

Star Quits Movie Role

HOLLYWOOD (AP) — A dispute between Lana Turner and Director Otto Preminger has caused the actress to withdraw from a choice role in Preminger's movie, "The Anatomy of a Murder."

Miss Turner said Monday night she was withdrawing because of Preminger's temper. But the director-producer said the dispute was over costumes she was to wear in the movie.

Shooting is scheduled to begin March 23 and Preminger says will be no delay. "I'll take an unknown for the part and make her into another Lana Turner," he said.

If You Have Grievances, You May Petition Congress

WASHINGTON (AP) — Have any grievances? Petition Congress.

The Constitution says the people have that right, and it's amazing how many do just that.

Just last week a fellow came personally to the House clerk's office with his petition for permission to address either or both houses of Congress and do here by petition Congress for redress and hear and act on my grievances.

His grievances were eight in number, including what he said was false arrest several times. The eighth was: "I have been and am being discriminated against because I am white, Christian and gentle." His petition went to the House Judiciary Committee.

Already in this session of Congress the House has received some 100 petitions from individual citizens and groups and some 50 resolutions or memorials from state Legislatures.

The most repeated subject so far is statehood for Hawaii.

Petitions favoring Hawaii

statehood have come from such diverse sources as the Brockton, Mass. City Council and Wayne Kaneko of Kaunakani, Kauai, T.H.

The Legislatures of Nebraska, New Mexico, California and Montana have sent memorials asking statehood for Hawaii.

The new Alaskan Legislature hasn't said anything about Hawaii to Congress, but it has sent its first memorial. It asked compensation for Bristol Bay (fishery production cuts made in the national interest).

Other memorials from the states cover much of the gamut of statesmen's worries — help for small business, a program to provide work for the unemployed, water power potentials, and tariff rates. Several asked for removal of the federal tax on telephone service.

The citizens' petitions are more personal. They include claims against the government and request for such things as increases in retired railroad workers' pensions and restorations of citizenship.

The most unusual petition was one filed several weeks ago by a group seeking impeachment of members of the Supreme Court. The petition was about 1,500 feet long and contained thousands of names its sponsors said were secured all over the country.

POLICE TO RESCUE
PLYMOUTH, England (UPI)—Mrs. Ida Crossman couldn't get out of her new evening dress when she returned home Monday night. The zipper stuck, so she called police.

A young patrolman obliged. "I wasn't going to ruin the dress by sleeping in it," Mrs. Crossman said.

Oregon's Mineral Output Hits 2nd All-Time High

By THE ASSOCIATED PRESS

Oregon's mineral output last year was worth 42 million dollars by one estimate, 100 million by another, and in any event was second highest in value in 100 years.

Ralph S. Mason, mining engineer for the Oregon Department of Geology and Mineral Industries, surveyed the year's activities and said the value was within a fraction of one per cent of the record set in 1957.

The U. S. Bureau of Mines, he said, put the value of 42 million dollars at the pit or mine. But, he said, if production were reported in the same manner as other commodities, 100 million would be a more accurate value.

Stone, sand and gravel, clays and similar non-metallic minerals make up the big values.

Gold, discovered in Oregon in 1882 and the major item in Oregon's mineral wealth for many years, dropped to an output of only \$37,750 last year.

Mason's report, published in the Ore-Bin, issued monthly by the department, said lime was produced from quarries near Baker, Durkee, Enterprise and Dallas. Silica came from two quarries, one near Rogue River and one near Tiller.

Dark red stone blocks, often seen in gardens and in low retaining walls, came from near Redmond. Some brightly colored building stone was quarried at three locations in Jefferson and Wasco counties while quarries scattered from Clackamas to Malheur counties yielded rock of more drab color, as well as such things as pumice.

Bentonite, a clay that swells when wet — the gumbo that plagued motorists in some parts of the country in the days before paved roads — was produced in Jefferson County and a grinding mill was set up. Stockmen use the clay to seal ponds against leakage.

Carbon dioxide from wells south of Ashland was converted into dry ice.

Mason's report on metallic minerals said uranium concentrate was produced last year for the first time at the Lakeview mill, chromite production was halted in May when the government stopped its stockpile purchases and there was some interest shown in exploring bauxite deposits in northwestern Oregon.

This country's only nickel production continued, at a faster pace than the year before, at Riddle. However, a sampling program near Cave Junction in quest of more commercial deposits was discontinued and exploration was curtailed in the Red Flat area of Curry County.

The Horse Heaven mercury mine in Jefferson County, once a major producer, quit. Most of the state's quicksilver came from the Bonanza Mine, east of Sutherlin, and Bretz Mine in southern Malheur County. Some also came from mines in Crook and southern Lake counties.

Limonite, a blackish yellow deposit of iron ore which has long been used for red, brown and yellow paint pigments, stirred some interest near Scappoose. A five-ton test shipment was sent to Japan and preliminary work warranted a larger sampling this year.

Decreased production at Buffalo Mine in Grant County was the principal reason Oregon's gold output was down 31 per cent. There was also some gold mining in areas of Jackson and Josephine counties.

