Comfort is important for a person's general outlook. And an especially hot day calls for plenty of comfort. Women who think they are cooler because they wear fewer layers of clothing actually contribute to their own warmth. An under and outer layer insulates the skin against outside heat and helps absorb perspiration.

New is a good time for you worshippers to get in shape. For women, this means working on winter-roughened thighs and perhaps, giving the back some gentle care. Backless fishbombs are more flattering if the back displayed is as pretty as possible. For a clearer skin and healthy glow, use a back brush when bathing.

The season of light, bright colors and filmy materials calls for true femininity. Encourage this by using sachets in covers holding summer garments. Also, use floral scents in drawers for lingerie to enhance the light summer feeling.

The porch season is in full swing. Here's hoping most of you cleaned wicker or bamboo furniture before using it. If you didn't, now is the time to wash the pieces. But don't soak them. Then give them a coat of shellac to keep dirt from grinding into the fibers.

Sliding across a car seat usually brings a startling jolt from static electricity. One way to check this is to insulate the inside door handles by coating them with clear shellac.
