

**THIS TANKER TRUCK** was backed up at the edge of the lake at the resort site early in May when this picture was taken. Occasion was the planting of 57,000 rainbow fingerlings in Lake of the Woods. The fish were part of a 300,000 fish planting program carried out by Oregon State Game Commission personnel.

**HOOKING UP** preparatory to dumping 57,000 rainbow fingerlings into Lake of the Woods recently is Jack Leichner, OSGC fisheries man. Looking on is Art Gerlach, local fisheries agent. The plant was a part of 300,000 rainbow planted in the lake this year.

**A LONG HOSE** leading from the tank truck interior to the water is used in getting the fish into the lake or stream. Here Tom Neely (right) stands by at the lake end of the hose while Jack Leichner gets ready to start the dumping process. This picture was taken at Lake of the Woods where 57,000 rainbows were dumped from this truck. The fish were part of some 300,000 that were put into the lake this spring.

## "Death Ray" Claim Made

GENOA, Italy (UPI)—An Italian inventor who has been working on atomic energy inventions for 20 years claims to have invented a death ray machine. Pier Luigi Ighina says he is about ready to publish the findings of his work with magnetic atoms and the details of his death ray, which he describes as "a transmitter of atomic vibrations capable of melting the hardest metals." Ighina, who lacks high scientific degrees and training, is indifferent to the scorn of recognized scientists. "The impossible does not exist anymore," he said. "The world must take note of what is boiling in the pot."

The city of Portland Ore., was named after the city of Portland, Maine.

### USES FOR DENTAL FLOSS

NEW YORK (UPI)—Most people think of dental floss only in connection with cleaning their teeth, but Johnson & Johnson, world's largest manufacturer of the product, says it's also dandy for: Flying a kite, as a lightweight fishing line, sewing up turkey or chicken, or stitching buttons onto coats.

## UAR People Get Insurance

CAIRO (UPI) — The United Arab Republic has drafted a law providing for a compulsory health insurance system for civil servants.

The plan will be implemented in stages, and will eventually benefit 300,000 civil servants in Cairo alone.

A medical treatment organization will be formed to provide medical services for civil servants and their families against a small percentage of their salaries plus a nominal fee.

The costs of applying the law in Cairo will amount to 768,000 Egyptian pounds (\$1,920,000). About one-third will be paid by the government. The rest will be collected from the civil servants themselves.

### SALES PITCH

MILWAUKEE (UPI)—The Wisconsin Restaurateur, a trade magazine published in the nation's "beer capital" of Milwaukee, suggested recently that restaurateurs might try not giving their customers a glass of water as soon as they sit down at the table. The publication said this would afford diners with a chance to "learn the satisfaction of a refreshing glass of beer."
