

MR. AND MRS. WILLIAM GANONG JR. (Bill and Betty), both belong to a Great Books discussion group — but to them, any book discussion is "great." National Library Week will find them still unpacking and putting away books they brought from their former home on Eldorado to the new address, 450 Laguna. Bookshelves are found throughout the house — and there is one room (not the one pictured) with a 16 foot wall of bookshelves from floor to ceiling. Polly, the only daughter and oldest child, will be 8 on May 9; Guy, seated at the left, was 4 on January 8; and Billy, right, will be 6 on May 19. Polly's in the second grade

at Roosevelt. . . "She can READ!" A pleasant moment in the job of moving from Eldorado to Laguna was when Bill found his favorite childhood books. Some of them had been his father's favorites when he was a child, and now they will be read by or read to a third generation of Ganong book fans. National Library Week will have a special significance to this family of five — the senior Mrs. Ganong was Mildred Oleson, Klamath County librarian in 1927. She was the first trained Klamath County librarian, and established the first "Library Van" — which has grown into the present Bookmobile. —Photo by Don Kettler

THE QUIET HOUR . . . a comfortable interlude of pleasant serenity in a bustling household . . . is most easily achieved through a varied and interesting selection of books.

The next seven days will be observed as National Library Week throughout this country . . . but it so happens that the Howie family pictured above, at their home, 405 High Street, value books as good friends. And like good friends they enjoy them often and seek their rewarding companionships during all the weeks of the year.

Mel Howie and his wife, Penny, are shown with their three daughters, all of whom share their parent's interest in reading. The books shown here and many others on shelves elsewhere in the roomy home are an integral part of the household. However, they borrow books from the public libraries and the two older girls bring books home from school libraries.

Vicki, at the left, will be 15 on April 24. She is a freshman at KUHS, taking "library" as one of her subjects. She is a member of the KU Library Club. As a student in library, she's getting practical experience through daily routine work in the high school library. There is a separate crew of about eight to 10 assigned to each of the six school-day periods . . . and all are under the supervision of Roy Tidwell, school librarian and his assistant, Marilou O'Connor.

Penny Lynn, standing by the bookshelves, will be 12 on June 6. Right now she's a sixth grader at Fairview looking ahead to "being in Library Club."
