Tricycle Rider
Drowns Postman
BROCKTON, Mass. (AP)—Letter carriers defy rain, snow, dark of night and even dogs... but a 4-year-old girl on a tricycle stopped a carrier.
The one girl - power tricycle crashed into Samuel Siciliano, 40, as he made his rounds.
Siciliano was upended and required hospital treatment for a cut over his left eye.
The little girl—unidentified—escaped uninjured.

Tax Cut Would Give Average Worker \$2-3 More A Week

WASHINGTON (AP)—An income tax cut of the sort now under consideration in Congress would add an extra \$2 to \$3 to the weekly pay check of the average American breadwinner.
In the aggregate, it would mean

the quick addition of an estimated five billion dollars of new consumer buying power.
This immediate release of new buying power is the primary goal of tax planners seeking a quick antirecession stimulant.

Whether a tax cut actually will be attempted, and when, have not yet been decided. It is one of several things under study.
Congressional tax experts say that any tax cut would be reflected immediately in the form of fatter employe paychecks because

of lower tax withholdings.
Self-employed individuals, who pay their taxes quarterly, would be able to give themselves a tax credit equal to the percentage cut when mailing their next quarterly tax installment.

The greatest impact of an overall individual income tax cut would be on the low and middle income taxpayer, who make up the majority of the nation's 48 million individual taxpayers.
The plan under serious consideration by House leaders would

cut from 20 per cent to 15 per cent the tax on the first \$1,000 of taxable income — in effect a 25 per cent cut there. A 5 per cent cut would be provided in all other personal income tax rates.
If enacted, this cut would mean another \$2 of weekly spendable income for the average married taxpayer with two dependents who earns \$5,000 a year.
For the taxpayer in the \$10,000 income bracket, the tax saving is estimated in the neighborhood of \$3 a week.
