SCRAMBLED EGGS

Scramble eggs over low heat. For a one-dish meal, add crumbled cooked bacon, chopped green onions, tops and all, and just before serving add quartered, peeled raw tomatoes.

If your little girl has protruding ears, take the trouble to dress her hair in such a way that they will be hidden. You'll save her the humiliation of being teased by her friends and, at the same time, teach her one step toward making the most of her looks.

Home Economics Not Just Cooking And Housework

Home economics is still considered a top priority subject for a girl's space age education despite all the recent emphasis placed on science and technology.

In fact, Miss Edna Amidon, chief of the Home Economics Branch of the U.S. Department of Health, Education and Welfare, believes that learning how to run a home is one of the most important challenges that women face today.

"Because of the tension, uncertainty and rapidity of change in the world the home has become more important than ever before," Miss Amidon declares.

"If it is to be a place where the family can talk over their problems and get help from one another in solving them," she explains, "a home must have warmth, order and real opportunity for enjoyment."

That's why the gray-haired, enthusiastic official believes the modern method of teaching home economics is invaluable in helping to maintain a happy family life.

Miss Amidon says that in the old days home economics classes usually emphasized just cooking and sewing. Now, however, the course often combines subjects ranging from kitchen techniques to psychology.

"Today as we've never done before," Miss Amidon says, "we try to integrate the study of all activities of the home." A housewife's ability to understand the needs of each member of her family is an invaluable aid in coping with household problems, she says.

Today home economics courses help prepare future working mothers for the task of raising a family and holding down a job at the same time.

They give pointers on how to keep everyone happy when grandma or grandpa comes to live in the home. Tips to help high school or college-age newlyweds establish a successful marriage are included.

In addition, students learn such things as child development, home decoration, how to determine the best buys in clothes and the complicated facts of nutrition. And they still learn how to cook and sew.

Miss Amidon taught in a Minnesota high school, the University of Minnesota and the University of Missouri before coming to Washington in 1929. She has been in charge of the Office of Education's Home Economics Branch since 1938.

When one's not helping to guide the success of thousands of young future homemakers, Miss Amidon can usually be found working in her garden which is her favorite hobby. She's especially proud of her luscious crop of strawberries.

The gifted home economics teacher privately admits, however, that she doesn't particularly enjoy cooking. But she explains that she loves to clean house.

CLEAR SOUPS

Just before serving consommés or other clear soups, add 1 tablespoon sherry or other wine. It makes a great deal of difference.

Acting rude or impatient to a slow or inefficient clerk or waitress or anyone else who serves you doesn't improve your chances of transacting your business quickly. All that it does is create an unpleasant atmosphere. So restrain your impatience and prove that you also have a pleasant disposition.
