SAFETY TIP

Keep children from locking themselves in the bathroom or other rooms with a cleverly designed rubber shield made out of an old inner tube. Cut a strip of rubber from the tube long enough to stretch from knob to knob. It will cover the latch and keep the door from clicking shut. Cut a hole in each end of the strip so that it can be fitted over both knobs.

PRECAUTION

Paint light switch plates in danger areas, such as at top of stairs, with luminous paint, or outline with luminous tape. That might keep someone from taking a header in the middle of the night.

SNAP TRICK

Try snapping cuffs on your children's jeans to save yourself time.

Attach large snaps to the outer and inner seams of the cuffs. Then the cuffs are easy to open flat for washing, to be brushed free of dust or pre-scrubbed before laundering. You will also find that they dry faster.
