Small space, big kitchen

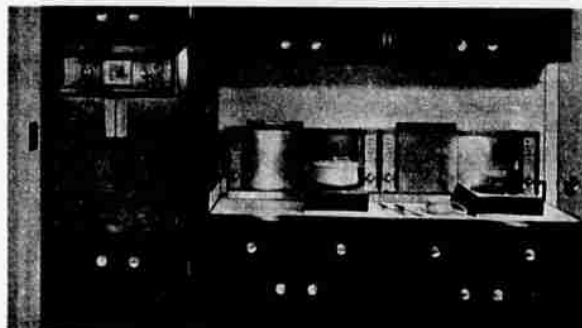

1. Fabric designed by Frank Lloyd Wright is laminated to table top.

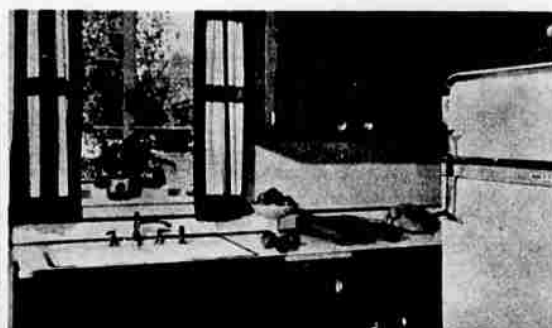

NEW EQUIPMENT and ideas help make this country-house kitchen a homemaker's dream come true. It's easy to keep up, and the step-saving layout conserves time and energy.

Stained a dark toast color, the pine cabinets hide finger marks and can be cleaned with a damp cloth. White Formica counters are simple to wipe off, too, and hold hot dishes without scarring. The floor is covered with slow-to-soil marbled linoleum in black and white. Behind eye-catching appearance, the plan is for efficiency and space utilization. For example, when not in use, the electric hot plates fold up against the wall, leaving the counter free for serving purposes. Even a short wall space is put to work by a narrow table that serves small meals. And for convenience, the big door of the electric wall oven opens sideways from the center. Although small in size, this kitchen provides all the advantages of a larger one.
