CONGRATULATIONS

To The
Goodings

On Their New Modern Poultry Development. We Are Extremely Proud That We Have Had The Opportunity to Assist In The Development of This Project.

For a Fact

We're Just Plain
"Bustin' Our
Buttons"

That Our
Albers

Egg Maker No. 16

has been selected by
Mr. Gooding as his
exclusive laying ration

Albers Egg Maker No. 16

Is Recognized As
Producing Superior

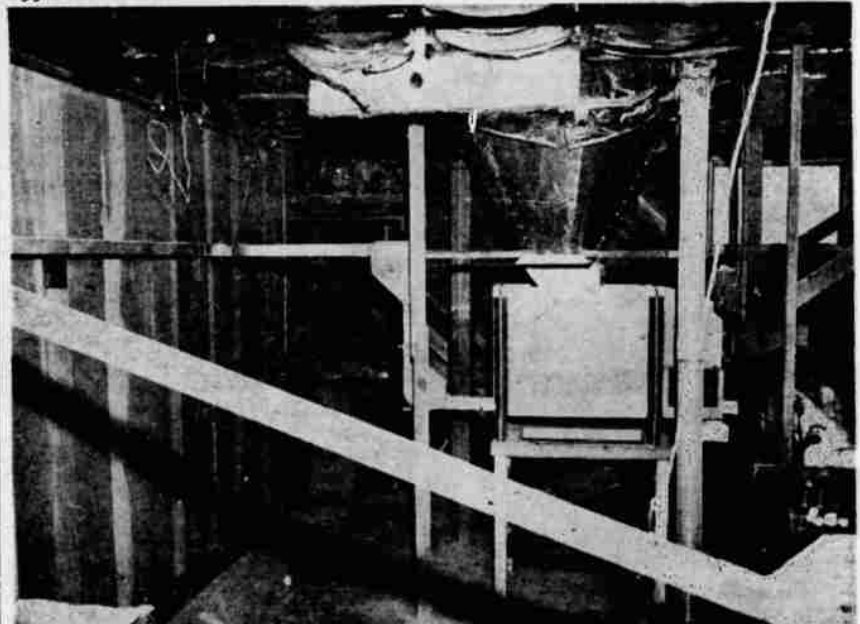

Quality Eggs

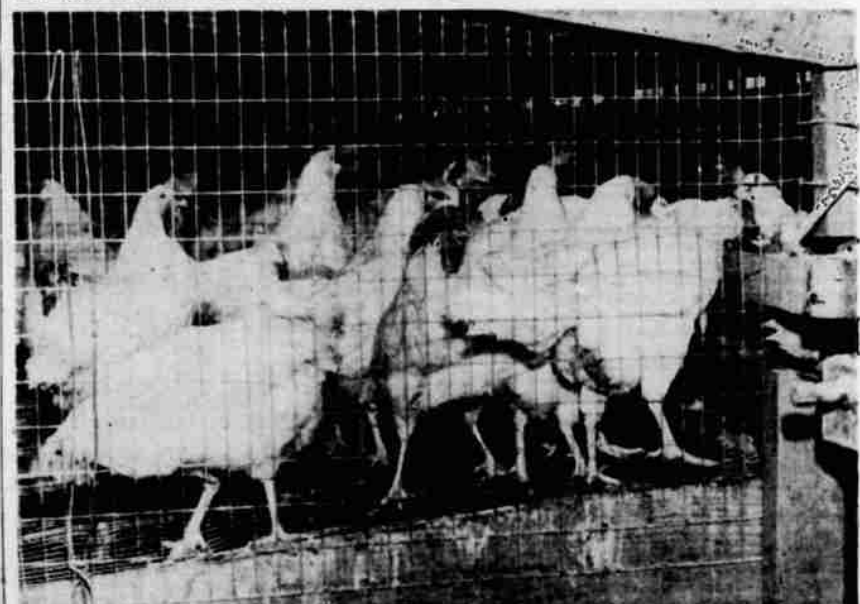

2710 SO. 6TH TU.4-8300

FINAL STAGES of getting eggs ready for market are handled by Violet Gentry. After the eggs have been candled, they are automatically rolled onto scales and are graded by weight into the various grades. They are taken from the scales and placed in the proper cartons. Cartons are made at the new Diamond Gardner Corporation plant at Red Bluff, California, with special printing to identify them as Gooding Poultry Farm eggs.

FEED UNIT for one of the two automatic feeding systems in the new cage house at Gooding Poultry Farm shows the hopper arrangement which drops the proper amount of dry feed onto the chain feeder for distribution throughout the building. Each system can feed more than 3500 birds at a feeding.

EACH CAGE in the new cage house at Gooding Poultry Farm contains 22 White Leghorn chickens. The hens usually start full production at about five and one-half months of age and the farm is getting about 80 per cent production which is from 10 to 15 per cent higher than was possible using previous types of buildings.
