OUT TO LUNCH

ITHACA, N.Y. (UPI) — Prof. John M. Anderson, a Cornell University zoologist, is using a \$12,000 National Science Foundation grant to find out more about the stomach of a starfish.

He is studying in detail the starfish method of sliding its stomach out of its mouth and surrounding food with a baglike structure which is then retracted. Anderson describes the starfish as an "animal which sends its stomach out for dinner."
