Teamsters Slate Meeting To Discuss National Pact

SAN FRANCISCO (AP)—Teamsters under President James R. Hoffa plan a meeting in Chicago next summer to work on a single nationwide agreement that would cover thousands of long distance truck drivers throughout the United States in 1961.

Long distance hauling is presently covered by three major teamster contracts which divide the giant union into three geographical areas. One covers the eastern states, another the central and southern states and the third almost all of the western states.

Hoffa outlined his plans here before a western conference of Teamsters General Hauling Caucus Thursday before he flew to Washington for a date today with the Senate rackets probers.

Under present contracts, Hoffa said, Teamsters union members with valid contracts may be required to drive trucks into areas where other union members are on strike.

With a single master agreement in effect for the entire nation, Hoffa said, no union member would have to cross another's picket line.

Hoffa explained that all contracts covering long distance haul-

ing in the continental 48 states expire within a 60-day period during the summer of 1961.

Hoffa said that if strategy for the master negotiations is successful, the separate agreements will be replaced by one master contract covering all 48 states with a common expiration date, common working conditions and comparable wage rates throughout the nation.

Every union regional joint council will be asked to send two delegates to the Chicago planning meeting.

Within minutes of Hoffa's announcement, 18 union officials were named from nine joint councils in the 11 states of the western conference area.
