Aide Says Suit Dropped By Representative's Mate

WASHINGTON (AP)—The male secretary of blonde Rep. Coya Knutson (D-Minn.) says his boss' husband is dropping a \$200,000 suit against him charging alienation of affections and slander.

Hatfield Aide Position Set

SALEM (AP)—Gov.-elect Mark Hatfield Tuesday announced that Wayne Nunn, his 38-year-old assistant secretary of state, would be his executive assistant when he becomes governor.

Nunn served with the Civil Service Commission, as assistant public utilities commissioner, and as director of motor vehicles before becoming assistant secretary of state two years ago.

He had a hand in developing anti-knock gasoline. The incubators that give many a tiny infant a push down the road of life; the refrigeration unit; the pilotless airplane, aerial torpedo, diesel locomotives, accounting machines — Kettering helped develop all of these.

Kettering's only son, Eugene, of Hinsdale, Ill., was with him when he died. The inventor's wife died in 1946.

Funeral services will be held Friday in Dayton. He was born on a farm near Loudonville, Ohio, Aug. 29, 1876.

In 1904, he earned his engineering degree at Ohio State University.

In 1947 he retired as head of the research division of General Motors Corp. He remained active, including his work in the Kettering Foundation, which he founded in 1925 at Antioch College in Ohio.

A humanitarian as well as a multimillionaire, he used his money to further the advancement of science. In 1945, he joined with Alfred P. Sloan, retired board chairman of General Motors, in establishing the Sloan-Kettering Institute for Cancer Research.

His invention of the automobile, the first car to have a steering wheel, and the first car to have a motor, were just a few of the many inventions that have changed the world.

He was mostly widely acclaimed for his perfection of the self-starter in automobiles. The 140 patents he held, on his own inventions and improvements on the inventions of others, helped revolutionize a dozen industries.

When electric cash registers ring up sales throughout the world today, they'll be ringing in tribute to Kettering. He invented them.

"DENNIS THE MENACE"

"KISS AN HUG! KISS AN HUG! SMACK YOUR SWEETIE ON THE MUG!..."

Police Arrest Ex-Convict For Gas Station Robbery

PORTLAND (AP)—Police arrested two bandits shortly after they held up a Portland service station Tuesday for \$18. One of the two, on parole from a life sentence for armed robbery, faces almost certain return to the Oregon penitentiary for life.

"Stupid, just stupid," Jess Williams Neal, 33, of Clackamas told Detective Ray Duerst when asked why he did it.

Neal, paroled less than two weeks ago, and John Grogan, 21, of Portland signed statements admitting the robbery. Both were jailed in lieu of \$5,000 bond after being charged with robbery.

Neal was arrested hiding under an old car with a .32 pistol in his hand, which he didn't attempt to use against arresting officers. He said the holdup was a spur of the moment idea.

Neal told officers he was working on a Clackamas County farm, a job his sister obtained for him after she worked for his release.

"She'll think I'm a pretty foul character," he said. Police said the pair held up Hans K. Zirbel, 18, at a service station at 1033 Northeast 82nd Ave., taking \$18 and two flashlights. They put Zirbel in a rest room, but he obtained a description of their car by climbing on a wash basin and looking from a high window, then called police.

Officers Roger Tappendorf and Louis Bayer, cruising nearby, spotted the car and pulled it over. Grogan was caught attempting to jump from the car and Neal was found nearby under another car.

Portland (AP)—Planes were to search the Columbia River Gorge again today for a missing plane with two persons aboard.

The private plane disappeared Saturday on a flight from Yakima, Washington, to Portland. Aboard were the pilot, Lowell Adamson, 42, a Yakima businessman, and a passenger, Mrs. Eloise I. Kootz, 31, also of Yakima.

Search planes flew through the gorge Tuesday but were unable to get near the treacherous peaks because of high winds which buffeted the area.

The search was concentrated there because two Vancouver, Wash., firemen reported hearing a plane Saturday night while they were driving between Cascade Locks and The Dalles.

A group of Washington pilots turned up no clues in their search of the Simcoe Mountain area, west of Bickleton, Wash.

Funeral Services Scheduled For Automotive Engineer

DAYTON, Ohio (AP)—Charles F. Kettering is dead. But when an auto starter whined and turned over the motor, that was "Boss Kett" giving a helping hand.

The 82-year-old inventor, who died in his home here Tuesday of a stroke, amassed a fortune through his genius in the automotive and other fields.

He was mostly widely acclaimed for his perfection of the self-starter in automobiles. The 140 patents he held, on his own inventions and improvements on the inventions of others, helped revolutionize a dozen industries.

When electric cash registers ring up sales throughout the world today, they'll be ringing in tribute to Kettering. He invented them.

He had a hand in developing anti-knock gasoline. The incubators that give many a tiny infant a push down the road of life; the refrigeration unit; the pilotless airplane, aerial torpedo, diesel locomotives, accounting machines — Kettering helped develop all of these.

Japanese Critic Of States Lauds Effort To Solve Woe

TOKYO (AP)—A caustic Japanese critic of the United States has expressed sympathy for America's efforts to solve its Negro problem.

Ashihiko Hino, Japanese novelist just returned from a two-month trip to the United States, said he saw improvement in the status of Negroes in many places, including Little Rock.

In an article in the newspaper Tokyo Shinbun, Hino said the Negro "if he demands outright equality, without improving his own record for crime, ignorance and uncleanness, is bound to fail."

Hino has charged in previous writings that the United States mistreated "our brothers and sisters in Okinawa." He also ridicules punishment of low-ranking Japanese soldiers for war crimes.

He has made previous trips to the Soviet Union, Communist China and North Korea. His books and articles on Communist nations are more critical of them than his Tokyo Shinbun article is of the United States.

