### Earthquake Jars Alaska

JUNEAU, Alaska (AP) — A sharp earthquake described by a seismologist as one of major magnitude, shook wide areas of southeastern Alaska last night but caused very little damage. There were no deaths or injuries.

Dr. Don Tocher, seismologist at the University of California at Berkeley, said the quake, which was a major one, was centered in the Gulf of Alaska.

Dr. Charles Richter of the California Institute of Technology Seismological Laboratory at Pasadena said had the quake occurred in a populated area it would have caused a disaster.

The U.S. Coast and Geodetic Survey office at Sitka, 100 miles southwest of Juneau, timed the first sharp jolt at 10:17:18 p.m. Minutes later there were two sharp aftershocks and the ground quivered off and on for hours later.

The quake sent residents of Juneau, Sitka and Petersburg, 125 miles south west of Juneau, streaming into the streets.

The Pacific Telephone and Telegraph Co.'s main Alaska communications cable was cut at Lena Point, just north of Juneau, and communications to cities north of there were temporarily cut off.

### Spain Bases Operational

MADRID, Spain (AP) — The U.S. Strategic Air Command has served notice on American taxpayers and the Kremlin that its big new complex of bases in Spain is now in full operation. The taxpayers put up almost half a billion dollars for four air bases and related facilities as part of the worldwide U. S. system to deter the Soviets by being able to deliver nuclear bombs.

A spokesman for SAC's 16th Air Force broadly implied that the B47 jet bombers now flying from Torrejon and Valenzuela air bases carry nuclear weapons. "Draw your own conclusions," he said. "They are capable of carrying atomic weapons."

The planes are part of Operation Reflex designed to keep some bombers always in the air so a surprise attack would not wipe out U.S. retaliatory strength. The spokesman said planes leave bases in the United States as if heading for enemy targets but stop at such advance bases as Torrejon unless ordered on.

The planes that cross the Atlantic on Operation Reflex remain on 24-hour alert, ready to take off on 15-minute notice, while in Spain. SAC planes around the world have been on such an alert since last year when the Soviets reportedly developed a workable ballistic missile.
