

The Symbol of Progress ...

16-ft Cut... HUGE 37-in. Separator
gives this combine **BONUS EARNING POWER**
to **PAY FOR ITSELF IN USE**

McCORMICK® No. 151 HARVESTER-THRESHER

Here's big power, separating capacity, and operating convenience that saves more grain. Husky, 75-hp gas or LP-gas engine, 37-in. cylinder with 3-point separation and "opposed-action" cleaning. 12, 14, 15, or 16-foot platforms. Optional corn unit.

You get up to 20 per cent more threshing capacity, plus a wider, acre-eating cut. The grain and time you save provides the actual dollars to make the No. 151 harvester-thresher pay for itself in use.

Your trade-in will probably cover the down payment!

Here's **BIG Capacity**
FOR THE MAN WHO MAKES HAYING BIG BUSINESS

If you sell hay . . . custom-bale for those who do . . . or just prefer big bales that can take roughest handling . . . then the big new McCormick No. 56 is the baler for you. Just how big is the No. 56? It has the capacity to bale up to 15 tons an hour . . . turns out king-size 15x19-inch bales. It makes wire-tied bales weighing up to 125 pounds, twine-tied bales weighing up to 100 pounds. Any 3-plow tractor or larger will power the pto No. 56. With engine drive (choice of IH water-cooled or Wisconsin air-cooled engine), you can bale at full capacity with as small as a 2-plow tractor. Come in and see us. Find out why the new McCormick No. 56 is your best big-capacity baler buy!
