BATHROOM MODERNIZATION NOT TOO COSTLY

CERAMIC TILE in new decorator shades, installed from floor to ceiling turns a utilitarian bathroom into a thing of beauty. This modern tile works decorator-magic in kitchens, entrance halls, utility rooms and sun rooms. Professional looking results are easy for "do-it-yourselfers" with the recommended rubber base adhesive.

Ten Important Considerations In Bathroom Modernization Planning

- 1) Replace inefficient plumbing with rust and corrosion-resistant copper tube — it lasts much longer than ferrous materials.
- 2) Provide more storage space with a built-in clothes hamper or storage cabinet under the wash basin.
- 3) Eliminate danger spots! Put all electrical outlets and switches

Cover 'Defects' With Proper Wallpapers

- Here are some sound ideas on how room appearance may be altered through proper use of wallpaper.
- 1) Make Ceiling Look Lower—Use dark or medium-dark color, such as olive green or mocha, or use a wide decorative wallpaper border to separate the ceiling from the side walls.
 - 2) Make Ceiling Look Higher—A light color will help, but side-wall patterns which lead the eye upward, such as vertical stripes, are more effective.
 - 3) Make Room Appear Larger—Small scale designs in light colors seem to push back the walls. Light, solid colored papers like textures, tone-on-tone ink embosses — are excellent stretchers of space.
 - 4) Unify Room With "Broken Up" Wall Areas — To unify such as the dormer room, use small-scale geometrics, all-over florals, or colorful plaids.
 - 5) Cover Damaged Wall — All-over, closely-spaced patterns such as chintzes and some of the other provincials are excellent for camouflaging.

Another important thing to do before you begin to paint is to remove the hardware from your doors and windows and to loosen your lighting fixtures. This will make your painting job easier and will give you a chance to clean and polish them.

The bathroom in your house is, in many ways, the focal point of your home. A spick and span living room is fine and a neatly-decorated bedroom has its charm. But a bathroom where the water merely dribbles and space is tight is a "dated" bathroom.

Fix-Up Bath With Modern, Smart Fixtures

The first consideration in remodeling or building a bathroom is the proper selection of fixtures. If the fixtures in the present bathroom show signs of wear — cracks, leaks and discoloration — they should be replaced.

If the bathroom area is relatively large (8-feet x 11-feet or more), square bathtubs, lavatory-dressing tables, or perhaps two lavatories may be installed. Full baths with showers measuring 30-inches x 39-inches are recommended for smaller bathrooms, and often make a second complete bathroom possible in limited remodeling space.

If possible, children should have a bathroom immediately adjacent to their bedrooms. Child-sized fixtures will encourage cleanliness. Lavatories can be connected closer to the floor, within easy reach. Mirrors can go above at the desired heights. A four foot square bathtub or receptor tub which has a diagonal bathing area and built-in seat is perfect. Smaller toilets also are more comfortable for children.

Cast-iron bathtubs come in the conventional rectangular or the new square shape in both recess and corner models. A thick enamel coat gives a smooth appearance that will not dim or peel through many years of use.

The square bathtub offers wide, roomy bathing area on the diagonal with integral seats on either side. A smaller version can be installed in little more than shower stall space, yet offers full bathing comfort.

Another innovation is the wall-hung toilet which leaves the floor clear for easy cleaning. The flush valve type of water control, once restricted to public restrooms, now is available for home installation under certain circumstances. New concealed toilet tanks are coming in for much attention, too. Manufacturers now have devised ways of hiding the tank either in the wall of the bathroom or in the attic.

Today you can find every type of bathroom fixture in the size, style and color you need.