Standard Mine near Prairie City in Grant County—discovered 99 years ago—continued to produce copper with recovery as well as gold, silver and lead. In the 1930s cobalt also was recovered from the ore but it is not currently economical to separate it.

No important developments occurred in the continuing search for oil but seven major companies engaged in field studies.

Five Drown In Rio Grande

LOS EBANOS, Tex. (AP)—Five women, all Mexican nationals, drowned in the murky waters of the Rio Grande Monday after an automobile plunged from a ferry boat.

Four bodies were recovered Monday night on the United States side of the river. There was an unconfirmed report a fifth was recovered on the Mexico side.

Police searched for the driver, whom they identified as Luis Montehongoy, also a Mexican national. They said he freed himself from the submerged vehicle, and swam to the Mexican side.

The accident occurred moments after Montehongoy drove the car aboard the ferry, officers said, bound for San Miguel, Mexico, opposite this border village.

"It shot off into the water and bounced downstream before disappearing in 15 or 20 feet of water," ferry operator Francisco Rivas said. He told police it looked like the driver hit the accelerator instead of the brake.

INSURANCE TORCHLIGHTS
WAYCROSS, Ga. (UPI)—Burglars who apparently forgot their flashlights broke into an insurance firm here and searched the office using flaming insurance policies, police reported.

SCOUT NEWS

CHEMULT—William M. Taylor, scoutmaster for Troop 86, Chemult, held a board of review with Robert Hands, Richard E. Jessur and Conley Elms assisting it eight boys the evening of February 28. As a result of the review there will be several second class awards and two star awards at the next meeting in the Community Club on March 4 at 6:30 p.m. Vern Roehck, principal of the Gilchrist School will be present to make the awards. Parents of the boys and members of the Community Club are invited.

Refreshments will be served by the hostess committee and the regular meeting of the Chemult Community Club with installation of officers follow.

BLY GIRL
BLY—Girl Scout Troop No. 41 of Bly presented a donation of \$5 to the Bly fire equipment fund. The troop consists of five girls, Shannon Briley, Leda Lawrence, Cindy Ward, Katherine Brady and Kathleen O'Brien, whose ages range between 11 and 12 years. Their leader is Mrs. William O'Brien and the assistant leader is Mrs. John Snodgrass. The girls voted and used their dues money to make the contribution with their leaders also making a donation.

BLY — Mrs. Harriet Brotherhood, executive of the Klamath Falls Area of the Girl Scout Council, was present at a Girl Scout leaders' meeting at the home of Mrs. Ray Nelson last week.

Present at the meeting were the following leaders: Mrs. John O'Neil, Mrs. Richard Fairfield, Mrs. John Snodgrass, Mrs. Vince Rental and the hostess, Mrs. Ray Nelson.

The purpose of this meeting was to appoint a new committee chairman for the Girl Scout Neighborhood Service Team of Bly. The present chairman, Mrs. Thomas Thomson, who served this post for the past year and one half will be leaving Bly in the near future. Mrs. Thomson has been in Bly for about five years and has been associated with the Girl Scouts for about two years, as she served as

Cancer Claims Vet Entertainer

SANTA MONICA, Calif. (AP)—Jack McElroy, 45, a veteran radio and television performer, died Monday night of lung cancer after a six-month illness.

McElroy spent 28 years in broadcasting, starting as a singer in his home town of Pittsburgh, Kan. He became known to millions as master of ceremonies on the radio show, "Breakfast in Hollywood," and as the announcer and singer on the TV show, "Bride and Groom."

Liz And Debbie To Be On Show

HOLLYWOOD (AP)—Elizabeth Taylor and Debbie Reynolds—the two women in singer Eddie Fisher's life—will both appear on the annual Academy Awards show April 6.

Producer Jerry Wald says he plans to spot them an hour apart. He hasn't decided yet what each will do.

Debbie labeled Liz as the other woman in her broken marriage with Fisher. Miss Taylor is among those nominated for the top actress award.

WE'RE MIGHTY PLEASED TO BE NAMED YOUR New Larro Dealer Feeds

Taking on Larro was an important step for us... a move we made only after a lot of careful thought and investigation. We came to this conclusion: If you feed poultry or livestock, Larro Sure Feeds—made by General Mills—are of special significance to you...

BECAUSE changing times demand better feeds and Larro pioneers them! Your poultry and livestock require better balanced feeds to deliver greater efficiency and extra profit over feed cost. Larro research goes 'round the clock to bring you greater feeding power. Larro scientists already have fed more than 850,000 farm animals—tested nearly 11,000 different rations—to bring you the benefits of tomorrow's feeds today.

BECAUSE Larro's reputation for performance, fair dealing and consistent high quality is second to none! Larro has been a favorite of the specialized feeder and commercial operator for nearly half a century. The same Larro programs and feeds acclaimed by the specialists can help you get more profit over feed cost on your farm too.

BECAUSE Larro eliminates the need to experiment at your own expense! Every Larro feeding program is backed by flock-size and herd-size tests, carried out under practical farm conditions by General Mills at Larro Research Farm.

Why not stop by TODAY and find out how the Larro Feeding Program can help YOU make more money.

Larro Feeds THE SURE WAY TO BETTER LIVING ON YOUR FARM
