MIKE CLARK  
Honor Student

### Lakeview School Names Class Leaders

LAKEVIEW — Valedictorian for the 1958 graduating class of the Lakeview High School will be Janis Stephens Heard. Her name will be placed on the scholarship cup for the top girl student in the class, according to an announcement by Delbert Milholland, principal. Salutatorian will be

Glenda Snow Huff, Mike Clark as top student for the boys, will also have his name on the scholarship cup. Competition was held in grade point averages for the top 11 of the class of 78 graduates. They were listed as follows: Janis Heard, 3.74; Glenda Huff, 3.63; Starla Trippett, 3.61; Barbara

Freeman, 3.56; Gayle Jones, 3.46; Carol Kubat, 3.46; Mike Clark, 3.41; Marvin Tyler, 3.40; Mary Jo Augustine, 3.38; Cathy Olson, 3.33; and Pat Sullivan, 3.33. Baccalaureate is scheduled for 8 p.m., June 1, in the high school auditorium, and commencement on June 2, at 8 p.m. in the Arthur D. Hay School.

### AF Scientists Describe Space Satellite Project

LOS ANGELES (UP) — Six types of unmanned moon missions, including establishment of "space buoys" which would float at anchor in earth-moon space, were described today by scientists of Air Force project RAND. In Air Force feasibility studies, researchers have "shot" the forthcoming lunar probes hundreds of times on giant computers. They say the first successful probe may be a "boomerang" shot around the moon rather than one which hits the moon. Such a circumlunar flight is basically easier and could reveal more data than one which destroyed itself by crashing on the moon. Spokesmen at the Air Force Ballistic Missile Division here refused to reveal which mission the first probe will attempt. But they said it will be one of the three simplest described by RAND Corp. scientists. Dr. R. W. Buchheim, study project leader, and Hans A. Lies-

ke, trajectory expert, list the three simplest missions as: — A shot to escape from the earth-moon system. — A circumlunar flight. — One which hits the moon. The escape mission is listed as the easiest. Even if a probe missed the moon by thousands of miles, it could reveal much vital data. The possibility of an unplanned escape exists for all of the other missions. It is easier for an object to escape the earth-moon system by being shot toward the moon than in any other direction. Furthermore, all of the probes must be shot at speeds approaching that necessary to escape from

the system — around 33,000 feet per second. The moon's pull can help a rocket escape, but it also can capture one which passes at a low enough speed. A probe could miss the moon by less than 400 miles and escape, while a less speedy shot could miss by a greater distance but still be pulled to crash on the moon. A "simple" circumlunar flight is listed second in order of difficulty. This would be a probe which would be returned only to the general vicinity of earth. If a probe vehicle is to be returned to a specific area, such as over the United States, the mission becomes vastly more complicated. Third most difficult is a hit on

the visible face of the moon. Scientists could hit the moon without knowing it since a near-miss shot could be pulled to crash on the far side of the moon which is never seen by earth. When these probes are accomplished, scientists will try the tougher ones requiring greater accuracy and more complicated vehicles which must use decelerating rockets at destination.

Sunday Services - 11 a.m.

I wish to thank all my friends and neighbors who supported my campaign for nomination as County Commissioner. I fully realize the responsibility attached to that nomination, and will do my best to merit your confidence in me this fall. I also wish to commend the other candidates of both parties for a clean, friendly campaign all around. "Have car, will travel" for a bigger and better Klamath County.

### Home Winners Awards Set

Prize winners of the annual Klamath Union High School model home contest, which has been sponsored by the Klamath Board of Realtors since its inception 12 years ago, will be honored at an award banquet to be held Wednesday evening at the Willard Hotel. Winners and their parents will be guests of the Board of Realtors, according to Realtor George Overmire, contest committee chairman. Over 80 students competed in three divisions: A model home building contest, an essay contest on "Why I Should Own My Own Home," and a mechanical drawing contest on home construction. Phyllis Crabtree was the first place winner in the model home division, Barbara Overen, second, Peggy Summer, third, and Brian Jacobs, fourth. Gaining honorable mention were Donna Burgoyne and Bob Faulkner.

