

Hay Fever Patients now open Nose-Sinus Zone with New 3-Layer Tablet

Clear, free breathing restored in minutes as congested nasal zone is decongested—stops sneezing, watery, itching eyes

Chicago, Ill. (Special) Observers here are hailing a remarkable new advance against the most unrelenting misery of hay fever—congestion in the nose-sinus zone.

A way has been found to decongest this congestion. This is the central fact which has aroused so much interest on the part of hay fever sufferers who have never found satisfactory relief from other medications.

Up to now, nose drops, eye drops, inhalers, sprays and antihistamines have given some measure of relief. But today you can expect much more complete comfort. This new compound reaches all the congested nasal areas from all sides, through the blood stream. It opens stuffed-up, blocked nasal passages. Free breathing is restored in minutes. Stops unpleasant sneezing; watery, itching eyes are cleared.

New Tablet Discovery

It took a new kind of tablet—made in three separate layers—

to combine the special ingredients which make this formula so amazingly effective. Among them is a new decongestant substance so effective it has become the single ingredient most prescribed by doctors for relief of congestion in the nose-sinus area.

Available without Prescription

Now available without prescription—this new 3-layer tablet is called Dristan®. Its unique combination of ingredients—(1) opens up blocked breathing, (2) stops unpleasant sneezing, (3) clears red, watery, itching eyes. At the same time, Dristan helps the body meet the great demands put upon it by the stress and strain of hay fever, and bolsters the body's resistance to infection.

Hay fever sufferers who want faster, more complete relief than they have ever before obtained are advised to try Dristan Decongestant Tablets—satisfaction guaranteed, or money refunded.

BIG CANNON Bath Towel

no extra cost—in every King Size

It's full-sized, fluffy, pastel-colored... and it's packed right in the box!

And remember—Breeze is tops for everything you wash—from dungarees to nylon. You can't buy a better all-purpose detergent!

Satisfaction guaranteed by Lever Brothers or your money refunded.

WHITER, BRIGHTER, WASHES, TOO!

CANNON FACE CLOTH IN REGULAR SIZE... CANNON KITCHEN TOWEL IN GIANT SIZE

If you're near-sighted, try looking down into a mirror when applying mascara, brushing to the outermost tips of your lashes. Use the brush to separate and curl lashes. An eyelash curler is a boon to some. See how eyes can sparkle prettily even through specs when make-up's properly applied to brows, lids, and lashes.

Add Allure to Your Eyes

by Nan Cabot

LET'S FACE IT, men are interested in the total woman—not the figure, the legs, or any single feature (in spite of what they say!)—but in her general appearance, her grooming, a pleasing smile and, very important, what lies behind those sparkling eyes.

A pleasing smile and sparkling eyes can't be achieved by the gal who, because of false

vanity, won't wear the eyeglasses she needs. Dull red eyes and squint-lines are her lot.

Gone are the days of Dorothy Parker's couplet, "Men never make passes at girls who wear glasses." Frames are now so beautifully styled, they've become an important fashion accessory, and some women who don't even need spectacles, wear frames fitted with lenses of ordinary, but finely ground glass. They know that a well-chosen frame, like a properly used cosmetic

or the "right" hair style, creates a wonderful illusion and helps to correct facial imperfections. The right frames, worn for whatever reason, give your face a "lift."

Every woman who cares about her appearance uses eye make-up. A lass with glasses should remember that her specs are important frames to her eyes, and that lenses tend to dim the picture of the eyes unless it's emphasized. Such highlighting is done with the three basic tools of eye magic—eye shadow, eyebrow pencil, and mascara.

Select an eyeglass frame which is in proportion to the size of your face and balanced to its shape; the type of bridge should do kind things for your nose. The width across the top of your frames must equal or be greater than the widest part of your face, with the upper half of the frame following your brow line—never hiding it. Stray brow hairs should be judiciously plucked away, and your brows kept smooth and clean.

Select a frame color for positive effect—to dramatize, not fade the colors of your eyes and complexion.

Eye shadow brings out eye color, and makes the whites seem whiter and larger. Blue is becoming to most women, though any of the shades which bring out the color of your eyes should be considered. Save the more exotic shades for after dark.

Apply the shadow directly on your foundation, starting at the center of the lid. Blend it toward the outer edge of the eye, and up almost to the brow. Prominent eyes are minimized by concentrating the shadow more heavily on the lid centers; deep-set eyes take well to the crystal-like light

shadows which give lids an attractive sheen without darkening them; close-set eyes call for shadow applied to the outer half of each lid—to give a wide-apart look to your eyes.

Use shadow sparingly—better too little than too much. Play with it until you get the result that gives your eyes added color and beauty without seeming artificial.

Next, with a sharply pointed eyebrow pencil, draw a fine, thin line along the base of your lashes on both lids, ending with a slight up-tilt just past the eye.

After you've powdered your face and brows and brushed off the excess, start using the pencil for sleeking your brows. Don't darken them too much—just a shade or two darker than your hair color looks natural. For the very blonde, a medium to light brown pencil is best.

Apply your pencil to the hairs of the brows in short feather-like strokes, never directly on the skin unless it is to cover up a bare spot. Taper to a fine line with an upward tilt not too far beyond your eyes. A down-curve makes the eyes seem smaller, and gives you a tired, unhappy look. Blend and soften the pencil strokes by brushing lightly along each brow with your little finger for the most natural effect.

Last but not least, there's mascara, which few women can do without. The full length of even the most luxuriously long lashes is never noticed without help from this enchanting cosmetic.

With an even layer on a clean brush (follow the package instructions for the type you use), apply your mascara, beginning at the base of your lashes and stroking up and out toward their tips. Let them dry, and with a clean, dry brush, brush your lashes gently to separate them and remove any surplus mascara, leaving them soft and full and evenly colored.

It's best to apply mascara only to the upper lashes for daytime wear. Date-time calls for mascara on the lower lashes, too, but use even greater care here, to avoid mascara rings under your eyes.

As with any make-up, we shouldn't see the cosmetic itself, but only be aware of its effect. A little practice in the subtle application of eye-magic, and you'll find it as simple as powdering your nose!

Now-Remove Corns in 3 days

(AND RELIEVE PAIN OF CORNS RIGHT AWAY)

RESULTS GUARANTEED* WITH BLUE-JAY, the plastic corn plaster with exclusive wonder drug Phenylum®

How Phenylum medication gets rid of corns from underneath...

Medical science has found a fast and effective way to relieve the pain of a corn, and get rid of it at the same time.

This treatment works by getting to the base of the problem. It actually gets rid of your corn by pushing it up from underneath.

The secret is a wonder drug from the Blue-Jay laboratories which took years to perfect. That wonder drug is called Phenylum.

How BLUE-JAY Corn Plasters relieve pain, remove corn

The Blue-Jay plaster consists of a felt ring surrounding a pad with Phenylum. The felt relieves the pain of the corn by removing the pressure and friction which causes it.

Simultaneously, the Phenylum

goes to work to remove the source of the pain—the corn itself. It penetrates through the tough, horny skin of the corn to its base, where it stimulates the growth of new cell tissue.

In most corns, by the end of the third day this new tissue has grown to the point where it can be lifted out.

*Money Back Guarantee. Follow directions, get relief from pain... get rid of ordinary corns in 3 days... or your money back from Blue-Jay, 309 W. Jackson Blvd., Chicago 6.

Regular or ladies size. Callus plasters, too. Look for the new BLUE-JAY package.
