

BOY SCOUT TROOP 99, a recent addition to the Modoc Area Council, is sponsored by the Klamath Falls Moose Lodge, No. 1106. The flag was donated by Clyde Hooper, club secretary and the picture was taken at the time the flag was presented. Rear is Jess Barker, scoutmaster. Boy Scouts, back row, left to right, Joe Gibson, Danny Mitchell, George Chilcote, Keith Painter, Gary Gregory, Brian Eastburn and Robert Clark; front row, same order, Ray Ballard, Doug Smith, Bobby Garrison, Terry Rogers, John Feaback, David Henry, Steve Gordon, David Robison, Mickey Cummings was not present.

Annoying Coughs Quelled By Drops

SEATTLE, Wash. (AP)—Not a cough in a concert hall when Milton Katims conducted the Seattle Symphony orchestra Monday night.

Pretty girls passed out free

Many Kin Share Hospital Room

WICHITA, Kan. (AP)—Mary McCullough, her 5-day-old son, Michael Ray, her daughter, Mrs. Eugene Comley, and Mrs. Comley's day-old daughter, Mickey Ann, have the same room at a Wichita hospital.

Can you figure out how many kinships that makes in one room? (There are two mothers, two daughters, a son, a brother, a sister, a niece, an uncle, a grandmother and a granddaughter.) Grandmother Mrs. McCullough, incidentally, is 34. Mickey Ann is Mrs. Comley's first child.

STEPPING OUT
TUCSON, Ariz. (AP)—Police can't figure how four men who walked out of the Oshrin Hospital in Tucson made such a clean getaway. They were dressed in bathrobes and cowboy hats.

PROFESSIONAL SNIFFERS

COLUMBUS, Ohio (AP)—All day long research scientists at Battelle Memorial Institute sit in closed "smelling booths" sniffing 30 kinds of substances.

The professional sniffers take a whiff every 30 seconds and then try to write a detailed description of the odor.

The research is designed to help the Army Quartermaster Corps provide tastier food for soldiers.

Committee Action Slated On Important Aqua Bills

WASHINGTON (AP)—Committee action is expected this week on important water bills before Congress.

The Senate Interior Committee is expected to approve Tuesday a bill calling for a two-year study of potential water demands and supplies. A subcommittee approved the measure after a brief hearing last week.

A Senate Interior subcommittee is scheduled to act this week on bills to authorize four water projects estimated to cost a total of \$81 million dollars.

The subcommittee held hearings last week on the projects: San Luis Irrigation, Calif., 290 million dollars; Navajo and San Juan-Chama Irrigation, N. M., 241 million; Burns Creek power dam, Idaho, 45½ million; and Spokane valley irrigation, 5 million.

All four bills got prompt approval by the full committee and the Senate in the last session of Congress.

Sponsors expect the same kind

of treatment this year, and they are hopeful the House will follow suit.

The water study bill has powerful support in the Senate. Its sponsors are Sen. James E. Murray (D-Mont.), Interior committee chairman, and Sen. Mike Mansfield (D-Mont.), assistant majority leader in the Senate.

They claim support has been promised by 23 other senators, including Majority Leader Lyndon Johnson (D-Tex.).

Many of these same western Senators are backing water rights legislation introduced recently.

Sixteen are cosponsoring a bill offered by Sen. Joseph C. O'Ma-

honey (D-Wyo.). The bill provides that existing water rights would not be affected by federal withdrawals or reservations of public lands.

The cosponsors include E. L. Bartlett (D-Alaska). None are from Washington or Oregon.

Four senators are cosponsoring a bill introduced last week by Frank E. Moss (D-Utah), who said it would "do the complete job of protecting state and individual water rights from federal preemption."

The cosponsors are Sens. Moss, Case, Wallace F. Bennett (Utah), and Karl E. Mundt (Id.).

The Moss bill spells out authority of the states in the control, appropriation and use of water within their boundaries, including water on federal land.

What we already know about your 1963 car

The engine of your 1963 car will be lighter and will give you improved performance, including better gasoline mileage.

We know this because Standard's scientists are already developing gasolines of the future. To test them, we use experimental engines installed in current model cars. The engines are obtained from auto makers and modified in our laboratories to match engine design forecasts.

These future fuels are given the toughest possible workout — on the road, as well as on this "indoor highway." Here we can create almost any kind of

weather or driving situation at the touch of a button. Gasolines are tested at varying speeds and engine loads to simulate mountains, traffic, freeways . . . under climatic conditions ranging from 120° desert heat to 40° below zero cold.

Your car of the future may never experience such punishing conditions. But if it does, we'll be ready with gasolines that will deliver all the power and performance built into its engine. Research that leads to new and improved gasolines is one of the ways the people at Standard are planning ahead to serve you better.

STANDARD OIL COMPANY OF CALIFORNIA

NEW MAYTAG WITH AUTOMATIC BLEACH DISPENSER

gives you whiter washes than
you can get with any other method!

NEW MAYTAG LINT-FILTER AGITATOR

Removes more lint than ever before possible. Works right in the water—where the lint is!

No mess. No guess. No mistakes. All you do is pour proper amount of full-strength bleach into Maytag's new dispenser. It automatically dilutes bleach to safe strength, adds it to wash water at exactly the right time (after your detergent has done its best work). Result: Whitest washes safely and conveniently!

FREE Bottle of Clorox: Yours just for seeing a demonstration of the new Maytag Automatic Bleach Dispenser. Limited time only.

Which Maytag feature is most important to you?

MODERN FABRICS SETTING • AUTOMATIC RINSE DISPENSER
PUSHBUTTON WATER LEVEL CONTROL • 2 WASH SPEEDS • 2 SPIN SPEEDS • 3 WATER TEMPERATURES • DELICATE FABRIC CYCLE • RUSTPROOFED CABINET
