

## 9-Year-Old Klamath Girl Given New Lease On Life

A little Klamath Falls girl got a new lease on life at Doernbecher Hospital in Portland Wednesday.

JACQUELYN SILLS

Jacquelyn Sills, 9, a Pelican School student, underwent successful heart surgery that lasted four hours. Her parents were told two years ago by medical specialists in the University of Oregon Crippled Children's Center the girl would not live more than eight years. They had taken her to the center to have her tonsils checked. Doctors found the heart ailment then.

But the parents, Mr. and Mrs. Jack Sills who live in the Chelsea Addition, learned last year that

new artificial heart-lung equipment acquired by Doernbecher Hospital made surgery possible and recovery likely.

So, last summer they took Jacquelyn to the center where specialists catheterized the girl. They inserted a probe into a vein and slipped it into her heart to explore its interior.

Jacqueline was examined again December 5 and surgery was set for June, then was moved ahead. She entered the hospital Monday, April 13.

After a long rest—she will be unable to attend school this year—she is expected to be able to forget about daily rests and abnormally frequent illnesses that resulted from her weakened condition.

Her improvement following surgery has been so rapid she was able to perambulate in a wheel chair Sunday and to eat a chicken dinner.

Jacqueline will return home in about two weeks. In the meantime, she requests that friends write her at Doernbecher Hospital, 3181 Sam Jackson Park Road, Portland, and, after she arrives home, at P.O. Box 1101, Klamath Falls.

She is the oldest of the Sills' five children. Her father is employed by State Highway Engineering Department in Klamath Falls.

DEPUTIES ARE ALERT

SAN DIEGO, Calif. (UPI)—Sheriff's deputies spotted a submarine off the coast Tuesday, fixed it in a spotlight and flashed the alarm.

Reporters dashed to the scene. The U.S. Navy finally admitted it was one of ours — on "secret" maneuvers.
