

The Red Cross Reports

By JOY ROLPH

The 159 pints of blood collected at Merrill on June 4 plus the 251 pints gathered at the Masonic Lodge on June 5 put our community squarely on the target for its quota for the quarter, reports Mrs. Madelyn Swaney, chairman of blood program for the Klamath County chapter, who extends a "thank you" to all who gave blood, time and supplies to make this visit a rousing success.

Meanwhile, 165 pints of blood were used in June and July from the bank supply by sick and injured in the Klamath area, plus three walking donors who were called to aid a local victim of pernicious anemia.

The National Red Cross is expanding its program of blood furnished to veterans hospitals from 80,000 to 120,000 pints. To ease the strain on an over-taxed budget, federal hospitals will reimburse the Red Cross for a portion of its cost in collecting, processing and typing this blood. There is no charge to the veteran for blood. Officer Carl Jennings of the Klamath Falls Police Department has accepted the appointment of new First Aid chairman for the local chapter, according to Dick Gallagher, chapter chairman. Police Chief Charles Howard and Councilman Walter Fleet have approved Jennings' attending a National Red Cross First Aid school at Garberville, California, from August 20 to 30. This will insure the city police department an officer who is well qualified to conduct all first aid teaching for the police personnel, plus giving community leadership in an important service activity.

Within the past two months, Herbert Hadley, instructor, completed a class of four junior and five standard first aid students in Bly; Ernest Hardman, instructor, completed an advanced first aid class at Crescent. Instructors O. E. Pederson and John Quinn gave advanced first aid training to police and bus drivers in Tulelake, and John Bowdler completed a standard class for 16 Crater Lake employees. All instructors are volunteers and all first aid training is free.

Mrs. May Myers, chairman of

water safety, reports that Red Cross swimming instruction reached a new peak in Klamath County during June and July. Instructors issued 443 beginners cards, 176 intermediate, 95 swimmers, two advanced swimmers, 17 junior lifesaving, five senior lifesaving and two water safety aides. Cards issued represent only a percentage of class enrollment, according to Mrs. Myers, as instructor Carol Causey had over 50 enrolled at Crescent Lake but could give cards to only 10 swimmers.

Red Cross trained instructors are teaching at the Malin pool, Crescent Lake, Low Echo Girl Scout Camp, Camp Esther Applegate, the municipal pool, Chiloum and Twin Springs plunge. The swim program at Chiloum is a new activity for the Klamath chapter, as is the Low Echo Girl Scout Camp at Lake of the Woods.

Nancy DeMerritt of Malin will attend the National Red Cross Aquatic School at Tulelake, California, sponsored by the local chapter. Bob Bonney, director of the Klamath Falls Police Department has accepted the appointment of new First Aid chairman for the local chapter, according to Dick Gallagher, chapter chairman.

Police Chief Charles Howard and Councilman Walter Fleet have approved Jennings' attending a National Red Cross First Aid school at Garberville, California, from August 20 to 30. This will insure the city police department an officer who is well qualified to conduct all first aid teaching for the police personnel, plus giving community leadership in an important service activity.

All instructors are volunteers and all first aid training is free.

Mrs. May Myers, chairman of

ROTARY DISTRICT GOVERNOR William S. Palmer of Walnut Creek, California, reported on Rotary-sponsored student fellowships while visiting the Tulelake Rotary Club recently. Palmer, center, said five students from District 516 have attended overseas colleges since the international program began in 1947. With Palmer are C. A. Boyden, Tulelake club president, left, and Doug Thomas, club secretary.

Israel Watchful Observer Of U.N. Meet

UNITED NATIONS, N.Y. (AP)—Israel is taking the position of a watchful observer at the outset of today's U.N. emergency Assembly session on the Middle East.

But Israel has made plain to the Western powers and Secretary General Dag Hammarskjold that it cannot be ignored in any vital decisions affecting the future of its area.

