

# Give Her Leisure - And She'll Have Time to Give to Family

## Your Gift Benefits Everyone

How big a package does leisure time come in?  
 And where can you buy it?  
 There's not a husband alive who wouldn't like the answers to those questions - for leisure time is obviously the best gift he could possibly give his wife for Christmas.

Actually, the answers are surprisingly simple. That's because today's labor-saving appliances are also time-savers. Thus, the lady who receives a major appliance from her family as a Christmas present is getting more than simply a machine which will make her work easier - she is, in effect, receiving a "package" of leisure time. These extra moments will come to her every day of the year, and they are hers to do with just as she wants.

**Family Reaps Benefits**  
 No husband will be surprised, of course, if his wife devotes most of those new found leisure moments to the family as well as herself. That's one beauty of an appliance as a Christmas present - the family reaps the indirect benefit even as mother herself gets the real use out of it.

The woman who owns a modern home freezer, for example, will find that precious moments just before meal time can now be spent with her family and guests. Delicacies prepared long in advance merely have to be removed from the freezer and popped in the oven. And if she owns a modern range with the latest in automatic controls, she'll have just that much more time in which to relax before the meal is ready for the table.

Or, if the Christmas gift comes in the form of a dishwasher, the family will be able to relax together after the meal while the machine takes over the clean-up chore which once made mother an exile in the kitchen.

**Saves Shopping Time**  
 Meal times, however, are not the only extra leisure moments which can be extracted by modern appliances. A big, spacious refrigerator, for example, eliminates the need for repeated, time-consuming trips to the store. Shopping once a week is enough, for the wife with a modern refrigerator and home freezer really has a supermarket in her own home.

Washday, too, can be changed from an exhausting and time-consuming interval to an effortless interlude during which the housewife need do little more than set dials and push buttons.

## Blast Trial Nears Jury

ATLANTA (AP) - The trial of George Bright, 31, Atlanta engineer charged in the bombing of a Jewish temple, was expected to go to the jury Saturday.

Bright is the first of five men to be tried on charges of dynamiting the temple Oct. 12.

A state witness Friday quoted Bright as saying he served as a lookout for the bombings which tore holes in the temple on fashionable Peachtree Road.

James Devore, 33, an automobile plant employe, said Bright told him about the bombing when they were cellmates.

Devore was being held on larceny after trust charges later dismissed.

Devore said Bright told him that "he drew plans and led the plans for the bombing. He said he did not do the actual bombing but was a lookout."

After Devore completed testifying, the state rested and the defense, led by James R. Vanable, began presenting its case.

So far, most of the defense testimony has been directed at discrediting statements made by Leslie Rogers, former undercover agent for the FBI. Rogers' testimony was to the effect that Bright and the other defendants were in a local chapter of the National States Rights party, which he described as anti-Jewish.

## Her Meals Can End With Dessert, Instead Of Drudgery

The lucky lady who receives a dishwasher for Christmas may not realize right away just how fortunate she really is.

But during the year she'll have over 45,000 opportunities to thank her lucky stars that she'll never have to wash another dish. That's because the average family dirties about 300 dishes per month - or more than 450,000 per year.

Actually, it won't take her that long to realize how thoughtful you have been. If she's entertaining you for Christmas Day, for example, she'll find that Christmas

dinner can be a thing of sheer delight when she doesn't have the stacks of dishes awaiting her in the kitchen. For with a dishwasher, a meal can end with dessert - instead of drudgery.

The real gift of a dishwasher is leisure time. Studies show that she spends between an hour and an hour and a half doing dishes each day. In the space of a year the woman has spent 21 days doing dishes.

While owners of dishwashers are particularly enthusiastic about the time and work the appliance saves them, they also have other kind words for the product. Many

single out the fact that the extra hot water used in a dishwasher virtually sterilizes the dishes, killing any bacteria or germs.

The dishwasher, moreover, is almost unique in the way it qualifies as a "family gift" at Christmas time. That's because in most households dishwashing is not reserved exclusively for the woman of the house. The children and the husband all come in eventually for their turn at the sink. The

gift of an automatic dishwasher will pay bonuses for all of them all through the year.

The smart new Ford "Galaxie" is currently the big feature on the floor at Balsiger Motors, who extend a cordial invitation to come in and see this new model. Adv.

## There's A Dishwasher For You

You can find an automatic electric dishwasher that fits your kitchen. Today, dishwashers are available in three basic types - built-ins, portables and free-standing.

The built-in dishwasher can be fitted into your existing kitchen beneath the counter top, where it is permanently installed.

If you don't wish to put a dishwasher beneath the counter, perhaps a free-standing unit is the one for you.

Or if you would like, there is a portable dishwasher on casters that can be moved aside when dishwashing time is over.

With this selection available you are sure to be able to find a dishwasher that fits your own personal needs.

Regardless of which one you choose, you will find that they all save you time... and what busy homemaker and hostess wouldn't like more time to devote to her family and guests?

Today the homemaker must double as both hostess and cook. The automatic electric dishwasher is the best built-in maid service she can get. But occasions for entertaining are not the only times a dishwasher helps out.

As a day in, day out labor-saver a dishwasher will save the average homemaker more than four hours a week over the hand method of washing dishes. This was brought out in a study conducted at Ohio State University with a group of typical families. How did these homemakers find they saved time?

Clearing the table and scraping the dishes is a routine part of any dishwashing chore. But instead of having to stack the dishes and ready the dishpan or sink for the hand washing method, they immediately put the dishes in the dishwasher, after they were scraped. When all the dishes were in the dishwasher, the homemaker filled the detergent cup, closed the dishwasher and pushed a button. The job was done - dishes washed, rinsed and dried with no attention from her.

These families found, too, that because they washed dishes only twice a day (the breakfast dishes were stored in the machine until the lunch dishes were added to make a full load) they saved money on detergents. This is no small item at today's prices. They found that the amount of laundry they had to do was less because of the decreased number of tea towels used. This was not only a time-saver, but a detergent saver as well.

In the Ohio Study, the homemakers felt the saving in china and glasses was amazing when they used a dishwasher because the amount of breakage was so small. What is more, the families who participated in the study believed that the labor saved, together with the more efficient results, helped pay for their dishwashers. And who couldn't use a year round vacation from monotonous dishwashing.

**SMOOTHS CLOTHING**  
 Use the top of your clothes dryer as a folding and smoothing surface. The heat of the dryer aids in smoothing the clothes.
