduced connection fee by paying in advance may mail it to the above address or leave it there in person.

Copies by Oregon state law, required by the approved ordinance are posted in at least three public places within the district. Postings are at the Oregon Food Store on South Sixth at Gary; Schiffman's Market at the intersection of Altamont and Laverne; and at the Shasta View Grocery on the corner of Shasta Way and Summers Lane. The new ordinance, in its entirety, will be published in the Tuesday, February 11, issue of the Herald and News.

President To Seek

(Continued from Page One)

satellite into orbit. The latest attempt fizzled early Wednesday when the rocket faltered and was destroyed after a successful launching.

Eisenhower was asked whether any consideration is being given to ordering the Air Force into the scientific satellite program, in addition to the Army, in view of the two Vanguard failures.

He made no direct reply. He said only that all outer space projects in the Defense Department are to be handled under the direction of Secretary of Defense McElroy at this time.

TARIFFS — A reporter told Eisenhower that in some quarters he is regarded as a high protectionist tariff man, and that the Tariff Commission has been packed by the President with such protectionist advocates.

Eisenhower replied he has never knowingly appointed a high protectionist.

EDUCATION — Told there have been some complaints that his education program is insufficient to meet the country's needs, and that once again it has been tied up with a segregation issue, Eisenhower said he had not heard about the introduction of the segregation issue. He said it distressed him.

DISABILITY — Eisenhower was asked about a statement from Allyn Gen. Rogers that Rogers would recommend a veto of any plan to take care of a presidential disability situation through creation of a commission controlled by the legislative branch.

Eisenhower replied that he favors anything that will do the job while keeping separate the powers of Congress and the executive branch.

STATEHOOD — Eisenhower said he has called in his last three state-of-the-Union messages for statehood for both Hawaii and Alaska. In response to a question, he said he favors having Congress act simultaneously on statehood for both territories.

Oregon Weather

Western Oregon—Cloudy through Thursday with occasional showers. Highs 48-58; low Wednesday night 35-45. Coastal winds southeasterly to southwesterly, 10-20 m.p.h.

Eastern Oregon—Partly cloudy Wednesday night; some showers and cooler Thursday. Highs 40-52; low Wednesday night 22-34.

Grants Pass and vicinity—Considerable cloudiness with occasional showers through Thursday. Highs 53-58; low Wednesday night 35-40.

Baker and vicinity—Partial clearing Wednesday night and Thursday.

Northern Oregon beaches—Cloudy Wednesday night with some clearing Thursday afternoon. Beach winds variable southerly, 10-20 m.p.h.
