MH-30
SPROUT CONTROLTREATED POTATOES
GROW BIG—
But Don't Sprout

Many growers who use MH-30 sprout control report storage sprouting is eliminated. In fact, one large Michigan potato grower says he doesn't have to hand-sprout at all! MH-30 is so effective that it insures top market price for potatoes, even after many months of storage. It's safe, nontoxic, does not affect flavor, color, quality or yield. Inexpensive and easy to apply. MH-30 is applied by ground or air to the potato foliage before harvest. Write, wire or phone us if unable to locate immediate source of supply.
