Straw Hat Fad Sweeps Country

By DOROTHY ROE
AP Newsfeatures Writer

Everybody wants a straw hat this summer.

Those gay brimmed straw hats which bright teen-agers borrowed from Venetian gondoliers a year or so ago will be seen all over the place this summer—not only on the beach but on city streets as well, worn by Mom as well as daughter.

A bright idea to stretch the usefulness of a natural straw hat is to make a variety of streamer bands in different colors, to match all the dresses in your wardrobe.

This is easy to do if you follow suggestions of local sewing center experts, who experimented with the various color combinations in bias double-fold tape. One effective combination is red, white and blue. You'll need two five-foot strips of tape in each color, plus a strip of cloth or ribbon about two and a half inches wide and long enough to go around the crown of the hat. Measure distance around the crown and mark this off in center of strip of tape. This will leave the two ends about 18 inches long, to form the streamers.

Keep the tape folded and set your automatic sewing machine for a wide zigzag stitch. Start at the end of the first strip and zigzag along until you come to the mark for the crown. Now slip the strip of fabric or ribbon under the tape and continue with zigzag stitch to sew tape to fabric. At end of ribbon strip, continue down streamer end of tape. Repeat with remaining rows of tape.

After all tape is stitched in place, run one line of stitching across ends of crown section. Tie all streamers together and knit ends of each streamer.

An imaginative girl can work out many variations on this theme, in many color combinations. Jumbo rickrack also is effective for hatbands and streamers.

CABBAGE SALAD

For a good salad to serve with a fish dinner, add small chunks of pineapple to shredded cabbage. Blend together with a dressing made of equal parts of cottage cheese and cream or half-and-half.

Mother Superior Joins Do-It-Yourself Movement

PHILADELPHIA (AP)—A tool box isn't standard equipment for a nun, but Mother Mary Agnes of the Sacred Heart Manor for the Aged finds hers just the thing for her work—particularly when the manor's oil burner is acting up.

Mother Agnes, a member of the Carmelite order and superior of the home for the elderly, has a lot of bills to pay on the new building the home now occupies. And it costs a good deal of money to provide the "kind, loving care" prescribed by the order for the aged residents.

So when the oil burner went out of kilter and repair men couldn't seem to find the trouble, Mother Agnes took a hand. The trouble was three-fold. Great billows of black smoke poured from the chimney, parts of the manor were not getting any heat, and one of the glass-enclosed thermostats on the big burner didn't work.

Mother Mary Agnes attacked the thermostat first. She rolled up the sleeves of her habit and poked around until she found a loose connection leading to it. Her tool kit didn't have anything to fix

that, so she dug down into her nocket and came up with an adhesive bandage. Mother Agnes wrapped it firmly around the loose connection. Sure enough, it worked.

That victory behind her, Mother Agnes investigated the burner further. She found the smoke was black because a preheat switch hadn't been thrown to warm the oil. And the reason some parts of the building weren't getting enough heat was that workmen's jackets, hanging on switchboxes, had pulled the switches and cut off the flow of heat to certain areas.

After that Mother Agnes began watching the serviceman who checked the burner each month. She also sent to the factory for a book of instructions. After the serviceman's final visit last spring, she took over the work of caring for the burner. The manor's 165 residents were comfortably warm all through the past winter, and Mother Agnes saved the \$125 yearly maintenance fee.

Observance of a day to honor mother (Mothers Day) was originated by Anna M. Jarvis.
