Product of the Science of Nutritional Research

OLAFSEN OLA BASIC
Vitamin and Mineral
FOOD SUPPLEMENT
with Alfalfa, Watercress and Parsley

How old-fashioned nutritional aid that goes beyond standard formulas to bring new and positive awareness of better maintenance for better health.

COMPARE THE FORMULA...
Ola-Basic gives you 20 vitamins—including more than normal daily requirements of every vitamin known to be essential to health.
Ola-Basic gives you 20 minerals (including 10 essential minerals) which are essential to normal and efficient vitamin functions of the body.

Why A Multiple Vitamin Formula Rather Than Single Vitamins?
The difference is important! Vitamins are like links in a chain of reactions which convert food into fuel that the body can use. Since a chain is only as strong as its weakest link, it makes little sense to strengthen a few links if other important links remain weak or broken. In the same way, you need a full complement of vitamins (and minerals) for the best possible use of your food. If you take even a single vitamin day after day, you develop a "weak link," setting up a chain reaction which can undermine health.
