

SOME LUCKY FAMILY will have this Deluxe Glasspar 14-foot Sport Lido boat, powered with a Scott-Atwater motor and a new Boat Tota trailer which are being given by the Town and Country Merchants Association.

Cafe Operators Sell Business

YREKA—Lyman and Bess Waters, who have owned and operated the L & B Cafe in Yreka for several years, recently sold the business to Louis and Aida Muzium, who have also purchased the Y Motel, which they will operate in connection with the cafe.

TV Plagued With Button Pushers States Producer

NEW YORK (AP)—Television, says producer Paul Gregory, needs to get rid of its "hysterical button pushers."

eral years of such TV specials as "The Caine Mutiny Court Martial," "The Day Lincoln Was Shot," "Three for Tonight" and "Crescendo," Gregory is tentatively contemplating a spectacle for late fall about the greats of film-land.

Cohorts Hit By Professor

PORTLAND, Ore. (AP) — College professors are largely responsible, a college professor says, for a shortage of competent engineering faculties in U.S. universities.

McKee is a sanitary engineering professor at California Institute of Technology.

McKee said bright students should be enticed by the subject matter to become teachers.

He added that engineering teachers generally earn good salaries and outside income is easy for them to obtain.

How Important Is Age Of Business

NEW YORK (UPI)—Business experts are devoting considerable study to determination of whether the age of a business is important.

Allen, in a hard-hitting speech before the annual Advertising Association of the West convention at Vancouver, B. C., told the audience present that "fifteen years from today one-third of your clients may be out of business."

longer confined to that narrow definition of moving goods or services from the factory to the customer.

Dag Said Chief Hope For Averting Lebanon Crisis

By CHARLES M. McCANN UPI Foreign News Analyst

The chief hope of heading off a threatened international crisis over Lebanon rests with United Nations Secretary General Dag Hammarskjold.

Nasser denies that the UAR is sending any aid. He may not be carrying any personally across the border and there are even suggestions that the Syrians are going farther than he wants them to.

Within the next 10 to 15 years the majority of Americans will live in 18 or 20 super cities.

Yacht Party Plans Change

HOLLYWOOD (UPI) — Free-spending Rafael Trujillo Jr., 29-year-old Dominican Republic general, has given up plans for a party on his personal "man of war" in favor of a luxurious hotel soiree.

Scene of the celebration, expected to draw some of the island's top figures, was switched without explanation Wednesday from the 250-foot Angelita riding at San Pedro in Los Angeles harbor.

But, one fact now appeared certain. The generous general's blonde friend, actress Zsa Zsa Gabor, would be the hostess at the party July 8 at the Beverly Hilton Hotel.

Zsa Zsa's invitations to an exclusive list of 150 celebrities read: "I would like to invite you to attend a party in honor of my dear friend, his excellency Gen. Rafael Trujillo Jr. at O'Escotter of the Beverly Hilton at 8:30 o'clock, Black tie."

Vanguard Rocket Plunges To Earth Again After Test

CAPE CANAVERAL, Fla. (AP) — Another "basketball" satellite was boosted into space by a Vanguard rocket today. Then, like its two predecessors, the 20-inch, 21½-pound sphere plunged back to earth.

This engine, the company said, will generate from 500,000 to a million pounds of thrust. This compares with 45,000 pounds for the Vanguard.

Failure of the Vanguard's second stage to ignite was blamed by the Naval Research Laboratory.

Components of the engine now are being tested by the GE rocket engine section at Malta, N.Y. It will be powered by liquid oxygen and kerosene, the same fuels used in the first stage of the Vanguard.

The 72-foot Navy rocket now has failed in five of its six tries. Its only success was chalked up March 17, when it launched the 2½-pound "grapefruit" satellite, the first of the man-made moons circling the earth.

For their entire senior year, these two grappled with the poster. They came up with a 78-page paper, complete with formulae, graphs and a slew of higher mathematics.

Immediately in the wake of this latest failure came news from General Electric Co. that it is developing a new rocket engine capable of launching a satellite weighing as much as 20,000 pounds—almost seven times bigger than the Soviet Sputnik III.

A brief abstract of their findings tells you that coffee cools faster if the drinker waits a little while to pour in the milk or cream.

Half an hour later, the Navy announced that the second stage, which houses the whole guidance "brain" of the rocket, did not ignite and so it did not achieve the necessary 200-mile altitude and the 18,000-mile-an-hour velocity required to put its satellite into orbit.

The students found, under laboratory conditions, that a cup of coffee takes 425 seconds to cool off enough to drink, if the milk or cream is put in at once.

Records are now being examined to determine the cause of the malfunction," said the Navy.