Israel's delegation to the Assembly is headed by Ambassador Abba Eban. He is being assisted by Arthur Lourie, the Israeli ambassador to Canada, and Moshe Tov, adviser on Latin-American affairs at the Foreign Ministry in Tel Aviv.

Hands of President Nasser's United Arab Republic, defense considerations will dictate Israel's course of action.

Uppermost in Israel's mind is what happened in Gaza. The Israelis feel they surrendered Gaza to U.N. control, only to be confronted later by Nasser's forces in that area. They do not intend to see the same thing happen in Jordan.

The inference is that the Israelis will occupy all of Jordan west of the Jordan River and the Dead Sea, including the Old City of Jerusalem.

Eban intends to speak in the Assembly when it gets down to brass tacks on specific proposals.

He will stress Israel's contention that any state threatened by another has the right to invite help from a friendly power.

He will also stress that any guarantees given to Arab states in the Middle East should be applicable to non-Arab states as well.

Police Ready To Stop Any Anti-Red Demonstrations

NEW YORK (UPI)—Two small American flags hung today in the ground floor windows of a building on Park Avenue at 68th Street. Behind them are the offices of a small private organization, the Bureau of Municipal Research.

The flags are there because next door is the residential and office headquarters of the Soviet delegation to the United Nations. A few weeks ago, Hungarian demonstrators threw rocks through the windows because they thought the offices also belonged to the Russians.

It is a mark of the anticipation there could be trouble while Foreign Minister Andrei Gromyko, who is leading the Soviet delegation to the General Assembly, is living there.

Gromyko's presence, actually, seems unlikely to stir emotions at all the way a visit of Nikita Khrushchev could. In any event, New York police are ready to stop any demonstration quickly.

start standing guard at the Russian building at 6 a.m. Twenty more policemen were assigned nearby and a detective squad car was on hand to follow Gromyko wherever he goes.

The Russian foreign minister isolated himself in the building when he arrived Sunday with 34 aides and secret police bodyguards. The Soviets had reserved four suites in the towers of the Waldorf-Astoria, where President Eisenhower and John Foster Dulles are staying. But on arrival at the airport they drove instead to the Park Avenue building and cancelled the Waldorf reservations.

Getting any news about the ordinary activities of Gromyko and his associates is almost impossible.

Police Commissioner Stephen Kennedy ordered 20 patrolmen, four sergeants and a captain to

Top U.S. Stamp Trader Named In Smuggling Case

NEW YORK (AP)—A top American stamp dealer is accused of smuggling thousands of dollars worth of stamps from Red China.

The dealer, Kurt Weishaupt of Queens, was indicted in Brooklyn Federal Court yesterday under the Federal Trading With the Enemy Act.

He is scheduled to plead next Tuesday. If found guilty, he would face a possible maximum sentence of 40 years in prison and \$40,000 in fines.

The six-count indictment charges the 45-year-old dealer imported the stamps from Shanghai between November 1953 and February 1957.

An unidentified American naval officer stationed in Japan was said to have tipped federal authorities to the operation.

Asst. U. S. Atty. Warren M. Deutsch said more than two mil-

lion stamps were seized in Weishaupt's home. He reportedly paid more than \$33,000 for them.

Weishaupt, a former president of the American Stamp Dealers Assn., was said to have sold smuggled stamps at 100 per cent profit.

The naval officer told authorities last year that Communist Chinese stamps were being sold at a concession at Gimbels department store.

Neither Gimbels nor the concessionaire was named in the indictment. Deutsch said they had cooperated fully in the investigation.

Treasury agents reported tracing \$33,394 sent by Weishaupt to his alleged source, a Shanghai firm named the Oriento Stamp Co.

The stamps assertedly were shipped in small parcels to members of Weishaupt's family.

WILL PRAY OVER RADIO

VATICAN CITY (UPI)—Pope Plus XII will recite the Angelus prayer over the Vatican Radio Friday on the feast day of the Assumption of the Virgin Mary, the Vatican said today.

