Bill Of Rights Author Did Splendid Service To Country In Drafting Act

By JOSEPHINE E. HARPAM

(Eugene, Oregon)

When George Mason died at his home, Gunston Hall, Virginia, in 1792, it might well have been said of him, as it was said of Abraham Lincoln by Edwin M. Stanton, then secretary of war, "Now he belongs to the ages." In actuality he became the "forgotten man of history," except for a specialized group of people interested and informed on the subject, such as professors, teachers, students, librarians.

George Mason (1725-1792) was a wealthy, scholarly Virginia gentleman and planter — and a close friend of Washington, Jefferson, and George Rogers Clark — who possessed one of the finest minds

Farmers buy about 17 per cent of all tires sold in the United States.

and noblest hearts our country ever produced. In 1744 he authored the historic 24 "Fairfax Resolves," which outlined the rights of the colonies in relation to England. In Williamsburg, Virginia, June 12, 1776, his Virginia Declaration of Rights was adopted by the colonial delegates. The latter became the basis for the first 10 amendments to our Federal Constitution, the Bill of Rights. Mason was also the author of the Virginia Constitution, the first to be drawn up in the colonies, and later used as a model by most other states in the

Union. In 1787 Mason was a delegate from the state of Virginia to the Constitutional Convention held in Philadelphia. His friend and neighbor, George Washington, presided over this historic gathering, which produced one of the most profound and far-sighted structures of government the world has ever known. George Mason, however, opposed the adoption of the Constitution, and also the ratification of it by the state of Virginia. His political philosophy would not permit the adoption because, among a number of reasons, (1) it contained no Bill of Rights; (2) because it permitted the importation of slaves for 20 years, and slavery was disgraceful to him; (3) because he felt it presented no adequate check and balance among the three branches of government; (4) because he thought there should be rotation in the office in the U.S. Senate; (5) because he

opposed government controlled District of Columbia.

In Richmond, Virginia, June, 1788, there assembled some of the greatest and most brilliant debaters in American history. Among the supporters for the constitution were: James Madison, John Marshall, Light Horse Harry Lee, Edmund Pendleton, and Edmund Randolph. Against adoption were George Mason, Patrick Henry, James Monroe, and Benjamin Harrison. Virginia ratified the constitution by a margin of 89 to 79. The price of approval, however, was a promise that a set of amend-

ments embodying a bill of rights would be introduced into the first Congress. Therefore on the next day George Mason drew up 20 proposed amendments founded on his own Declaration of Rights, which in essence later became the Bill of Rights. Life, liberty, pursuit of happiness and safety, liberty of conscience, free press, judicial safeguards, the right to vote and civil supremacy are perhaps more significant today than they were over 180 years ago.

George Mason's contribution is deeply significant, timeless and enduring for he helped to translate

the political theory of the rights of man inherent in English law into political reality — no longer now forgotten, he does indeed "belong to the ages."
