Industry Turns Deaf Ear On Plan To Slash Prices

WASHINGTON (AP)—The steel industry, it was reliably reported today, has rejected a suggestion that it cut steel prices $10 a ton in lieu of granting a wage increase in the current strike situation.

The suggestion was made by Rep. Chester A. Bowles (D-Conn) in a letter to President Eisenhower, who in turn had it referred directly to Chairman Roger Blough of the U.S. Steel Corp.

Blough is said to have turned down the idea on the ground that in settling the monthlong strike, the steel companies are going to have to give the strikers some sort of wage increase anyway.

So far the industry's position is that it cannot, in the public interest, increase steel labor costs and thus spur inflation. The striking United Steelworkers contend that this is an attempt to reverse traditional American economic policy that workers are entitled to regular sharing in profits.

Bowles told a reporter if the industry went along with his proposals, he felt sure the steelworkers union would have to abandon its wage increase demands in the public interest. Bowles was the government's World War II price administrator.

"The effect of a steel price cut would help the entire economy," Bowles said. "It would probably mean that prices of new 1960 automobiles would have to be lower too.

"We've just gotten out of the habit of cutting prices. But once started the idea would catch on."

With steel negotiations continuing in a complete stalemate in New York, other facets of the situation became known.

1. The administration has no intention of invoking the Taft-Hartley law's national emergency provisions at least until Sept. 15 or Oct. 1. Officials are convinced there will be no sizable steel shortage until then.

2. Secretary of Labor James P. Mitchell, who is studying the strike situation as a fact-finder for Eisenhower, has conferred several times with top figures in the steel companies and striking union.

3. The union is convinced that with no settlement likely the government soon will have to intervene, either by invoking Taft-Hartley or other methods.

4. U.S. Steel revealed it has sent out a statement to striking employes saying the union has exaggerated the effect of steel management proposals to change work rules. U.S. Steel's statement said that from 1940 through 1958 its worker employment costs have risen 288 per cent while shipments of steel products increased only 30 per cent.

5. In reply the union said the work rules couldn't be too much of a problem at U.S. Steel because there have been only 135 cases involving work rules in U.S. Steel grievance procedures since 1947. Out of the 135 cases, the union said, the company won all but 23 in arbitration. Also, the union said industry profit per man-hour rose from $1.47 in 1957 to $2.28 in 1959, or an increase of 67 per cent.

Thefts Told At Crypts

CAIRO (AP) — Investigators have discovered that the Cairo museum has been systematically looted of antique treasures. The remaining treasures of ancient Egypt have been sealed, and a check is being made to determine how much was stolen.

The robberies came to light when a touring Soviet professor noticed that one of King Tut-Ankh-Amen's scepters was missing from its display case. He counted only 10 when the sign said 11.

All points of exit from Egypt have been alerted against attempts to smuggle the sceptre or any other relics out of the country.

Highway Group To Pave Road

AMES, Iowa (AP)—It may not be too long before happy bridal couples can drive down the road to Iowa's Little Brown Church in the Vale without getting road dust mingled with the stardust in their eyes.

The State Highway Commission bent an attentive ear Wednesday to pleas that the 10-mile stretch of graveled Highway 346 be paved.