Reconnaissance Units Keep Vigil On Lebanon Troops

BEIRUT, Lebanon (AP)—Reconnaissance units of the U. S. Army keep a constant watch on rocky ridges beyond which the mysterious forces of rebel leader Jamal Jumblatt make their camps.

The American watchers work with helicopters, jeeps and on foot. The blue Mediterranean glistens about four miles away. They get down to the beach about once every three days to swim off the dust that goes with soldiering.

They are not looking for trouble and have not had any. Like the cavalry of old they are the eyes of the Army. They should be among the first to know if the present uneasy truce in Lebanon breaks down.

In the most advanced position of all, members of Troop C, an airborne reconnaissance unit of the 17th Cavalry, are dug in snugly. Working with Lebanese security troops and patrolling on their own, they keep track of any disturbances in rebel territory.

Maj. Oran K. Henderson of Indianapolis, the commander, said: "According to our information Jumblatt's army has about 35 per cent local people from his own area in its ranks with the other 65 per cent being what we call strangers. These are said to be Lebanese from other parts of the

country, Syrians and even Egyptians.

"Jumblatt, who is even respected by his opponents, can keep the local people in his army from starting the shooting again. His control over the strangers is questionable, however; that is why we are here to keep a watch on things."

Rocket Astronomy Finding That Our Sun Is Litterbug

By ALTON BLAKESLEE

Associated Press Science Writer MOSCOW (AP)—Rocket astronomy is finding evidence our sun is a litterbug.

The sun is strewing a lot of hydrogen gas around in the earth's front yard and in the path of all planets of the solar system.

If you could expose a quart milk bottle to this gas in space, it would pick up from 100,000 to a million hydrogen atoms, reports Dr. Herbert Friedman of the U.S. Naval Research Laboratory in Washington.

Most if not all of this gas apparently comes from the sun, which ejects it in vast flares. But, interplanetary space is still a pretty good vacuum. A quart of air at sea level contains ten million billion atoms.

Friedman's report is new evidence the sun's atmosphere in effect extends all the way to the earth, which is a distance of 93 million miles, and probably beyond. It is also evidence that space is not quite so empty as once believed.

Friedman and his associates originated a new, third kind of astronomy—observations made with rockets rather than with earth telescopes catching visible light or with recording of radio waves from space. The American scientist described the finding at a meeting today of the International Astronomical Union.

The rockets are equipped to see only ultraviolet light of a kind much more energetic than that which tans your skin. Rising to heights of about 100 miles, the ultraviolet eyes see a remarkable spectacle.

Space becomes aglow with intense light, rather than being black. The glow is an ultraviolet light

of a particular wavelength which does not reach the earth because it is filtered out by the earth's air.

This is a part of the sunlight which has been bounced around by atoms of neutral hydrogen, meaning atoms carrying no electrical charge.

The special rocket eyes measured the intensity of this light. This measurement was the base for an estimate that there are 1,000 neutral atoms per quart in space. And it is known that for every atom of neutral gas there are 100 to 1,000 electrically charged hydrogen atoms. Therefore there are 100,000 to 1,000,000 atoms per quart in the interplanetary area, which means the distances between all planets and the sun.

When the rocket eyes are tuned to a higher wavelength they can see through the glow and locate distant stars and galaxies as blobs of radiation. This astronomy promises to aid greatly in understanding of the universe.

Entertainment Group Bans 'Nudoscope'

MEXICO CITY (AP)—Mexico City's Entertainment Department has banned use of the term "Nudoscope" in advertising the movie "Enchanting Ladies."

Original ads said: "First—Cinemas—F a n o r a — Cinema—S c o p e—and now—Nudoscope."

The department said the term was too suggestive. The cast includes several noted flesh artists.

Lightning Kills Mom

GRAVESEND, England (AP)—A mother of nine children was killed here yesterday as she bent over a baby carriage to kiss her 5-month-old daughter Yvonne.

Mrs. Kathleen Hewson was wearing a metal clip in her hair. Lightning struck it and she fell with her hair ablaze. The baby, Yvonne, was not hurt.
