

MAJOR LEAGUE SHINER — Bruce Grissom, 8 1/2-year-old son of Giants' relief pitcher Marv Grissom, proudly displays his black eye at his San Mateo, California, home June 10. Bruce was hit on the bridge of his nose with a line drive foul off the bat of Giants' outfielder Hank Sauer in ninth inning of San Francisco-Cincinnati game in San Francisco last Sunday. He was released from hospital Tuesday, June 10 after two days of treatment. —AP Wirephoto

Socialite Admits She Is Heart Interest Of Famed 'Ivy League' Burglar

SAN FRANCISCO (UPI) — A blonde divorcee, member of a socially prominent San Francisco family, admitted today she was the "heart interest" of Charles Visokay, the Ivy League burglar. Mrs. Renel Dinneen Tron, 23, said it was "positively devastating to learn that he had burglarized the houses of friends of mine." Mrs. Tron said she first met Visokay, 29, a former Yale student, at a cocktail party last fall. She said they had become "very fond" of one another. "I was very fond of him and he of me," she said. "I imagine I was considered his heart interest." She pointedly refused to discuss whether she and Visokay planned to marry. She said there was no engagement. Mrs. Tron said she had never heard of 22-year-old Jeanne Sansom of Oakland, who claimed she had been a girl friend of Visokay's until she read of her in the papers. She said she and "Chuck," as she called Visokay, went out two or three times a week to social affairs at the homes of her friends. "To my knowledge, he burglarized only one house to which I had taken him," she said. "I was very embarrassed over it." Mrs. Tron was married in August, 1954, to Georges Francois Tron in a glittering society wedding. The couple went to Mexico City to live. She divorced him there last summer. She has a young daughter by that marriage. Visokay was arrested recently and admitted taking more than \$100,000 worth of loot from at least 16 homes in the exclusive Pacific Heights and Presidio Heights districts. Police recovered much of the loot in his apartment.

FLATTENED BY TORNADO, this was the scene of devastation after a tornado leveled homes at El Dorado, Kansas, late Tuesday, June 10. In the right background is the Skelly Elementary School, near center of damaged area. At least 13 persons were killed and 49 injured. —AP Wirephoto

Wage Figure Going Up

WASHINGTON (AP)—The first upswing in wage payments since the recession began last August is reported by the Commerce Department. The department said Wednesday that the nation's personal income rate increased by \$1,200,000,000 on a yearly basis during May. This boosted the total annual rate to \$344,300,000,000—off three billion dollars from the peak rate of last August. Part of the gain was attributed to an increase in federal and state payments, such as unemployment compensation, social security benefits and relief grants. They rose by 400 million dollars. At the same time, wages and salaries which had been slipping continuously since last summer rose by 700 million dollars on an annual basis after allowance for the season pickup in outdoor work.

Yacht May Go To Bomb Area

HONOLULU (UPI) — The 50-foot yacht Phoenix sailed today for Japan under a skipper who hinted he will enter the forbidden nuclear testing area near Eniwetok. The Coast Guard made no effort to stop the Japanese-built ketch as she left Ala Wai harbor Wednesday night with skipper Earle Reynolds, 46, his wife, their two children and a Japanese from Hiroshima. Federal authorities said earlier that the slow sailing ketch will not arrive in the vicinity of the Marshall Islands for at least a month. By then, the nuclear tests will have been completed. Reynolds did not say he would definitely set sail for the test area. But he told newsmen he would sail for the high seas, traveling southwest to the latitude of Eniwetok, and then westward. Reynolds, a former professor at Antioch College in Ohio, has been a steady supporter of five Pacific crewmen of the yacht, Golden Rule. The five are now serving 90-day sentences for defying a federal court order forbidding them to sail.

2 Children Die In Old Icebox

VENICE, Ill. (AP) — A seven-hour search for two children ended Thursday with the discovery of their bodies in an abandoned refrigerator. Police said Bobby Lee Loving, 7, and Sandra Waggoner, 5, died of suffocation, adding the youngsters apparently crawled into the refrigerator while playing. The door apparently locked, sealing the playmates inside. The refrigerator was under the porch of Sandra's home. The children were found by Bobby Lee's mother, Mrs. Leroy Loving.