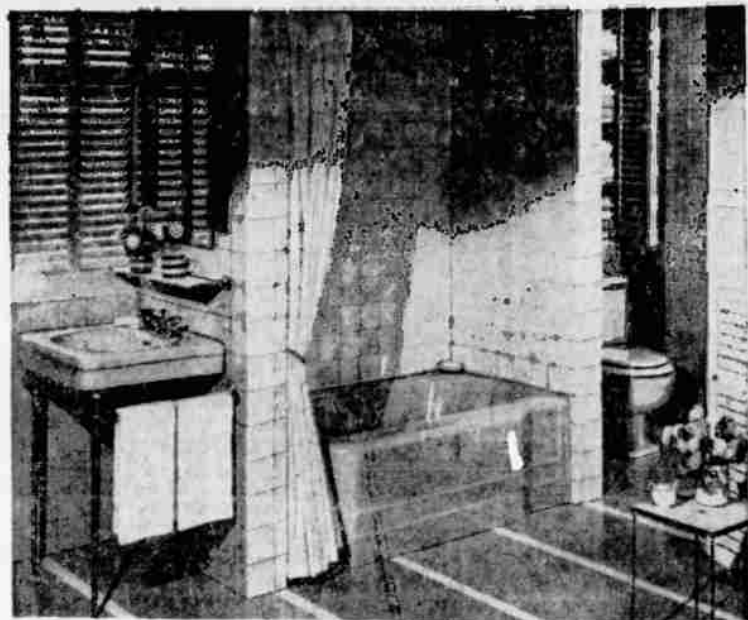

Fix-Up Cracked Ceilings With Easily-Installed Tile

Cracked and discolored ceilings can be quickly refinished with insulation board tile, available with plain or perforated surface. Before the advent of these attractive, low-cost materials, the usual remedy was a complete replastering job.

Insulating tiles are applied directly over the old ceiling with adhesives, or to wood furring strips with nails or staples. They're easy to apply, so anyone with even modest handyman talents can further cut his costs by putting them up himself.

Tiles are available with predecorated finishes, yet you can paint them yourself if you have a special decoration scheme in mind.

In addition to making an old ceiling look new again, insulating tiles will effectively reduce heat loss. The tiles also will lower the level of noise in the room.

THIS MODERN FAMILY BATHROOM was especially decorator-designed to show the custom effects that can be achieved with standard fixtures. Blue and white Styron plastic wall tile color complements the tropic-tan tub, mellow-red toilet and lavatory. Eggshell vinyl floor tile further dramatizes the "model-home" look. With three separate areas, one of which may be closed off, its advantages are obvious, especially for the family with children.

Now's the Time to Make Concrete Home Improvement

Concrete improvements will both enhance the beauty and increase the value of your property. And you can build them yourself, easily and economically.

While making improvements, you can also make needed repairs around your home. Neglect of minor repairs often means major expenses before long.

It's easy to work with concrete. Only ordinary tools are needed.

IMPROVEMENT IDEAS

Add low concrete retaining walls or curbs to your yard for a trim appearance. The curb can be finished round or flat on top.

If you do not have a walk from your door to the driveway or street, now is a good time to add one. A walk to the incinerator, clothes line and garden are convenient and will add to the beauty of your home as well.

Gas Incinerator Is Long Term Practical Item

Long a homeowner's headache, the trash and garbage disposal problem has been effectively solved with the introduction of the new, compact home gas incinerator.

The advantage of this appliance are impressive. It consumes both wet and dry solids without smoke, or offensive by-products. It eliminates messy sorting of paper and garbage.

Immediate disposal is possible, without waiting for good burning weather or sometimes-late garbage collection.

It puts an end to unsightly garbage cans and back-yard trash burners.

A prime source of household odors and insect-breeding bacteria is removed.

And, you won't have to worry any more about the possibility of a dangerous trash-fire.

Heaters Keep Modern Home 'In Hot Water'

"Three little words" are a new more and more being eliminated from the vocabulary of American families — "no hot water!"

This plaintive phrase is often repeated by mothers who hang dishes to wash and ducts to launder — from dads about when to shower or shave — even from kids at the age when they really want to get clean behind the ears.

There's really no good reason for this chronic complaint in this modern day, says the Gas Appliance Manufacturers Association since today's water heaters can keep any family supplied with enough hot water—automatically.

GAMA points out that more than two and a half million families solved the hot water problem with a new gas heater last year, and that just as many will do the same in 1959.

The demand for more hot water continues to mount because of larger families, multiple bathroom homes, automatic washers and dishwashers. Increasing awareness of the importance of personal and household cleanliness is another factor.

Your gas company or a qualified plumbing contractor can guide you in selecting a water heater of adequate capacity for your home and family.

CONGRATULATIONS

TO Mr. & Mrs. A. S. Clawson, Jr.

2021 Homedale who were winners of our ARMSTRONG CEILING TILE CONTEST

The winning number was drawn from the box by Mr. Henry Wiard, of Wiard Park