Lunt played yesterday's matinee of the Broadway play "The Visit" in which he is costarred with his wife Lynn Fontanne.

The first two three-stage Vanguards blew up, one just four feet off the launching pad and the other at 20,000 feet. The third launched Vanguard I. The fourth and fifth, carrying "basketball" satellites, rushed into space but soon plunged back.

About an hour before last night's performance Lunt, 45, was sent to New York Hospital. His part was taken by understudy John Wise.

College Seniors Ponder Weighty Coffee Question

PHILADELPHIA (AP)—What's the fastest way to cool your coffee, assuming you use milk or cream?

Do you put the cream in right away, or hold off a bit? Is this academic? It was to start with. But not now.

At Cornell University, in New York State, two coffee-keen professors fell to arguing these points. Their talk was so intriguing that two seniors — Robert L. Seidel, Cresskill, N.J., and Darwin A. Novak, East St. Louis, Ill. — resolved to get at the scientific truth about it.

For their entire senior year, these two grappled with the poster. They came up with a 78-page paper, complete with formulae, graphs and a slew of higher mathematics.

A brief abstract of their findings tells you that coffee cools faster if the drinker waits a little while to pour in the milk or cream.

The students found, under laboratory conditions, that a cup of coffee takes 425 seconds to cool off enough to drink, if the milk or cream is put in at once.

If you wait 310 seconds before adding milk or cream, however, the coffee cools a minute and half faster than it does under the 1-can't-wait system.

The students conceded that to some the rapid cooling of coffee borders on sacrilege. In Britain, for example, the milk is heated before it meets the coffee. And the philosopher, in any land, stands aghast at the guzzler of diluted brew that has lost both warmth and flavor.

Doctor Sends Star To Hospital

NEW YORK (AP)—Actor Alfred Lunt, reported to have had a high fever for the past few days, was sent to a hospital last night by his physician.

Lunt played yesterday's matinee of the Broadway play "The Visit" in which he is costarred with his wife Lynn Fontanne.

About an hour before last night's performance Lunt, 45, was sent to New York Hospital. His part was taken by understudy John Wise.

"DENNIS THE MENACE"

"THE THING I HATE MOST IS... IT'S MY SHOOTIN' ARM!"

Star Expected Rough Time When He Entered Service

By BOB THOMAS

HOLLYWOOD (AP)—What happens to a celebrity in the service? Some insight on this matter is given by Pvt. Russ Tamblin, one of Hollywood's famous draftees.

"The other fellows in my platoon were a little bit in awe for a while. Some of them asked for autographs, mostly to send to their folks back home. But that wore off."

He was in town after completing his basic training at Camp Roberts, Calif. His next assignment: Ft. Sill, Okla.

Russ's latest picture, "High School Confidential," played the base while he was there. But his outfit was restricted and couldn't attend.

The oldsters that seem to stand the test of time in the standard tabulation include many banks, insurance companies, and a good sprinkling of top-notch firms in many other lines.

How did he find the Army training? "Easy," he commented, "I expected the physical part to be tough, but it was a breeze. Of course, I was in pretty good shape. I had just finished 'Tom Thumb,' in which I had to climb up walls and ascend a rope to the top of the stage."

PHILADELPHIA (AP)—What's the fastest way to cool your coffee, assuming you use milk or cream?

"The part I hated about the Army was the fact that the training is geared to the slowest learner. The instructions are drilled into you over and over until it drives you nuts. They take four or five hours to show the platoon how to do a left face."

Do you put the cream in right away, or hold off a bit? Is this academic? It was to start with. But not now.

"The part I did like was getting to know the other guys. It was a great experience, and you get to know each other really well when you're living so close together. I only wish the friendships could last, but we're all sent in different directions."

Only Checking Says Senator

WASHINGTON (AP) — Rep. Oren Harris (D-Ark.), chairman of the House subcommittee which touched off the Sherman Adams controversy, says he was only checking on a question of policy when he wrote the Federal Communications Commission recently.

Harris said yesterday when questioned about a letter last month to FCC Chairman John C. Doerfler.

Harris said he relayed to Doerfler an inquiry from B. J. Parrish of station KOTN in Pine Bluff, Ark., along with a request for a copy of the FCC's reply to Parrish and an explanation of commission policy.

There was no personal involvement, Harris said yesterday when questioned about a letter last month to FCC Chairman John C. Doerfler.

Harris said Parrish is not a constituent of his but added that since he—Harris—is head of the committee which handles general legislation on communications "I asked for policies of the commission which I think I'm entitled to."

Harris is chairman of both the House Commerce Committee and its subcommittee now checking on the government's independent regulatory agencies, such as the FCC.