Firm Calls Off Try At Record

LOCK HAVEN, Pa. (AP) — Officials of the Piper Aircraft Co. have cancelled plans to try to break a light plane record in a flight from Denver to Brussels. Max Conrad of Winona, Minn., was scheduled to make the flight in a new-type Piper plane, the Comanche. The record try was planned as part of a trip to Palermo, Italy. Piper officials said European distributors had arranged for the new plane to be delivered to Palermo for an air show June 23. The record try was cancelled after the European distributors objected, they added.

Protest Filed Against Power Line Building

PORTLAND (AP)—The Northwest Public Power Assn. is protesting an Idaho Power Co. plan to build a seven million dollar transmission line from Brownlee Dam to Lewiston. The association said an informal protest had been filed with the Federal Power Commission, the agency which licensed Idaho Power to build the low dam in the Hells Canyon reach of the Snake River. The public power group said construction of such a transmission line would violate terms of the license. These terms, Northwest said, require that transmission lines be coordinated with existing facilities in the region. Studies made by the Idaho Power Co. and the Bonneville Power Administration show that a shorter and more economic line to La Grande, Ore., would be the best means of connecting to the existing facilities, Northwest said. "The construction of duplicative and wasteful transmission lines is contrary to sound utility economics and utility regulation and is contrary to the public interest," said Gus Norwood, executive secretary of Northwest Public Power. The association said that the IPC line, as planned, would inflate the cost of power. Norwood said a similar complaint last year by the association forced Pacific Power and Light Co. to abandon a plan to build a duplicative line from the Swift project on the Lewis River to Troutdale, Ore. Instead the line was tied into the federal system at Woodland, Wash., he said.

No Light, No Flight; When Green He's Been

KODIAK, Alaska (AP) — The Kodiak postal service got a light touch this week in a manner not covered by any postal manual, but if it were it might read like this: No light. No flight. When green, He's been. When red, He's abed. That's because lights were installed on poles located across the side street from the post office. They can be seen the full length of Main Street, out Mission Road and to the Russian Church. When the air mail arrives at this North Pacific island, a green light goes on. When it has been distributed to the proper post boxes, the red light beams and residents can head for the post office. If the mail plane cancels or is late — no lights, no mail, no trek. The installation was done with voluntary labor of Kodiak residents — at no cost to the government.

Approval For Tax Extension Bill Forecast

WASHINGTON (AP)—President Eisenhower's bill to extend present corporation and federal excise tax rates for another year comes up for expected approval today in the Senate Finance Committee. Chairman Harry F. Byrd (D-Va.) said in advance of the closed-door meeting he expected the committee to approve the bill, probably without any taxcutting amendments, after hearing testimony from top administration fiscal officials. There is strong support in the Senate for an amendment to the bill to repeal the 3 per cent excise levy on freight and the 10 per cent tax on passenger travel. But Sen. George A. Smathers (D-Fla.), a principal backer of this amendment and a committee member, said the effort to attach it to the measure might be deferred until the bill reaches the Senate floor. Sen. Paul H. Douglas (D-Ill.), a member of the committee, planned to offer a proposal for a six-billion-dollar antirecession tax cut as an amendment to the extension bill at the meeting. He proposes cuts in income, small business, various excise and other taxes as part of a package. Similar moves by Douglas have been rejected in the committee previously this year. The bill would continue the corporation income tax rate of 52 per cent instead of permitting it to drop to 47 per cent July 1. It also would continue present rates on some of the most productive excises — those on liquor, beer, wine, cigarettes, passenger cars, and auto parts and accessories.

Fishermen To Get Red Carpet On Repeat Try

PLAINVIEW, Tex. (AP) — Those couples who met recently with the proverbial fishermen's luck of wet posteriors and empty stomachs are going to live it up the weekend of June 20-22. The Bo Englands and Maxwell Stones, whose trip to Lake Brownwood resulted in a series of well-publicized misfortunes, will return as guests of the Brownwood Chamber of Commerce. That organization promised them air conditioned cabins, use of new motorboats and fishing tackle, steak dinners, two small boys to bait hooks and four larger boys to remove fish from lines. Their escort will be the patrolmen who stopped them for lacking a license plate. Their cars will be serviced before they leave. On their May trip, the couples ruined a new tire and had five flats, the bumper pulled off their car, the trailer rolled into the lake, and the boat sank in 30 feet of water. The highway patrol stopped them for not having a rear license plate. It was on the bumper torn off by the trailer, wind and rain blew down their tent and soaked their belongings and England caught pneumonia. They caught no fish—didn't even get a bite.

