

Chiang Requests Support To Topple Peiping Regime

By ALBERT E. KAFF
United Press International
(World Copyright,
United Press International 1959)
TAIPEI, Formosa (UPI)—President Chiang Kai-shek said today the political future of the entire world will be decided in Asia.

The Nationalist Chinese leader said the threat of Communist aggression in the Eastern Hemisphere will collapse if the West gives up its policy of Red containment and helps his government return to the China mainland.

Generalissimo Chiang, who met with the late President Franklin D. Roosevelt and former Prime Minister Winston Churchill in Cairo during World War II, predicted that Communism will never gain the voluntary support of Asia's masses.

But he called for active anti-Communist support from his allies to topple the Peiping regime.

Chiang summed up the last half century in Asia and offered predictions and advice for the future in an exclusive interview with United Press International which now is making its 50th anniversary in Asia.

In capsule summary, Chiang: —Named the late Dr. Sun Yat-sen, founder of the Republic of China, as Asia's outstanding leader during the last 50 years.

—Called Dr. Sun's 1911 Chinese revolution against the Manchu empire one of the major events of the 20th Century because it "gave impetus to the independence and self-determination of various other Asian nations."

—Warned, "It is on the Asian continent that the Communists continue to wage their final decisive battle against the democratic world. The fate of the whole world will therefore be decided on this vast and densely-populated continent."

—Concluded, "Asian peoples have suffered the most from Communism. For this reason, Communism will never gain the

voluntary support of people in this area."
—Predicted, "revolutionary movements will surely break out one after another to shake the Communist regime to its very foundation."

Excise Taxes Top Estimate

PORTLAND (AP)—Oregon corporation on excise tax collections for the July to September period were \$600,000 higher than expected.

George Pederson, statistician for the state Tax Commission, told a meeting of the Legislative Interim Tax Committee that collections totaled \$2,200,000, compared with an estimate of \$1,600,000. He said personal income tax collections for the period were \$18,500,000. The estimate was \$18,400,000.

Pederson said, however, that despite this, the committee should not be optimistic. He said the steel strike could hurt the region's economy by cutting down automobile sales and shutting down heavy construction jobs. In addition, he said, plywood prices are down and there has been a decrease in housing starts.

In other action, the 11-member committee voted unanimously to drop consideration of a gross income tax as a source of income.

The committee will hold meetings at Salem Nov. 13 and 14 and Dec. 11 and 12. These meetings will be devoted to a discussion of a sales tax, said Rep. Clarence Barton (D-Bozette), chairman of the committee.

'Wear Red,' Says Coroner

DOWNEY, Idaho, (AP) — A coroner says the victim of a deer hunter's bullet might have been spared if he'd worn red clothing instead of yellow.

But Ross Leonard, game director of Idaho, said yellow apparel for hunters, said tests in Idaho, California and Washington had shown it to be more visible than red in wooded areas.

Coroner Burton John said the yellow vest worn by the 26-year-old victim, Nepht A. Hewlett, of Pocatello, Idaho, failed to show up in autumn-yellowed foliage. Hewlett was killed, but the coroner absolved the man who fired the shot.

"At this time of year and in this type of country," John said, "don't wear yellow when hunting. It blends in perfectly with the background."

Fare Rapped By Airline

WASHINGTON (AP) — A round trip excursion fare offered by West Coast Airlines between Seattle and Spokane, Wash., has been protested by Northwest Airlines.

West Coast has proposed a round trip fare equivalent of 1 1/2 one-way first class fares to apply for a five-day period. The rate would become effective Oct. 28.

Northwest officials told the Civil Aeronautics Board Saturday the five-day incentive in such a short flight would not justify the proposed discount.

Meanwhile, West Coast, asked the CAB for permission to suspend service at La Grande, Ore., which it has been serving since September 1948.

FLOODS HIT MEXICO
MEXICO CITY (UPI)—Floods caused by 10 days of heavy rain in the south Mexican states of Tabasco and Chiapas have killed at least two persons and driven 10,000 from their homes, it was reported today.

Canal Bids Requested

Bids are requested for construction of about seven miles of canals, three miles of drain and related structures in the Bureau of Reclamation Sump 2 area seven miles southwest of Tulelake.

Offers will be opened and viewed November 10 at the Klamath Falls office.

The construction is an initial segment of a four-year program to build facilities for improved irrigation and drainage on 17,000 acres of Tule Lake bottom land.

The land previously was reclaimed by the Klamath Federal Reclamation Project by diking, and by diverting and pumping out water from Lost River.

The soil is among the most productive in the Klamath Basin, the bureau said, but productivity will decrease and may be lost through salinity if improved irrigation and drainage is not provided.

The construction will lead to eventual homesteading of additional land in the Tule Lake area, the bureau added.

The land is under federal ownership. It is served by the Tulelake Irrigation District. Flood protection good enough to allow homesteading is under study. At present, farmers lease the land from the bureau.

Bid forms and information are available at the bureau's Klamath Falls office on Washburn Way.

New Officers Attend Course

Two fall policemen, new to the Klamath Falls police force, are attending a basic training school in Medford. They are Gerald Flocchini and Robert Gilbert.

Classes began Monday and will end Friday. The school is one of five offered this fall throughout the state by the Oregon Association of City Police Officers and the Oregon State Sheriff's Association in cooperation with the Federal Bureau of Investigation, Oregon State Police, the Bureau of Municipal Research and Service at the University of Oregon, and the League of Oregon Cities.

Courses cover report writing, patrol techniques, mechanics of arrest, basic use of sidearms, traffic patrol, enforcement and case preparation, officer-violator contact, court appearances by officers, public relations, laws of arrest, search and seizure and crime scene investigation. All participants will receive examinations when the class is completed.

