Sleep Tips For Tots

ATLANTA (UPI)—Nine out of 10 mothers who read this have a hard time getting their youngsters to sleep.

Most pre-school children hate bed-time. Not so the teenager. Once he hits the sack you can't budge him with an atomic bomb.

Several Atlanta pediatricians have a few helpful tips to put the little ones to bed.

One doctor said the first big problem is to establish a regular time for going to bed at night and at nap time. The best way is to get yourself on schedule, he says.

Starting a ritual is another way that will help the schedule. For instance, Dad might give the little one a piggy-back ride to bed. A soft, fuzzy toy can become associated with sleep. But don't let the child load up his bed with toys. One doctor said this may keep him awake. Another said it might wake him up again when he rolls over on them.

Another pediatrician emphasized that parents should avoid vigorous activity and scary TV programs right before bedtime.

Now for some facts about sleep, according to the pediatricians. First of all, the actual sleeping hours needed for each child varies. The infant usually sleeps 22 hours, the four or five-year-old may sleep only 10 hours and have perfectly normal sleep habits.

About nap time: At first the child takes two naps a day. Between 18 months to two years he will drop to only one. Then, later, he may not nap at all, but he definitely needs a rest period until kindergarten age.

Don't worry if you have a two or three-year-old who stays awake and is restless all night, the doctors said. This is only a phase and will pass.

FLOWER SHOW

PARIS (UPI)—Plants, flowers and floral decorations from every part of the world will be featured at the Floralia International, opening in Paris April 24.