"I visited Little Rock, Ark., with a preconception mixed with dread," he writes. "I had thought it was a fearsome place of bigotry where poor Negroes were ruthlessly persecuted by whites."

"I found out quickly my preconception was completely wrong. It was a quiet, beautiful city... Whites and colored people were living together in harmony."

"Facilities for the Negroes were as good as those in New York, Boston and Chicago I had seen earlier."

"Now I know it is wrong to consider the Little Rock school incident as a peak of the Negro problem. It is indeed far more complex and deep rooted."

On his way to Little Rock, Hino used a "colored rest room" for the first time in Memphis, Tenn. "It was narrow but clean, and its equipment was the same as in white rest rooms," he reported. "That was a typical example of the spirit of the separate but equal policy in the South."

Schools Close For Institute

MT. ANGEL (AP)—All Roman Catholic grade schools in Western Oregon will be closed Monday and Tuesday so teachers can attend a diocesan institute.

Some six hundred religious and lay leaders are expected at the institute which will have as its theme, "The Teaching Apostolate."

State Supt. of School Rex Putnam will be a guest. Speakers will include the Rev. Edward Zenner, dean of studies at Central Catholic High School in Portland; the Rev. William Elliott, master of novices at Sheridan Novitiate; Dr. Gordon Hingzinson, director of psychology at the University of Portland; Barton Fitzpatrick, consultant for case work services with Catholic Charities; and Mrs. Betty Owens, state supervisor of health and physical education.

Council Seeks Salary Boost

EUGENE (AP)—The general council of the Oregon State Employees Assn. called Tuesday for state employe salaries equal to those paid by private industry.

In a resolution passed at the council's 16th annual meeting the group said it would present to the next Legislature the request.

The resolution, it said, was the result of a year's study by the board of directors and a salary committee.

Another resolution that would have asked the Legislature for an across the board pay increase was rejected.

The group also urged the appointment of a Little Hoover Commission to study department budget positions and supported more pay for legislators. They also recommended an increase from seven to nine cents in the per mile rate paid state employes for the use of their private cars.

Sugar Consumers Urge Quota Hike

WASHINGTON (AP)—The Agriculture Department was urged Tuesday by some big sugar consumers to boost the 1959 sugar marketing quota to 9,600,000 tons.

Spokesmen for sugar producers told a Department hearing that the higher the quota the more prices are depressed.

The 1958 quota originally was established at 8,800,000 tons but the department later increased it to 9,200,000.

The 1959 sugar quota will be announced about the middle of December by Secretary of Agriculture Benson.

Printed Pattern

9027 SIZES 14 1/2-24" by Marianne Martini

FOR HALF-SIZERS Half-sizers! See how the princess lines narrow you through the middle, make you look taller, too! Sew this beautiful basic in cotton or faille to wear everywhere now and from now on.

Printed Pattern 9027: Half Sizes 14 1/2, 16 1/2, 18 1/2, 20 1/2, 22 1/2, 24 1/2. Size 16 requires 4 1/2 yards 3 1/2-inch fabric.

Printed directions on each pattern part. Easier, accurate. Send fifty cents (coins) for this pattern—add 10 cents for each pattern if you wish 1st-class mailing. Send to Marianne Martini, Herald and News, Pattern Dept., 232 West 18th St., New York 11, N.Y. Print plainly name, address with zone, size and style number.

Lily Pons Sheds Mate

JUAREZ, Mexico (AP)—Court records show opera singer Lily Pons and conductor-composer Andre Kostelanetz have been divorced in Juarez.

After the disclosure, Miss Pons' agent in New York City issued a statement for the couple, who had been married 20 years. It said: "Our decision to lead separate lives was arrived at with our deepest regret and only after long and serious consideration. Unfortunately, we both feel that the demands of our respective careers have made it difficult to continue our marriage. We are and will always remain the best of friends."

Miss Pons appeared in First Civil Court personally Monday to file a divorce petition stating "incompatibility of characters."

Her petition said she and Kostelanetz were married June 2, 1938. They have no children.

HIKE ASKED

GRAND RAPIDS, Mich. (AP)—Police Judge Edward G. Burleson wants Michigan voters to approve a constitutional amendment making the maximum fine for a misdemeanor \$500. Judge Burleson told the City Commission the old maximum of \$100, set in 1906, has not kept up with the rising cost of living.

Judge Gives Land Ruling

PORTLAND (AP)—Judge William G. East ruled Tuesday the Bureau of Land Management can take immediate possession of the Rock Creek access road to Oregon & California land grant timber in Douglas County.

The federal court order said the bureau must first make a fair and reasonable payment to the lumber companies that own the road. These include Weyerhaeuser Timber Co., Douglas Lumber Co., Umpqua Plywood Corp. and Evans Products Co.

Judge East said a hearing would be scheduled to determine the road price.

The bureau plans to sell about 32,500,000 board feet of timber from the area, which it estimated will bring one million dollars.

Solon Fears Next Election

PORTLAND (AP)—Sen. Richard L. Neuberger (D-Ore.) said he feared the 1960 election campaign in Oregon may be a dirty one and he asked the Fair Campaign Practices Committee to pay specific attention to it.

Speaking before the Portland Junior Chamber of Commerce, Neuberger said Tuesday personal abuse and character assassination should be discouraged in political campaigns.

In 1954 some Republicans accused Neuberger of cheating on a college test 20 years earlier. He said a good many people "who were notably silent, if not actual participants in approving personal attacks upon me four years ago, became vocally indignant when Sen. Wayne Morse referred to Mark Hatfield's teenage auto accident."

"Thus we have precedents in Oregon in which spokesman of both major political parties have crossed the line to personal abuse in an attempt to win elections."

Neuberger said he had written a book on "The Dirty Game" and he hoped it would help to clean up the political process.
