

# Senator Calls For Loans To Help India Beat Reds

SALEM (AP)—Sen. John Kennedy (D-Mass) Tuesday called for a "serious long-range program of long-term loans" to help India overtake the challenge of communism in China.

In an address to Willamette University students, Kennedy said that such a program should be supported by technical and agricultural assistance, and that the United States should join with other Western nations in this effort.

Kennedy, whose name is expected to be on Oregon's Democratic presidential primary ballot next May, conferred with his local supporters before making his speech.

He told the students that aid to India so far "has been limited to emergency aid—to meet immediate crises and existing shortages. We have not met the requirements essential for economic growth, nor have we alleviated the harsh realities which India faced a year ago."

Kennedy declared he is "confident that we can recover the initiative, that we can give a doubting world the realization that we—and no Russia or China—can help India achieve stability and growth."

But, he said, America's attitude and understanding is important.

"If our interest appears to be purely selfish, anti-communist and part of the cold war—if it appears to the Indian people that our motives are purely political—then we shall play into the hands of communist and neutralist propagandists, cruelly distort America's image abroad, and undo much of the psychological effect that we expect from our generosity."

"Let us instead return to the generous spirit in which the original Point Four program was conceived, stress our positive interest in, and moral responsibility for, relieving misery and poverty, and acknowledge to ourselves and the world that, communism or no communism, we cannot be an island unto ourselves."

Kennedy continued that the United States must "prove that we can devote as much energy, intelligence, idealism and sacrifice to the survival and triumph of the open society as the Russian despots can extort by compulsion in defense of their closed system of tyranny."

The auditorium, with a capacity of 1,240, was filled.

During the question period, Kennedy again declined to say if he is a candidate, but said he would make an announcement in January.

He quipped that the secretary of state of Oregon would make the decision for him as far as Oregon is concerned. The Oregon law requires that nationally recognized candidates shall be on the ballot.

and gives the secretary of state the power to decide.

Answering another question, Kennedy said that Congress should change the injunctive processes of the Taft-Hartley labor law.

He said that if the court grants President Eisenhower's request for an injunction that would open up the steel mills for 80 days, labor would suffer.

"At the end of the 80-day period," he said, "another strike is likely, with the steel companies having record profits and surpluses of steel. Then the workers will go hungry again."

Kennedy said that the first job of a new Democratic administration "would be to restore the close ties with Latin America that existed under Franklin D. Roosevelt's good neighbor policy."

Khrushchev's visit, he continued, was valuable because "it taught us that by peaceful coexistence, he means economic, political and social competition."

If India is lost, Kennedy added, "all of Asia will go communistic, and communism would score its greatest bloodless victory."

He said he favors summit talks because there is a chance that some good could come out of them. He said he doubted that any good could come from American recognition of Red China, but that he favors continued negotiations with China.

# Lost Child Found Safe

POTOSI, Mo. (AP) — A young girl missing all night in near-freezing temperatures in the Clark National Forest was found alive three miles from the point where she disappeared. Donna Itulo, 3½, was shivering from the cold but otherwise appeared to be in good condition.

The child, still wearing only a light summer dress, walked out onto a country lane from a wooded sector just as searchers were passing by.

More than 400 searchers, including 150 soldiers, were in the rugged area when she was found.

The child was calm but her parents broke into tears as they embraced her.

Before she was found, authorities had expressed fear that she might have been kidnapped. She had disappeared from the parked car of her parents Mr. and Mrs. Harry Rulo, near this eastern Missouri town when they went for a 20-minute hike into the woods about 3 p.m. Sunday.

# Army Missile Leader To Retire January 31

NEW YORK (AP) — Maj. Gen. John B. Medaris, head of the Army Ordnance Missile Command, plans to retire from active military service three years before mandatory retirement age.

Medaris said Monday night he would retire effective Jan. 31 after 23 years of active duty and 10 in the National Guard and Army reserve. The Army's mandatory retirement age is 60.

Medaris did not reveal his future plans.

An Army spokesman said Medaris had planned for some time to retire and that inter-service squabbles over space projects had not influenced his decision. However, Medaris has spoken out against transfer from the Army to the Air Force of all space transportation projects.

The 57-year-old general planned a news conference here today. His headquarters is in Huntsville, Ala., and he is in New York to address the National Commercial Conference tonight.

Under his command, the Army launched the nation's first, earth satellite, and the first solar satellite and developed the Jupiter intermediate range (1,500-mile) ballistic missile. The Army also launched several other satellites, the latest a 91-pound gyroscope satellite hurled into the sky last week for the National Aeronautics and Space Administration.

do FALSE TEETH Rock, Slide or Slip? FASTEETH, an improved powder to be sprinkled on upper or lower plates, holds false teeth more firmly in place. Do not slide, slip or rock. No gumming, sticky paste, taste or feeling. FASTEETH is alkaline (non-acid). Does not sour. Checks "plate odor, breath." Get FASTEETH at drug counters everywhere.

The Army spokesman said Medaris had planned to retire in 1955 but was persuaded by Army officials to stay on to head up the development of the Jupiter. With completion of that, he said, the general planned to retire.

Medaris has been at Huntsville since the Army Ballistic Missile Agency was activated at Redstone Arsenal in February 1956. It was one of the largest collective enterprises ever undertaken by the Army and controlled the expenditure last year of almost two billion dollars in the missile and space field.

The Army Missile Command was extended in scope in 1958 and Medaris was named to head the entire effort. Besides the ballistic missile agency, the command included the Army Rocket and Guided Missile Agency at Huntsville, White Sands Missile Range in New Mexico, and the Missile Firing Laboratory at Cape Canaveral, Fla. The Jet Propulsion Laboratories at Pasadena, Calif., were at one time under the command but later were placed under NASA.

The Army received a major setback last month when the Defense Department announced the Air Force eventually would assume responsibility for all space transportation tasks.

CAIRO, U.A.R. (UPI) — King Mohammed V of Morocco will visit the United Arab Republic next January at the invitation of U.A.R. President Gamal Abdel Nasser.