Champ Steer Brings \$574

THE DALLES (AP)—The grand champion steer at the 4-H and Future Farmers of America fat stock show brought \$574. The Hereford was purchased by Paul Muller of The Dalles from Mike Thorne of Pendleton. The show is sponsored by the Oregon Wheat League. The grand champion 4-H steer, a 1,100 pound Hereford, was purchased by Mrs. Marshall Nelson of The Dalles from Mike Wagenblast of The Dalles. It brought 48 cents a pound. The top FFA sheep, a 114-pounder, raised by Mark Rostvold of Molalla, was bought by The Dalles Television Co. for 60 cents a pound. The champion 4-H sheep brought 90 cents a pound. It was bought by the Moro Grain Growers from Jean Ross of Moro. Swift and Co. paid 48 cents for the champion FFA hog owned by Jerry Harms of Canby, and the top 4-H hog brought 46 1/2 cents a pound to Nancy Farrell of John Day. She sold it to Winks Yards of Hermiston. James Madison Randolph, grandson of President Thomas Jefferson, was the first child born in the White House.

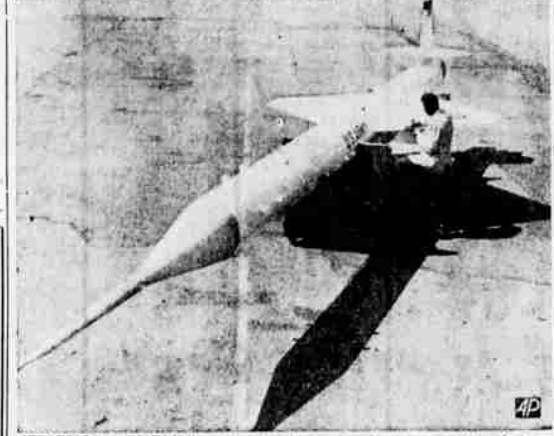

Hermiston To Cut Services

HERMISTON (AP)—Hermiston will cut its municipal services drastically June 30 because voters for a second time have rejected a proposed city budget. That was the announcement of the City Council after a 293-291 rejection at the polls this week. The first rejection was 281-86 in early May. Mayor Frank Wells said all employees of the street department and all but two of the seven men on the police force will be laid off. In addition there will be no funds to operate the cemetery, the city park, the city recreation center and the airport, he said. The airport has some income of its own, and the operator said he would stay in business. The water, sewer and irrigation departments also will continue normal operations, but the number of men answering fire calls will be limited, officials said, adding that no rural fire calls will be answered. City Atty. E. W. Barnes said the voter rejection means the city will have to operate within the 6 per cent limitation until another election and the first possible date for an election will be July 14. The proposed budget was \$325,053, of which \$17,177 was in the 6 per cent limitation.

Fire Wipes Out Airman's Family

ALBANY, Ga. (AP) — A garage apartment fire wiped out a U.S. airman's family of five early Thursday. Dead are Mrs. Barbara Chapman, 27, wife of T. Sgt. W. E. Chapman, three small daughters and a son — Karen, 5; Sharen, 4; Billy, 2; and Susan, 11 months. Chapman is stationed in Germany. Officials at Turner Air Force Base at once began arrangements to fly him here. Mrs. Chapman and the children only recently had come to visit her parents, Mr. and Mrs. Mack Wood. They were living in an apartment above the garage at the brick home of the Woods.

'FRIENDLY ENEMY', a technician checks over a Kingfisher supersonic guided missile which the Army June 10 awarded the Lockheed Missile Systems Division at Sunnydale, California, a 7 1/2 million dollar contract to build. The Kingfisher is used to simulate an enemy air attacker and tests the accuracy and destructive power of the nation's interceptor missiles. Equipped with a firing error indicator, it is able to record theoretical hits and near misses without itself being destroyed. Another feature is that it is recoverable by means of parachutes and nose spike so that it can be flown repeatedly. The target missile is capable of traveling at more than twice the speed of sound. —AP Wirephoto
