Presley Ends His Training

FORT HOOD, Tex. (UPI)—Pvt. Elvis Presley, the hip-shaking rock 'n' roll singer finished his basic training at Fort Hood Saturday and slipped away at 6 a.m. on a two-week furlough.

Presley and the other 219 men in Company A of the First Medium Tank Battalion of the 37th Armored Regiment were not supposed to complete their basic training and get their furlough papers until 11 a.m.

But a public relations officer said Presley and the others got loose five hours early because a training schedule sometimes is changed on "battalion or company level." He said he did not find out about it until Presley was gone.

A man who trained with Presley left at 1 a.m. by automobile for Memphis.

But Capt. L. B. Mattingly of the Fort Hood Public Information Office said he had re-checked with Presley's company and this could not be the case.

"In fact, there is a local regulation that precludes personnel departing between midnight and 6 a.m.," Mattingly said.

The reason the schedule was changed was because of this: the outgoing number of trainees this time was too small to warrant the putting on of chartered transportation by buses and airlines.

"Because of this, they authorized the trainees to start any time after 6 a.m. so they could take maximum advantage of regular carriers."

"I can testify that this deal was not set up for him—absolutely not."

Mattingly said the Army is pleased with Presley.

"His personal conduct, his attitude toward his training is outstanding," Mattingly said. "He is a good soldier. We have had no problems from his end. The only problem is his following of fans."

He said Presley is on a shipping list of 879 trainees for Germany on Sept. 20.

Money for many things," Mrs. Anderson says. "Savings bonds, as a direct investment in our country, make each of us a partner in the job of strengthening America's Peace Power. Every American can help keep the peace by regularly buying and holding United States Savings Bonds. Are you buying all you might?" The treasury's goal of \$4.7 billion in savings bonds this year represents an investment of almost \$28 for each man, woman, and child.

THE ONE TRUE NATIONAL ADVERTISING MEDIUM

IS THE DAILY NEWSPAPER . . . because 88% of America's families get a newspaper every day. That's national coverage!

Over 100 million people read a newspaper on an average day. Every one of these readers has the opportunity to see every advertisement in the newspaper. Only a few of these people can be reached by any radio, television or magazine message.

Unlike television and radio, newspaper advertising is always ready and waiting to suit the time, place and convenience of the consumer. The newspaper is always selling — and always selling to more people than any other medium.

If you want to sell more products to more people, use the daily newspaper — the one true national advertising medium.