### KF Boy Takes DeMolay Post

At the state DeMolay convocation at Seaside on May 8, 9 and 10, Orrin Ormsbee, son of Mr. and Mrs. Cecil Ormsbee, 906 North Sixth Street, was elected as state deputy master counselor. A graduate of Klamath Union High School in 1957, he is finishing his freshman year at Willamette University at Salem. He is working toward his degree in law. As state deputy master counselor, he will be in charge of the winter workshop for Oregon in the coming year. Last year he was master counselor of the Klamath Chapter of DeMolay which position is now filled by Hugh M. Swaney Jr. Eighteen members of the Klamath Chapter attended the convocation at Seaside. Total attendance exceeded 600 Oregon DeMolay members.

### Supervisors Okay Budget

YREKA — The 1958-1959 Siskiyou County budget of \$4,658,971 was adopted by the Siskiyou County supervisors at their last meeting on May 13. This is \$344,465 less than the amount for the now-ending fiscal year.

The decrease was partly the result of a cutback in the county road department because of the reduced U.S. Forest Service timber revenue. Also the board pointed out the probability of a \$3,000 savings in the operation of the Tulelake farm adviser's office. Supervisor Earl Ager of Tulelake says that he has been notified by the University of California Extension Service that no other funds will be available to provide an additional farm adviser for the Tulelake area. The board also tentatively approved the following recommendations made by Supervisor W. A. Barr, relative to changes to be made in the county employe salary ordinance:

- A change which would allow employes to retain seniority although laid off, providing for discharge in order of reverse seniority and rehiring in seniority order. (The ordinance would have cancelled the seniority of any employe absent more than 90 days within any 12 month period.)
- Increase the trial period for new employes from 10 to 30 days.
- Give the board authority to suspend the salary step increases for reasons other than lack of funds.
- Change the ordinance to allow department heads to recommend salary increase for employes without the approval of the county administrator.

### Police, Firemen Stage Benefit

YREKA — The softball game of the season will be staged at the Yreka City Park, when the Yreka Volunteer Fire Department meets the Siskiyou County Law Enforcement team on Wednesday evening, May 21 at 7:30.

Proceeds from the game will be contributed to the American Field Service program, to be used to help an American Field Service foreign student again attend Yreka High School. A family in Yreka has already volunteered to take a student into its home, and the AFS has confirmed the availability of such a student. Yreka residents are asked to raise the needed monies to make the student's trip possible. In order that the exchange program continue, the town of Yreka is responsible for 60 per cent of the student's expense money. This year's student is to come from Austria. Arrangements for entertainment, along with the ball game, have been made by Keith Vidler, who is in charge of the affair.

### Local Road Work Listed

Oregon State Highway Engineer W. C. Williams has announced a group of highway projects for this area. Contracts for each job not yet let are expected to be let between now and October 31. Here is a list of the projects, some of which are under way, with months in which they are or were expected to be contracted to contractors: Klamath Falls bypass section, The Dalles - California Highway; grading and structures, July, \$1,200,000. Crescent Lake Junction-The Dalles - California Highway, Wilamette Highway, Klamath County, 3.3 miles of paving; to have been awarded in March, \$310,000. Chiloquin, miscellaneous paving, \$16,000. Drews Creek-Forest Boundary, Klamath Falls - Lakeview Highway, Lake County, 13 miles of re-rolling, April, \$38,000. The following are rock production projects: Klamath Falls - Malin Highway, Klamath County, March-June, \$28,000. The Dalles-California Highway, Klamath County, March-June, \$21,000. Green Springs Highway, Klamath County, March-June, \$10,000. Lower Klamath Highway, Klamath County, March-June, \$10,000.

### Senate Group Okays Tests

WASHINGTON (AP) — A Senate-Atomic Energy subcommittee has given preliminary approval to an expansion of experiments to determine how atomic heat affects plastics and rubber. If successful, the experiments could lead to improved plastics and rubber products. The subcommittee is studying the Atomic Energy Commission's request for construction projects totaling \$183,379,000 in the year beginning July 1. The plastics and rubber project would cost \$1,600,000.