At Bible Institute

Dorothy Acklin of Bonanza is one of 403 students enrolled this fall at Central Bible Institute, Assemblies of God Theological School, at Springfield, Missouri.

Miss Acklin, a freshman, expects to major in missions. She is the daughter of Mr. and Mrs. Albert Acklin, Bonanza. She attended Bonanza High School.

Social Studies

Viv Murray, Klamath Falls, is among 60 Linfield College students participating in a child study program there, in connection with her social studies major.

She is a junior planning on teaching after graduation.

New Justice Of Peace

Richmond A. Walker of Gilchrist was appointed Monday to the position of justice of the peace of the Judicial District, Klamath County.

Appointment was announced by Gov. Mark Hatfield. Walker succeeds the late Earl Dunn.

REPORT DENIED

RABAT, Morocco (AP) — The U. S. Embassy today denied press reports that the United States has offered to give up its air bases in Morocco within two years.

Economy Increase Seen If Taft-Hartley Invoked

PITTSBURGH (UPI) — The nation's economy is expected to perk up slightly in the event that Taft-Hartley law is invoked in the 97-day steel strike which already has cost the nation billions of dollars.

With President Eisenhower expected to invoke Taft-Hartley's 80-day cooling off provision, some facets of the economy were expected to feel an immediate nudge upward. However, in most industries it would be weeks perhaps longer before any improvement could be noted.

The auto industry, one of the hardest hit by steel shortages, was scheduled to lay off more workers this week and further curtail production of 1960 model cars.

More than 60,000 workers in the auto industry have been idled by the strike. General Motors, one of the hardest hit, estimated its nationwide layoffs last week at 60,000.

With more than 85 per cent of steel production choked off, nearly 230,000 workers in coal mines, railroads and related industries have been laid off because of the strike. These workers and the strikers have lost an estimated 775 million dollars in wages.

Steel Magazine said last week that direct losses for steel mills and workers plus indirect losses for dependent industries would total an estimated \$6,500,000,000 by today.

In the construction industry, builders said critical shortages in such materials as water heaters, nails, and especially structural steel, would develop within 15 to 30 days even if the strike ended soon. Pipe shortages have shut down many jobs already, according to the National Association of Plumbing Contractors.

The Federal Reserve Board noted during the week end that the nation's industrial production dropped slightly last month because of the steel shortage. It said the pinch of steel shortages was felt in the auto, railroad equipment and ship building industries.

Time was running out for shipments of iron ore on the Great Lakes during the ice-free shipping season. If the strike does not end before the freeze many ore boats would not be able to move out of

Rock 'N' Roll Causes Riot

KANSAS CITY, Mo. (AP) — Men from 21 to 50 years of age caused much of the riotous disorder that led to the closing of a rock 'n' roll show Saturday night, police said.

A crowd of 12,300, mostly teenagers, was in municipal auditorium when fist fights, popping firecrackers, yelling and milling of the crowd brought the police riot squad to the scene.

Police hustled the more belligerent patrons off to jail. Forty-nine were booked on such charges as peace disturbance and public drunkenness. Of that group, 45 are Negroes.

The 49 range from 17 to 50 years of age. Slightly more than half are 21 or older.

There were no serious injuries. The show was billed as "The Dick Clark Caravan of Stars," but the television emcee didn't accompany the troupe to Kansas City. He could not be reached at his home in Philadelphia for comment.

Heading the cast were singers Paul Anka, Lloyd Price, Annette, and Lavern Baker.

Home Owner Trees Tractor

HOUSTON, Tex. (AP)—Florence Wolf freed a tractor on her place and says it will cost the owner \$300 to get it out of the woods.

Mrs. Wolf claims Claude Jones and his tractor-mower damaged shrubs around her 25-room home in Bunker Hill Village while cleaning drainage ditches.

She chained the tractor to a tree with a padlock Friday, then dropped the key in her pocket. She told newsmen she acted on advice of her attorney.

Jones says her asking price is only \$15 less than he's getting for the ditch-cleaning job. Mrs. Wolf —and the tractor—didn't budge.

Cancer Perils 26 Millions

SEATTLE (AP) — Cancer will claim the lives of 26 million Americans living today, Dr. Murray M. Copeland, of the Georgetown University Medical Center, Washington, D.C., said Friday.

Approximately 14 million other Americans will be stricken with the disease, Dr. Copeland predicted in a speech before the state division of the American Cancer Society.

Dr. Copeland said he was "guardedly hopeful" about the general problem of cancer and added that so far 800,000 cancer victims have been cured.

Earlier, Dr. Charles Larson, Tacoma, president of the Washington division, presented the society's highest award to Mrs. Jack Walters, Tacoma; Mrs. Harold Rosenberger, Clarkston; Mrs. Robert Pottschmidt, Wenatchee; Mrs. Horace Bazarth, East Wenatchee; Mrs. K. D. Neyland, Stevenson, and Mrs. J. L. Hardy of Aberdeen.

Reds Not Ahead, Says AEC Chief

MOSCOW (AP) — America's atomic chief says the Soviets are not ahead of the United States in nuclear science and he sees no possibility of them forging ahead.

Chairman John A. McCone of the U.S. Atomic Energy Commission told a news conference Sunday that he came to this conclusion after leading a party of American scientists on a 10-day tour of the Soviet Union.

McCone said he favors cooperating with the Soviet Union in the peaceful use of nuclear energy provided both countries share secrets equally.

He suggested that as a first step toward possible joint U.S.-Soviet nuclear enterprises, an exchange of personnel for periods of 10 months.
